PROVINCIAL GOVERNMENT OF LA UNION

ECOLOGICAL PROFILE 2024

ECOLOGICAL PROFILE OF LA UNION 2024

INTRODUCTION

The Ecological Profile (EP) is a comprehensive and reliable statistical database that serves as a vital reference for formulating policies and strategies related to planning, decision making, and policy setting for effective governance and management of natural resources. Formerly known as the Socio-Economic Profile (SEP) of the Province of La Union, the Ecological Profile provides equal coverage of physical, biological, socioeconomic, cultural, and built environments. The shift from the Socio-Economic Profile to the Ecological Profile is encouraged and recommended by the Department of the Interior and Local Government (DILG) as it merges the Socio-Economic Profile and biophysical profiles, providing a broader data reference source.

The document contains statistical data and information about the Province of La Union, focusing on Environment and Natural Resources, Social, Economic, Infrastructure and Institutional Development sectors. This information can serve as a data source for planning programs, projects, and activities, as well as for formulating policies and making important decisions in line with the province's vision. These sources are clustered by tourism circuits and by district/municipality/city in La Union. The agri-tourism destinations are linked together as tourism value chains in the following circuits: North Tourism Circuit, Central Tourism Circuit, Central East Tourism Circuit, Southern Tourism Circuit, and Southeastern Tourism Circuit. The Province of La Union expresses its appreciation and gratitude to all our data sources for their unwavering support in the preparation of this profile.

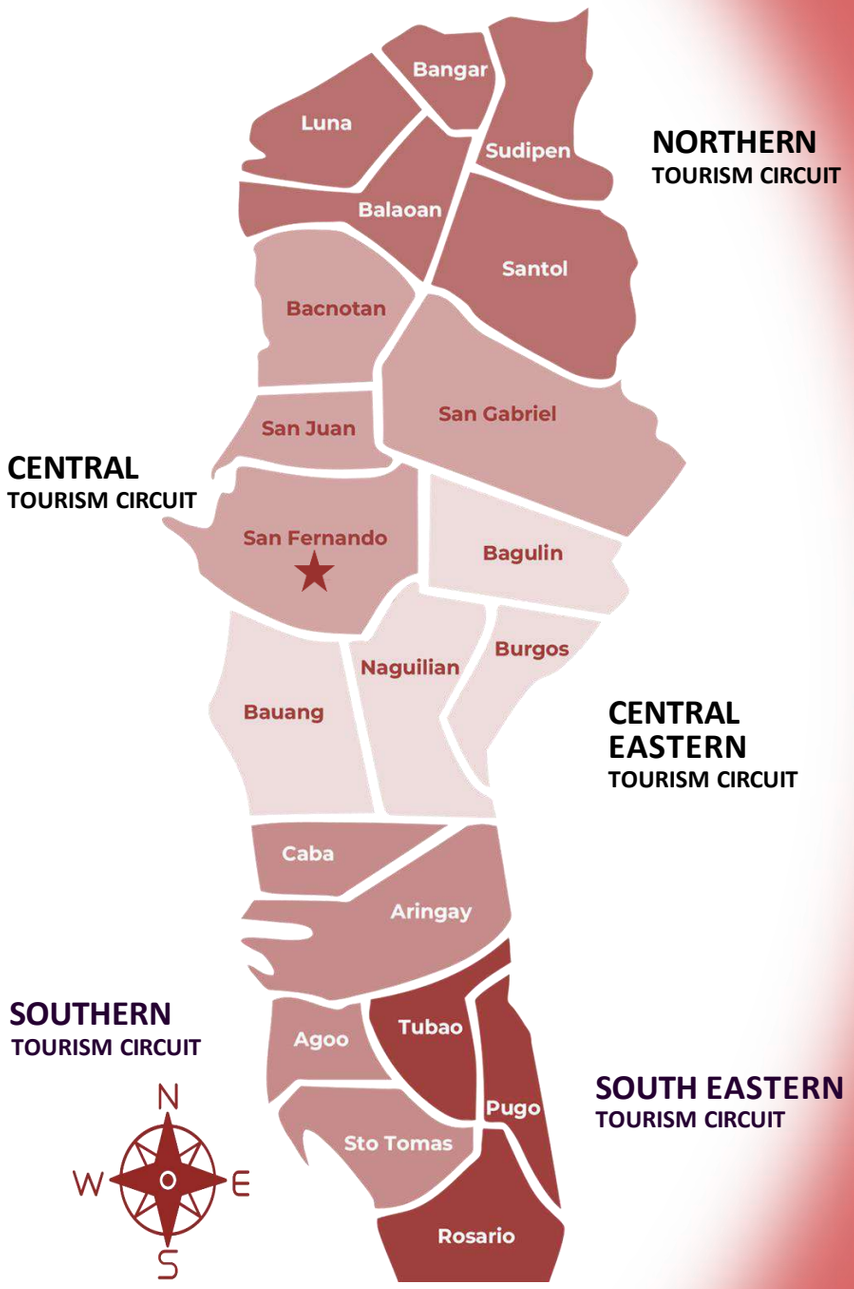

TABLE OF CONTENTS

INTRODUCTION

CHAPTER I – GENERAL INFORMATION

A. Brief History

1. Political and Cultural History/Ethnic Origin of the People **1**
2. Geography
   - 2.1 Location and Boundaries **3**
   - 2.2 Land Area **3**
3. Political Subdivisions
   - 3.1 Municipalities/City and Barangays of La Union **3-4**
4. Language/Dialects **4**
5. Religious Sects **4**
6. Ethnic Groups **4**
7. Citizenship **5**
8. Marital Status **5**

CHAPTER II – ENVIRONMENT AND NATURAL RESOURCE

A. Topography and Climate

1. Topography **58**
2. Climate and Weather **58**

B. Land Cover **58**

C. Land Use

1. Grassland/Shrubland Areas **59**
2. Agricultural Areas **59**
3. Perennial Crop **59**
4. Grassland **59**
5. Open Barren **59**
6. Open Forest Areas **60**
7. Water Bodies **60**
8. Built up Areas **60**

9. Unclassified 60
D. Slope 60
E. Land Classification 61
F. Soil
1. Soils of the Plain and Undulating Areas 61
2. Soils of the Rolling Areas, Steep Hills and Mountain 62
3. Soils of the Miscellaneous Land Types 62

G. Forestry
1. Watershed and River System 62-63
2. Mineral Resources 63
H. Marine Protected Areas 63
I. Coastal Area 64
J. Shoreline 64
K. Land Conversion 64
L. Sanitary Land Fill 65

CHAPTER III – SOCIAL DEVELOPMENT

A. Population
1. Population Growth Trends 34
2. Population Growth Rate and Doubling Time 34
3. Migration 35
4. Population Density 35
5. Urban-Rural Distribution
5.1 Level of Urbanization 35
5.2 Tempo of Urbanization 36

6. Age-Sex Structure
6.1 Age Sex Ratio 36
6.2 Age Dependency Ratio 37

7. Household Population and Household Size
7.1 Household Distribution 37
7.2 Household Size 38

8. Labor Force and Employment
8.1 Labor Force 38
8.2 Labor Force Participation Rate 38
8.3 Employment Rate 38
8.4 Underemployment Rate 38

9. Poverty and Income
9.1 Poverty Threshold 39
9.2 Average Family Income 39
9.3 Poverty Incidence and Magnitude of Poor
a. Poverty Incidence among families and among population
a.1 Provincial Level 40
a.2 Municipal Level 40
b. Magnitude of Poor Families and Poor Population 41

B. Social Services
B.1 Health
1. Life Expectancy 94
2. Birth 94
3. Deaths 95
3.1 Infant Mortality Ratio 95
3.2 Maternal Mortality Ratio 95
4. Morbidity Rates 95-96
5. Contraceptive Prevalence Rate 96
6. Health Facilities
6.1 Hospitals 96

6.2 Health Centers/Clinics/BHSs 96
7. Health Manpower 97
8. Malnutrition 97
9. Immunization of Children 97
10. Maternal Care 97-98
11. Teenage Pregnancy 98

B.2 Education
1. Formal Education
1.1 Physical Facilities
a. Elementary and Secondary Level 129
b. Tertiary Level 129
1.2 School-Going Age Population 129
1.3 Enrolment
a. Elementary and Secondary Level 130
b. Tertiary Level 130
c. Vocational Level 131
1.4 Classroom-Pupil Ratio 131-132
1.5 Teacher-Pupil/Student Ratio 132
1.6 Performance Indicators in Public Schools 132-133
1.7 Literacy Rate 133
2. Non – Formal Education 134

B.3 Social Welfare
1. Day Care Services 156
2. Youth
2.1 Out of School Youth 156
2.2 Person With Disability (PWD) 156
3. Kalipunan ng Liping Pilipina (KALIPI) 157
4. Senior Citizens 157
5. Poor Households and Individuals 157

6. Indigenous People 157
7. Parole and Probationers 158

B.4 Housing

1. Housing and Resettlement 189
2. Squatters 189
3. Occupied Housing Units 189
4. Housing Materials 189
5. Occupied Housing Units by Type of Roofing Materials 190
6. Occupants by floor area 190
7. Type of Structure 190
8. Land Ownership 191

B.5 Protective Services

1. Crime Statistics
   - 1.1 Crime Rates 256
   - 1.2 Drug Clearing Operations 256
2. Private Security Agencies 256
3. Fire Protection 257
4. Provincial Jail Services 257
5. Disaster Services
   - 5.1 Natural Hazards 258
   - 5.2 Preparedness
     - a. Evacuation Centers 258
     - b. Training and Capacity Development 259
     - c. Vehicle, Resue, Equipment and Supplies 259-260

CHAPTER IV – ECONOMIC DEVELOPMENT

A. Agriculture

1. Agriculture Production and Sufficiency 285

1.1 Palay 285-286
1.2 Fruit Trees 286
1.3 Leafy and Fruit Vegetables 286
1.4 Legumes 286
1.5 Rootcrops 286
1.6 Corn 287
2. Fishery Production and Sufficiency 287
3. Livestock Production and Sufficiency
3.1 Livestock Production 287-288
3.2 Livestock Sufficiency 288
4. Agriculture Income and Employment Generated 289
4.1 Income Generated 289
4.2 Employment Generated. 289
5. Livestock Income and Employment generated
5.1 Income Generated 290
5.2 Employment Generated. 290
B. Trade and Industry
1. Establishments
2. Commerce
3. Trends in Consumer Price Index, Inflation Rate, and Peso Purchasing Power
3.1 Consumer Price Index 348
3.2 Inflation Rate 348
3.3 Purchasing Power of Peso 348
4. Financial Institutions
4.1 Bank 348-349
4.2 Pawnshops and Other Financial Institutions
a. Pawnshops 349
b. Money Service Business 349

C. Tourism
1. Tourist Destinations

1.1 Natural Attractions
a. Beaches: 349
b. Island Hopping: 350
c. Mountains: 350
1.2 Man-Made Attractions
a. Historical Landmarks: 350
b. Museums: 350
c. Pottery Making: 350
d. Blanket Weaving: 350
e. Basi Making: 350
1.3 Religious Attractions
a. Churches: 350
b. Festivals: 350
1.4 Special Interest
a. Surfing: 350
b. Trekking: 350
c. Scuba Diving: 350
d. Hiking: 351
e. Nightlife: 351
2. Tourist Attraction 351
3. Tourist arrivals
3.1 Tourist arrival in establishments 351
3.2 Tourist arrival by source of origin 351-352
4. Travel and Tours 352
5. Hotels, Resorts, Motels, Inns 352-353
6. Restaurants/Dining and Rest Areas . . . . . .
7. Annual Fiestas/La Union Day 353
8. Market Days 354

CHAPTER V – INFRASTRUCTURE DEVELOPMENT
A. Infrastructure and Utilities

1. Transportation
1.1 Land Transportation
a. Roads 374-375
b. Registered Transport Vehicles 375
c. Bridges 376
2. Sea Transportation
2.1 Wharves and Piers 377
3. Air Transportation 377

B. Waterworks and Sewerage Facilities
1. Water Systems 378
2. Water Supply 378
3. Irrigation Systems 378-379

C. Infrastructure Buildings
1. Education 379
2. Health 379
3. Others 379-380
D. Power Supply 380
E. Communication
1. Postal Communication 380
2. Internet Connections 381
3. Telecommunication 381-382
4. Press and Publications 382
5. Radio Stations 382
6. La Union Facebook Page 382
F. Other Utilities (Machineries and Equipment)
1. Agricultural Equipment 382-383
2. Construction Equipment 383

G. Sanitation Facilities 383

H. Other Facilities
1. Provincial/Municipal/Barangay Libraries
1.1 Provincial 383
1.2 Municipal 384
1.3 Barangay 384
2. Sports Facilities 384
3. Convention Facilities 384
4. Shopping Centers 385

CHAPTER VI – INSTITUTIONAL DEVELOPMENT
A. Organization and Management
1. Organizational Structure 441
2. Procurement 442
3. Awards
3.1 Seal of Good Local Governance 442
3.2 Provincial Government of La Union Recognitions and Awards Received 443
4. Local Government Unit Plans
5. Election Data 443
B. Fiscal Management
1. Revenue 444
2. National Allotment 444
3. Budget Appropriation and Expenses 444
4. Income Class 445
5. Real Property Assessment 445-446
6. Real Property Collections 446
7. Legislative Output
7.1 Resolutions and Ordinances 447

C. LGU-NGO-PO Linkages
1. Accredited Civil Society Organizations 447-448

LIST OF TABLES

Table Number	Particulars	Page Number
1	Land Area, Number of Barangays and Area by Tourism Circuit, and by District/Municipality/City in La Union	14
2	Existing Land Cover Distribution, by Categories, by Municipality/City in La Union:2020	15
3	Slope Classification and Area, by Tourism Circuit, and by District/Municipality/City in La Union	16
4	Land Classification and Area, by Tourism Circuit, and by District/Municipality/City in La Union	17
5-5a	La Union Watersheds by Municipalities Covered and Corresponding Area in Hectares	18-19
6	Watershed Areas Supporting NIA Irrigation System (NIS)in La Union: 2024	20
7	Locally Managed Marine Protected Areas (MPAs) by Municipality/City in La Union: 2024	21
8	Protected Areas within La Union under National Integrated Protected Areas System (NIPAS) in La Union: 2024	22
9	Number of Upland, Lowland, Coastal and Riverside Barangay and Kilometerage of Shoreline by Tourism Circuit and by District/Municipality/City of La Union	23
10	Registered Electronic Titles (e-Titles) for the Support to Parcellation of Lands for Individual Titling (SPLIT) Project by Tourism Circuit and by District/Municipality/City in La Union: 2024	24
11	Number of Approved Application for Land Conversion and Total Area Converted, by Tourism Circuit and by District/Municipality/City in La Union: 2022-2023-2024	25
12	Membership Classifications in Organizations Formed/involved in Agrarian reform Communities by Tourism Circuit, and by District/Municipality/City in La Union: 2024	26
13	Monitoring of Compliance to Granted Conversion, by Tourism Circuit and by District/Municipality/City in La Union: 2022-2024	27
14	Temperature by Level and by Month and by Station: 2021-2022	28
15	Volume of Non-Metallic Minerals by Tourism Circuit, and by District/Municipality/City in La Union: 2023	29
16	Number and Barangay Location of Quarrying Areas, by Tourism Circuit, and by District/Municipality/City in La Union: 2023	30
17	Number of Material Recovery Facility by Tourism Circuit, and by District/Municipality/City in La Union: 2022-2024	31
18	Sanitary Landfill by Category, by Tourism Circuit, and by District/Municipality/City in La Union: 2022-2024	32

LIST OF TABLES

Table Number	Particulars	Page Number
19	Annual Waste (Manure) of Animals by Type, by Tourism Circuit and by District/municipality/City in La Union: 2024	33
20	Census of Population in La Union1902-2020	42
21	Population Enumerated in Various Census Years by Tourism Circuit, and by District/City/Municipality in La Union:1960-2020	43
22	Population and Growth Rates, by Tourism Circuit and by District/Municipality/City in La Union: 2000-2020	44
23	Land Area, Population and Population Density and Doubling Time, by Tourism Circuit, and by District/Municipality/City in La Union:2015-2020	45
24	Urban-Rural Population by Tourism Circuit and by District/Municipality/City in La Union: 2015-2020	46
25-25a	Total Population by Single - Year Age Classification and Sex in La Union:2020	47-48
26-26d	Total Population by Age Group, by Sex, by Tourism Circuit, and by District/Municipality/City in La Union:2020	49-53
27	Total Population 10 Years Old and Over, by Marital Status by Tourism Circuit, and by District/Municipality/City in La Union:2020	54
28	Population, Household, Average Household Size, by Tourism Circuit and by District/Municipality/City in La Union:2015 and 2020	55
29	Population by Dependent Age Group, Productive Age Group, by Sex, La Union:2015-2020	56
30-30a	Total Household Population by Single - Year Age Classification and Sex in La Union:2020	57-58
31-31d	Household Population by Age Group, by Tourism Circuit and by District/Municipality/City in La Union:2020	59-63
32-32c	Household Population by Religious Affiliation by Sex in in La Union Region I and Philippines:2020	64-67
33	Total Number of Household Head, by Household Size, by Tourism Circuit, and by District/Municipality/City in La Union:2020	68
34	Number of Male Household Head, by Household Size, by Tourism Circuit, and by District/Municipality/City in La Union:2020	69
35	Number of Female Household Head, by Household Size, by Tourism Circuit, and by District/Municipality/City in La Union:2020	70
36-36a	Household Population by Ethnicity, by Sex in La Union:2020	71-72
37	Household Population by Relationship by Household Head and Household Size in La Union:2020	73

LIST OF TABLES

Table Number	Particulars	Page Number
38	Filipino with Dual Citizenship by Country in La Union, 2020	74
39	Household Population by Country of Citizenship in La Union:2020	75
40	Foreign Citizens by Country of Citizenship in La Union: 2020	76
41	Household Population 5 Years Old and Over by Sex, Place of Present Residence, Residence of Mother at the Time of Birth of the Household Member, and City/Municipality in La Union: 2020	77
42	Household Population 5 Years Old and over by Sex, Place of Present Residence, Place of Residence 5 Years Ago by Tourism Circuit and by District/ Municipality/City in La Union:2020	78
43	Household Population 10 Years Old and Over, by Sex, by Marital Status, by Tourism Circuit and by District/Municipality/City in La Union:2020	79
44-44a	Total Overseas Workers 15 Years Old and Over by Highest Grade/Year Completed, Sex, and Age Group:2020	80-81
45-45a	Male Overseas Workers 15 Years Old and Over by Highest Grade/Year Completed, Sex, and Age Group:2020	82-83
46-46a	Female Overseas Workers 15 Years Old and Over by Highest Grade/Year Completed, Sex, and Age Group:2020	84-85
47	Total Employed, Total Population in the Labor Force, Unemployed, Underemployed Persons and Employment, Labor Force Participation,	
	Unemployment and Underemployment Rate in La Union, Region I and Philippines: 2020-2022	86
48	Number of Establishments, Total Employment and Employment Groupings (MSMEs)in La Union: 2021	87
49	Number and Total Employment of Closed, Temporarily Closed and Newly Listed Establishments by MSME at the National, Regional and by Provincial Levels: 2021	88
50	Consumer Price Index and Inflation Rate in La Union: 2022-2024	89
51	Monthly Consumer Price Index, Inflation Rate, Percent Change and Purchasing Power of Peso in La Union:2022-2024	90
52	Annual Poverty Thresholds, Poverty Incidence and Magnitude of Poor Families and Population in La Union, Region I and Philippines: 2018, 2021 and 2023	91
53	Annual Food Threshold, Subsistence Incidence, Magnitude of Subsistence of Poor Families and Population in La Union, Region I and Philippines: 2018, 2021 and 2023	92
54	Poverty Incidence by Tourism Circuit, and by District/Municipality/city in La Union:2018-2021	93
55	Life Expectancy by Sex: 2000 - 2040	99

LIST OF TABLES

Table Number	Particulars	Page Number
56	Total Deaths by Sex and Crude Death Rate/1000 population, by Tourism Circuit and by District/Municipality/City in La Union: 2024	100
57	Total Births by Sex and Crude Birth Rate/1000 population, by Tourism Circuit and by District/Municipality/City in La Union: 2024	101
58	Ten Leading Causes of Mortality, by Sex and Rate/1000 Population in La Union: 2024	102
59	Ten Leading Causes of Morbidity, by Sex and Rate per 1000 Population in La Union:2024	102
60	Five Leading Causes of Infant Mortality, by Sex and Rate/1000 Population in La Union: 2024	103
61	Leading Causes of Maternal Mortality and Rate/1000 Population in La Union: 2024	103
62	Mortality, Infant Mortality and Maternal Mortality Rate by Tourism Circuit and by District/Municipality/City in La Union: 2022-2024	104
63	Number of Fully Immunized Children, Infants Given 3rd Dose of Hepa B and Infants Exclusively Breastfeed up to 4th Months by Tourism Circuit and by District/Municipality/City in La Union: 2024	105
64	Number of Infant Deaths (below 1 Year Old) and Child Deaths (5 Years Old and Over) by Tourism Circuit and by District/Municipality/City in La Union: 2024	106
65	Number of C.D.D. and A.R.I. Cases (0 -59 Months Old), by Tourism Circuit and by District/Municipality/City in La Union: 2024	107
66	Number of Pregnant Women, Post-Partum Mother Given Iron and Iodine Supplementation, by Tourism Circuit and by District/Municipality/City in La Union: 2024	108
67	Maternal Care Services by Age Bracket, by Tourism Circuit and by District/Municipality/City in La Union:2024	109
68	Number of Lactating Mothers and Children Given Vitamin A, by Tourism Circuit and by District/municipality/City in La Union: 2024	110
69	Teenage Pregnancy Rate/1000 Population by Tourism Circuit and by District/Municipality/City in La Union: 2024	111
70	Number of Eligible Population and Contraceptive Prevalence Rate, by Tourism Circuit and by District/Municipality/city in La Union: 2024	112
71-71a	Nutritional Status of Pre School Children (O-5 Years Old) by Category, by Tourism Circuit and by District/Municipality/City in La Union: 2024	113-114

LIST OF TABLES

Table Number	Particulars	Page Number
72-72a	Height Status of Pre School Children (O-5 Years Old) by Category, by Tourism Circuit and by District/Municipality/City in La Union: 2024	115-116
73-73a	Weight Status of Pre School Children (O-5 Years Old) by Category, by Tourism Circuit and by District/Municipality/City in La Union: 2024	117-118
74	Other Health Facilities by Tourism Circuit and by District/Municipality/City in La Union; 2024	119
75	Health Manpower by Tourism Circuit and by District/Municipality/City in La Union: 2024	120
76	List of Government and Private Hospitals by Tourism Circuit and by District/Municipality/City:2024	121
77	Number and Bed Capacity of Public and Private Hospitals by Tourism Circuit and by District/municipality/City in La Union: 2024	122
78	Number of Leprosy Cases Diagnosed and Given Treatment by Sex, by Tourism Circuit and by District/municipality/City in La Union: 2024	123
79	Number of Covid 19 Cases, Deaths, and Treated by Tourism Circuit and by District/Municipality/City in La Union: 2022-2024	124
80	Number and Percent of Households Using Safely Managed Sanitation Services with Satisfactory Solid Waste Management and with Complete Sanitation Facilities by Tourism Circuit and by District/Municipality/City in La Union:2024	125
81	Number and Percent of Households with access to Safe Water Supply, by Level and Household Using Safely Managed Drinking Water Services by Tourism Circuit and by District/Municipality/City in La Union:2024	
82	Number of Household with Basic Sanitation Facility, by Tourism circuit and by District/Municipality/City in La Union: 2024	127
83	Number and Percent of Barangays Declared Zero Open Defecation by Tourism Circuit and by District/Municipality/City in La Union:2024	128
84	School Going Age Population, by Age Group and by Sex, by Sex: 2015 and 2020	135
85	Number of Enrollment, Teachers, Classroom, Teacher and Classroom Pupil Ratio in Public Elementary School, By Tourism Circuit and by District/Municipality/City in La Union: SY 2023-2024	136

LIST OF TABLES

Table Number	Particulars	Page Number
86	Number of Enrollment, Teachers, Classroom, Teacher and Classroom Pupil-Ratio in Private Elementary School, By Tourism Circuit and by District/Municipality/City in La Union: SY 2021-2022	137
87	Number of Enrollment, Teachers, Classroom, Teacher and Classroom-Student Ratio in Public Secondary School by Tourism Circuit and by District/Municipality/City in La Union: SY 2023-2024	138
88	Number of Enrollment, Teachers, Classroom, Teacher and Classroom-Student Ratio in Private Secondary School by Tourism Circuit and by District/Municipality/City in La Union: SY 2021-2022	139
89	Number of Enrollment in Public Elementary Schools by Grade Level, by Tourism Circuit by District/Municipality/City in La Union: SY 2023-2024	140
90	Number of Enrollment in Private Elementary Schools by Grade Level, by Tourism Circuit by District/Municipality/City in La Union: SY 2023-2024	141
91	Number of Enrollment in Public Secondary Schools by Grade Level, by Tourism Circuit by District/Municipality/City in La Union: SY 2023-2024	142
92	Number of Enrollment in Private Secondary Schools by Grade Level, by Tourism Circuit by District/Municipality/City in La Union: SY 2023-2024	143
93	Number of Public and Private Schools by Level, by Tourism Circuit by District/Municipality/City in La Union: SY 2023-2024	144

CHAPTER I – GENERAL INFORMATION

A. BRIEF HISTORY

1. Political and Cultural History/Ethnic Origin of the People

La Union, which means "the union" or "the united," was formed through the amalgamation of towns from the provinces of Ilocos Sur, Pangasinan, and Benguet.

Established in 1850, La Union was formed by dividing Northern Luzon into Pangasinan, Ilocos Sur, and Cagayan. Initially, it included twelve towns: Purao (now Balaoan), Namacpacan (now Luna), Bangar from Ilocos Sur, and Sto. Tomas, Agoo, Aringay, Caba, Naguilian, Bauang, San Fernando, San Juan, and Bacnotan from Pangasinan. Two additional towns, Rosario and Tubao, were incorporated between 1850 and 1900.

Governor-General Antonio Maria Blanco formalized the establishment of La Union through a Superior Decreto on March 2, 1850, designating San Fernando as its capital. Royal approval was granted on April 18, 1854, when Queen Isabella of Spain signed the Real Orden.

During the Philippine Revolution, the residents of La Union actively participated in the Katipunan's struggle against Spanish rule. Following American colonization, the Filipinization policy gradually integrated Filipinos into governance. As a result, La Union became one of the first provinces in Northern Luzon to establish a civil government on August 15, 1901, with Don Joaquin Ortega serving as its first civil governor.

The American period introduced democratic governance and emphasized English in education, significantly shaping the province. This period of significant societal and political change laid the groundwork for future development, establishing structures and systems that would continue to influence the region for decades to come. However, the province’s journey was far from smooth, as it faced numerous challenges that tested its resilience.

World War II later presented a profound challenge to La Union, but its enduring spirit shone through conflicts against Spain, the United States, and Japan. The province’s capacity to withstand periods of upheaval and adapt to changing circumstances is a testament to its strength and the determination of its people. The establishment of San Fernando City as the provincial capital on March 20, 1998, further solidified its position as the center of administration and governance within Region 1, reflecting the province’s ongoing development and progress despite historical adversities.

Today, La Union is a thriving first-class province, consisting of 19 municipalities, one city, and 576 barangays. It is known for its peace, cleanliness, and commitment to environmental stewardship, serving as a model province in the Philippines. Under the new provincial administration’s initiative, “La Union: Agkaysa,” there is a strong emphasis on building partnerships with the Provincial Government of La Union (PGLU) and its Local Government Units (LGUS) to promote solidarity and harmony.

Governor Mario Eduardo C. Ortega, along with a dedicated team, together with the Sangguniang Panlalawigan led by Vice Governor Eric O. Sibuma, and Congressman Francisco Paolo P. Ortega from the vibrant 1st District, along with Congressman Dante S. Garcia from the progressive 2nd District, is set to usher in a new era for La

Union. The administration is launching a series of innovative strategies aimed at driving sustainable development and improving governance, all in pursuit of a brighter future for its communities.

The province's resources, potential, and competitive advantages create a stunning blend of seas, mountains, rivers, valleys, rolling hills, and diverse terrains, resulting in a panoramic landscape of unparalleled beauty. La Union invites visitors to experience a home away from home, embodying love, unity, and harmony, promising an unforgettable experience.

Since 1994, La Union has consistently been recognized as the cleanest and greenest local government unit in Region I, often ranking among the top ten nationwide. It is also distinguished by its remarkable natural beauty and a wealth of human resources. It is home to a highly skilled workforce, featuring well-educated professionals and innovative entrepreneurs. These individuals are recognized for their honesty, discipline, creativity, and strong work ethic, contributing significantly to the region's economic development and overall progress.

La Union is geographically located and easily accessible by land, sea, and air. It features world-standard port and customs facilities and excellent highways and bridges connecting it to major destinations like Baguio City, Lingayen Gulf, Hundred Islands, Vigan, Laoag City, and Manila. Additionally, it serves as the administrative center of the Ilocos-Pangasinan Region and is conveniently close to key East Asian markets, including Hong Kong (520 km), Taiwan (620 km), Korea (2,020 km), and Japan (2,380 km).

La Union is an emerging tourism destination in Region I and is gaining popularity nationwide, known for its pristine beaches, seaside mountain parks, and a ten-hectare botanical garden. The province offers world-class amenities such as hotels, resorts, parks, and convention centers, making it appealing for both business and leisure travelers. San Juan is particularly popular for its mix of adventure and cultural experiences, attracting surfers, beach lovers, and foodies. Meanwhile, Bacnotan is gaining attention for agri-tourism and industrial development. Other local government units are also drawing tourists with innovative attractions which makes La Union a province to watch this season as it continues to develop its tourism potential.

The City of San Fernando, the administrative capital of Region I, is a thriving economic hub for trade, tourism, and agro-industrial development. Its strategic location provides seamless connectivity to both domestic and international markets, including Metro Manila and the wider Northern Luzon region. The city's rising appeal is enhanced by its strong infrastructure, which includes a national seaport and the upcoming San Fernando City Airport, making it an ideal gateway for business expansion and investment opportunities.

The province is abundant in agricultural and mineral resources and enjoys a pleasant climate often referred to as an "endless summer." Moreover, La Union provides a peaceful environment, free from insurgency, and is celebrated for its warm, hospitable community. Residents are known for their resilience, artistry, and friendliness, offering visitors a taste of Ilocano cuisine, basi toast, and heartfelt accommodations.

2. Geography

2.1 Location and Boundaries

La Union is situated in the southwestern part of the Ilocos Region. Its administrative center is San Fernando City, which was formerly the capital town. San Fernando City is located 273 kilometers north of Manila and 57 kilometers south of Baguio City. The province spans approximately 102 kilometers from north to south and is positioned between latitude 16° 55" north and longitude 120° 35" east.

La Union is bordered on the north and northeast by Ilocos Sur, on the south by Pangasinan, on the east by Benguet, and on the west by the Lingayen Gulf and the Philippine Sea.

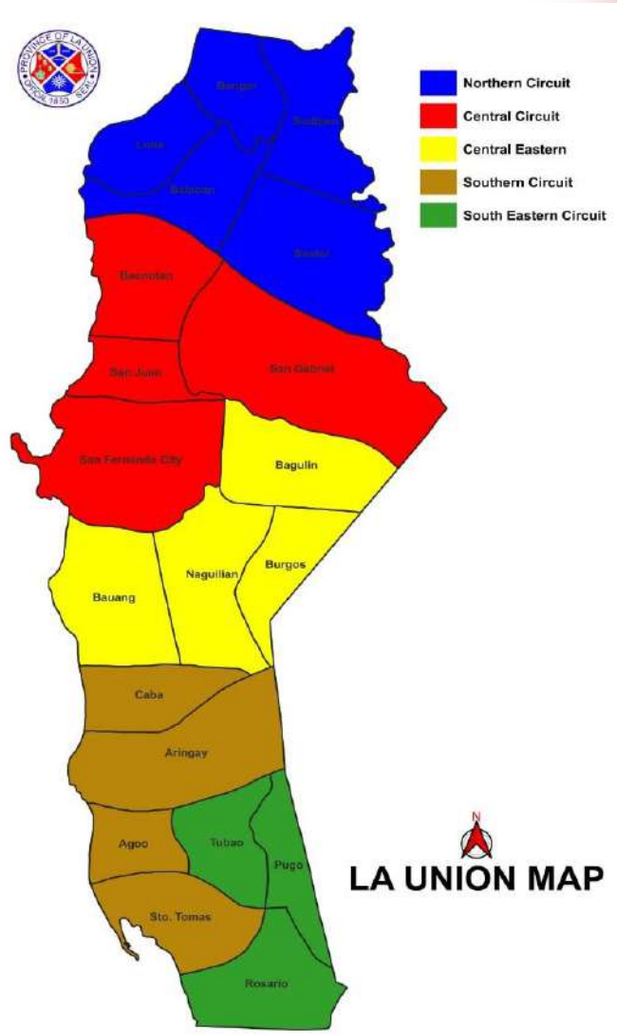
2.2 Land Area

It is important to note that discrepancies may exist between different data sources due to variations in measurement methods or updates in geographic information. The land area of the province of La Union is 149,309 hectares as per the record of the Department of Environment and Natural Resources. But, based on the data generated by the National Mapping and Resource Information Authority (NAMRIA) report, La Union has a total land area of 145,481.77 hectares which constitutes 11.33% of the region's total land area of 1,284,019 hectares and approximately 0.48% of the entire country's land area. Among the Ilocos provinces, La Union is the smallest in terms of land area. (See Table 1)

District I encompass 73,842.38 hectares, making up 46.93% of the province's total area and 5.75% of the region's area. San Gabriel holds the largest share with 16,473.31 hectares, followed closely by San Fernando City with 12,425.76 hectares, while Bangar has the smallest area at about 3.34%.

The Second District covers 71,639.39 hectares, representing 53.07% of La Union's area and 5.58% of the region. Aringay boasts the largest area with 10,917.60 hectares, followed by Naguilian with 8,590.80 hectares, while Agoo has the smallest at 3,523.36 hectares. Refer to Table 1 for detailed information.

Figure 1. Map of La Union



3. Political Subdivisions

3.1 District/Municipalities/City and Barangays of La Union

La Union ranks second lowest among the provinces in the region in terms of the number of municipalities and barangays. It governs one city and 19 municipalities, comprising 16.39% of the region's total, and oversees 576 barangays, which account for 17.76% of the region's total.

The First District encompasses the northern towns of Sudipen, Bangar, Luna, Balaoan, Santol, San Gabriel, Bacnotan, San Juan, and San Fernando City. Meanwhile, the Second District includes the towns of Bagulin, Naguilian, Burgos, Caba, Bauang, Aringay, Agoo, Tubao, Rosario, Pugo, and Sto. Tomas.

La Union has developed five Agri-tourism circuits, strategically grouping LGUs based on geography, current assets, and interdependence to enhance agri-tourism development. These circuits—Northern, Central, Central Eastern, Southern, and Southern Eastern—are designed to offer a variety of agricultural and tourism products, activities, and sites. Each development circuit is designed to achieve comprehensive growth, bolstered by essential support services and amenities that meet the needs of the community. This initiative plays a vital role in La Union's overarching goal of fostering unity among its various municipalities, encapsulated in the motto “La Union: Agkaysa,” which signifies the importance of collaboration with its local government units (LGUs). By embracing this vision, we aim to promote sustainable economic growth that not only enhances the quality of life for all residents but also ensures long-term prosperity and resilience for the province of La Union as a whole. Through cooperative efforts and strategic planning, we can create a thriving environment that empowers individuals and strengthens local economies.

4. Language/Dialects

Based on the 2020 Census of Population, a total of 82.07% of the household population in La Union use Iloko/Ilocano as their primary medium of communication. Additionally, 5.18% use Kankanai/Kankaney/Kankanaey, 3.01% use Bago, and 1.47% use Tagalog. The remaining 8.27% speak other ethnic vernacular languages.

Residents of coastal barangays in Sto. Tomas and Rosario also speak Pangasinense, while ethnic communities bordering the Cordilleras communicate in Ibaloi or Kankanaey. Filipino and English continue to serve as the primary languages of instruction in schools. (See Table 36-36a)

5. Religious Sects

La Union, with its population of 820,343 households, embraces a diversity of religious affiliations across 129 different denominations. As of CY 2020, the majority of La Union's residents are Roman Catholic, constituting 84.82% of the total household population. Following prominently is Iglesia Ni Cristo, with 2.84% of the population, totaling 23,374 members. (See Table 13-13c)

6. Ethnic Groups

As of CY 2020, La Union recorded a total of 89,120 Indigenous People (IP) spread across almost all municipalities, except Bangar and Luna. Among these communities, Bagulin in District II has the largest concentration, comprising 15.20% of the IP population. Within Bagulin, 93.89% of the municipality's residents belong to the IP community. (See Table 17-17a)

7. Citizenship

Aside from Filipino citizens residing in La Union, there are also residents from various other nationalities: 548 are American, 352 are Indian, 196 are Chinese, and 194 are Canadian. Additionally, residents are holding dual citizenship: 434 are American, 183 are Canadian, 56 are Australian, and 42 are German. The remaining residents hold citizenships from various other countries. (See Table 39)

8. Marital Status

Based on the Census of Population 2020, the married household population among individuals aged 10 and over decreased to 41.26%, a significant drop from the 42.46% recorded in 2015. Conversely, the number of single individuals decreased to 37.73% in 2020 from 41.56% in 2015, demonstrating a consistent trend of declining singlehood. Notably, the percentage of widows also decreased from 5.52% in 2015 to 5.47% in 2020. In contrast, the number of individuals with other arrangements (such as divorced/separated, common law/live-in, and unknown) increased from 10.46% in 2015 to 15.54% in 2020. (See Table 27)

Breaking down the data by gender, approximately 20.79% of males were single, while 20.72% were married, 1.22% were widowers, and 7.6% fell under other categories. For females, the married category accounted for 16.94%, while single females made up 20.55%, widows accounted for 4.24%, and those with other arrangements accounted for 7.94%. Interestingly, the percentage of single females decreased from 21.32% in 1995 to 20.71% in 2000.

Figure 2. Marital Status of Population 10 Years Old and Above by Sex in La Union: 2020

	Single	Married	Common Law/Live in	Widowed	Divorced Separated	Unknown
Male	141,750	141,225	45,928	8,340	5,898	13
Female	115,481	140,085	45,490	28,919	8,622	23
TOTAL	257231	281310	91418	37259	14520	36

Both males and females exhibited a decline in married and single status between 2015 and 2020, while the number of widows and those with other arrangements increased during the same period.

CHAPTER II - ENVIRONMENT AND NATURAL RESOURCES

A. Topography and Climate

1. Topography

The province features predominantly hilly terrain that ascends gradually from its western coastal plain, composed of raised coral alluvium (sand/clay) deposited by water flow over older sediment layers. The irregular coastal plain is narrowest in the south near Damortis in Sto. Tomas, widening considerably in the north, especially around Balaoan, extending nearly 15 kilometers inland from the China Sea.

Moving eastward, the landscape transitions into predominantly mountainous terrain, although with lower elevations compared to the Cordillera Mountain ranges in Benguet and Mountain Province, arranged linearly from north to south. The highest peak in La Union is found in Bagulin, reaching 1,200 feet above sea level. Other areas with an elevation of more than 800 feet are found in San Gabriel and Burgos.

The total land area of the province is 149,309 hectares, accounting for 11.6% of the regional area of 1,284,019 hectares. District II encompasses more than half of this total area (53%). Certified Alienable and Disposable (A & D) lands in the province cover 105,104 hectares, comprising 12.97% of the regional total of 810,062 hectares. This proportion (70.39%) exceeds that of the region by seven percentage points (63.09%). Public forestlands constitute a smaller portion, covering 44,205 hectares or 29.61% of the province's land area

2. Climate and Weather

The province has two (2) distinct seasons: the wet season, which is characterized by abundant rainfall brought about by the southwest monsoon, and the dry season, which is characterized by the strikingly low rainfall due to the passing of the northeast monsoon over the Cordillera Mountains.

The low rainfall during the dry season, which lasts from November to April, is primarily due to the effective shielding of La Union from northwest winds and trade winds by the mountain ranges of Northern Luzon. However, as soon as the winds from the southwest arrive in May, there is a noticeable increase in rainfall, as La Union is no longer protected from the west. This increase in precipitation is often accompanied by depressions and typhoons that frequently occur in the region, along with the wet southeast monsoon or moist equatorial air coming from the China Sea.

B. Land Cover

La Union’s landscape is mainly covered by brush/shrubland with an area of 69,420.94, which accounts for about 47.72% of the total land area of the province. Agricultural or Annual Crop constitutes a percentage of 32.93 or an area of 47,913.09. An area devoted to perennial crops is 1,614.33 hectares, while grassland covers about 1,779.38 hectares, and Open/Barren is 2,264.18 and Open Forest areas encompass approximately 8,191.48 hectares.

Water bodies include Inland Waters (2,098.83hectares) and Fishpond (1,117.86) that constitute smaller proportions of the land use and a limited area for mangrove (123.82); Urban development, particularly Built Up, shared a percentage of 6.65 or 9,667.49 hectares, and additionally, unclassified lands cover roughly 1,290.37 hectares. (See Table 2)

C. Land Use

1. Grassland/Shrubland Areas

This category is predominantly covered with cogon and different species of shrubs within an area of 69,420.94 hectares or 47.72 percent of the total land area. Grasses and shrubs cover mostly the sedimentary hills and mountains, except on higher elevations having steep to very steep slopes.

2. Agricultural Areas

Agricultural areas cover 47,913.09 hectares or 32.93 percent of the total area. The western side is under broad alluvial plains, valleys, and along the hills and mountain falls under this category. The eastern part, covering the municipalities of Bagulin, Naguilian, and Rosario, is the rice terraces. Irrigated rice exists in the low-lying areas of Bangar, Balaoan, Agoo, and Rosario, while non-irrigated rice is seen on the flat alluvial plain, valley, and river terrace within the different municipalities.

3. Perennial Crop

The area devoted to perennial crops is 1,614.33 hectares, planted with crops that live and can produce a harvest for more than two years without the need for annual replanting. In La Union, prominent perennial crops include mangoes, bananas, and kalamansi. Among these, Mangoes are a dominant permanent crop in the province, with a significant number of trees planted.

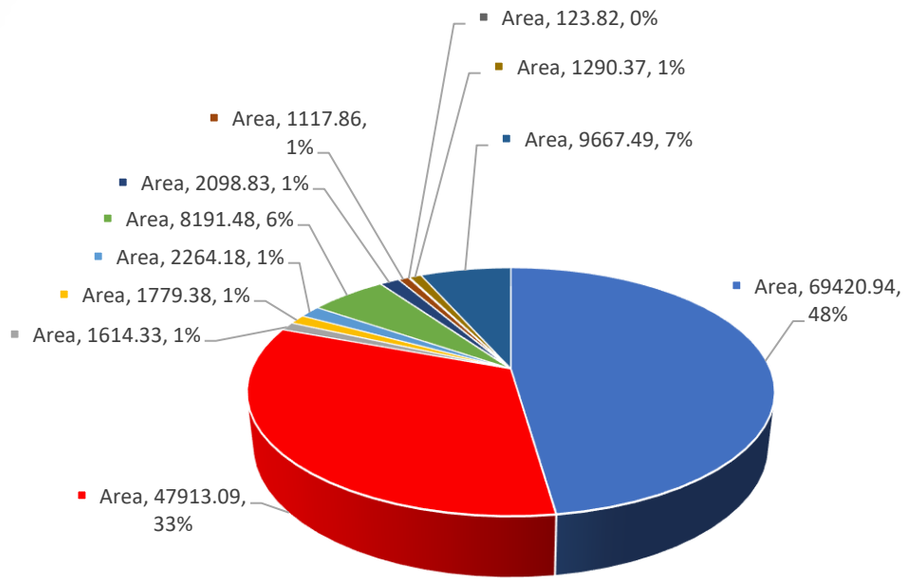
4. Grassland

The province has a variety of land cover types, including grasslands, especially in steep/ hilly and mountainous areas, alongside various other land cover types. These grasslands are often found with other types of vegetation like scrublands, wetlands, and secondary forest growth, covering about 1,779.38 hectares

5. Open/Barren

The open and barren areas in the province cover a total of 2,264.18 hectares. These areas are experiencing higher temperatures and soil erosion, making them unsuitable for agricultural use.

Figure 3. Land Cover Distribution in La Union:2020



6. Open Forest Areas

This area occupies 8,191.48 hectares or 31.21 percent of the total land area. It is covered with different forest species at the highest portion of mountain ranges near the boundary of Ilocos Sur and Benguet province, particularly areas in the municipalities of Sudipen, San Gabriel, and Burgos.

7. Water Bodies

This covering includes Inland Waters (2,098.83hectares) and Fishpond - 1,117.86) that constitute smaller proportions of the land use and a limited area for mangrove (123.82 hectares);

8. Built-Up Areas

These areas are classified as residential, commercial, institutional, and industrial parks and recreation centers. These areas occupy 9,667.49 hectares or 6.65 percent of the total area. It is observed that built-up areas are located mostly along the provincial road network. Settlement continued to arise in patches within protected areas. The increase in population and the proposed development in the area are attributed to the expansion of settlement, industrial, and commercial activities in the province.

9. Unclassified

These unclassified areas primarily consist of beach sand, river wash of prominent rivers, and zones designated for aquaculture, either brackish or freshwater. It covers an area of approximately 1,290.37 hectares.

D. Slope

The province's terrain is primarily characterized by five categories: the 0-3% and 3-8% slopes, 8-18% 18-30%, 30-50%, and >50%. The category with the highest total area is 18-30% slope (32,504.73 ha), followed closely by 30-50% slope (24,887.81 ha) and >50% slope (24,548.52 ha).

The areas with lower slopes (0-3%, 3-8%, and 8-18%) are significantly smaller in total area compared to the steeper slopes. This indicates that a considerable portion of La Union's land is hilly or mountainous.

The Northern Tourism Circuit has the most land in steep slopes (18-30%, 30-50%, >50%), primarily due to Santol and Sudipen. The Central Tourism Circuit has a more balanced slope distribution, though still with significant areas in steeper slopes (18-30%, 30-50%). The Central East Cluster is overwhelmingly dominated by steep slopes (30-50%, > 50). Similar to this cluster, the Southern Tourism Circuit has a significant amount of land in the steeper slopes, but also has a notable area on the lower slopes. while the Southeastern Tourism Circuit also shows a strong presence of steeper slopes. Pugo and Tubao contribute significantly to the 30-50% and >50% categories.

In terms of Municipalities, Bangar, Luna, and San Fernando City have the largest areas in the 0-3% slope category. These areas are relatively flat, which makes them suitable for agriculture and urban development. San Gabriel has the largest area in the >50% slope category, closely followed by Santol (3,545.88 has), Bagulin (3,320.69 has), Burgos (1,698.15 has), and Aringay (1,698.38 has). This indicates that these municipalities are predominantly mountainous and may present challenges for certain types of development or land use. (See Table 3)

E. Land Classification

Based on the National Mapping and Resource Information Authority (NAMRIA) report, La Union has a total land area of 145,481.77 hectares, wherein 112,738.60 or 77.5% of the total land area is classified as Alienable and Disposable, and the remaining areas are classified as forest land (32,743.17 or 22.5%).

District I show a significantly larger area of alienable and disposable land (58,472.28 hectares) compared to District II (54,266.32). Conversely, District I's Forest land (15,370.10 hectares) is slightly smaller than District II's (17,373.07 hectares).

It can be noted that Balaoan, Bangar, and Luna, under the Northern Tourism Circuit, do not have any land classified as Forest Land. Among the municipalities and city, San Gabriel has the largest forest land area, covering 7,809.72 hectares. Conversely, the City of San Fernando has the greatest extent of alienable and disposable land, totaling 10,760.06 hectares. This distribution highlights differences in land use and natural resource allocation across the province. (See Table 4)

F. Soil

The soils of La Union are divided into three (3) physiographic groups, namely (a) soils of the plain and undulating areas, (b) soils of the rolling areas, steep hills and mountains, and (c) miscellaneous land types as indicated.

1. Soils of the Plain and Undulating Areas

The soil of this group includes those located along plains, the valleys in the interior, and the undulating areas of the lower upland. The staple and money crops are grown on this soil. Of the total area of the province, 33,053 hectares or 22.14 percent belong to this group of soil, which is devoted mainly to rice, corn, and tobacco

2. Soils of the Rolling Areas, Steep Hills, and Mountains

They occupy an area of 112,362 hectares, which is equivalent to 72.25 percent of the total land area. They developed from the weathering of various rocks such as conglomerates, shale, high lime shale, coral lime, limestone, basalt, and andesite. The general properties of these soils are closely related to the character of the soil material weathered from underlying rocks. Based on their natural productivity, the planted crops are upland palay, corn, camote, and cassava.

3. Soils of the Miscellaneous Land Types

These land types have little or no definite soil characteristics. They are composed of hydrosol, beach sand, gravel deposits, and river wash. They constitute the remaining 2.61 percent of the province's total land area.

G. Forestry

1. Watershed and River System

The province is characterized by several river systems. The major ones are Lower Amburayan in Sudipen and the Baroro River in Bacnotan of the 1st district as well as the Bauang and Aringay rivers of the 2nd district. Aside from these, creeks, lakes, and streams dissect every municipality, contributing to the ecological and hydrological landscape of La Union, including other identified watersheds.

Areas of other watersheds ranged from less than 100 hectares to over 20,000 hectares, highlighting the diversity and distribution of water resource management across the province.

Watershed areas are also rich with springs, especially in areas with thick vegetation cover, which play a vital role in maintaining water sources. Water systems in the province are heavily silted primarily due to erosion caused by forest denudation. Deforestation practices persistently occur in upland and forested areas and severely compromise watershed areas. This, in turn, leads to riverbank erosion and silting of water systems, especially during the rainy and typhoon seasons.

In terms of Municipalities and the extent of land area covered within each watershed is as follows:

- Amburayan River covers four (4) municipalities with a total of 13,469.89 hectares;
- Aringay River Watershed covers ten (10) municipalities with a total area of 18,661.43 hectares.

- Baroro River covers six (6) with a total of 19,406.72 hectares.
- Bauang River covers the five (5) municipalities with a total area of 21,238.66 hectares.
- Bued River Watershed covers four (4) municipalities with a total area of 6,210.15 hectares.
- Busilac River watershed covers six (6) municipalities with a total area of 12,468.43 hectares.
- Caba River Watershed covers three (3) municipalities with a total of 2,111.96 hectares.
- Carmay Watershed covers two (2) municipalities with a total area of 1,496.62 hectares.
- Cupang River Watershed, two (2) municipalities with a total area of 1,200.24 hectares.
- Darigayos River Watershed covers four (4) municipalities with a total area of 6,080.56 hectares.
- Dulao Watershed covers two municipalities with a total area of 1,249.44 hectares;
  Gamot Watershed covers one (1) municipality with a total area of 905.65 hectares.
- Gatay River covers two (2) municipalities with a total of 1,271.27 hectares.
- Maragayap River covers four (4) municipalities with a total area of 6,258.40 hectares.
- Pidig Watershed covers four (4) municipalities with a total of 2,958.01 hectares.
- Sto. Tomas Town Watershed covers three (3) municipalities with a total area of 3,317.88 hectares.
- Talagtag Watershed covers three (3) municipalities with a total area of 1,156.67 hectares.
- Tanqui Watershed covers two (2) municipalities with a total area of 2,736.71 hectares.

Some watersheds extend beyond La Union, covering areas outside the province; however, the specific areas outside La Union are not identified in the available data. (See Table 5-5a)

There were four identified watersheds in La Union—comprising the Aringay River Basin, Naguilian River Basin, Baroro Watershed, and Lower Amburayan supporting the National Irrigation Administration Irrigation System in La Union. These watersheds encompass multiple municipalities and feature a range of environmental projects such as reforestation, agroforestry, mangrove rehabilitation, watershed reserve management, and social forestry programs. The consistent progress across all watersheds reflects strong coordination and commitment toward sustainable watershed management, environmental restoration, and community involvement, ultimately supporting ecological health and water resource sustainability in the province. (See Table 6)

2. Mineral Resources

The province's mineral resources are largely non-metallic types consisting of pebbles found in Luna. Active extraction of non-metallic minerals, especially sand, gravel, and boulders, across various municipalities and districts in La Union. These activities are likely driven by construction and infrastructure needs. Municipalities of Sudipen, Rosario, Naguilian, and Bauang are the most significant contributors to mineral volume, being the primary zones of extraction.

H. Marine Protected Areas

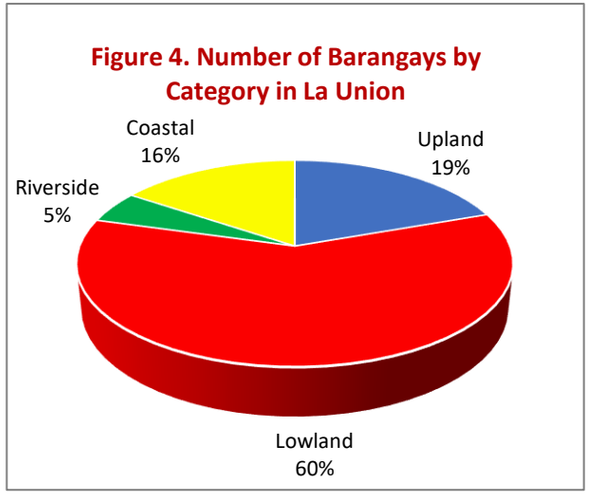
Marine Protected Areas and Fish Sanctuaries across La Union are established mainly through municipal ordinances to protect habitats such as coral reefs, mangroves, artificial reefs, and turtle habitats. Sizes vary from small (5 ha) to large (over 150 ha), with some areas also recognized under the national NIPAS system. These efforts reflect an active commitment to conserving marine and coastal ecosystems in the region. (See Table 7)

Three protected areas within La Union are recognized under the National Integrated Protected Areas System (NIPAS). The Agoo-Damortis Protected Landscape and Seascape, covering 10,774.68 hectares, is legislated and includes the municipalities of Agoo, Sto. Tomas, and Rosario. The Naguilian Watershed Forest Reserve, with an area of 90 hectares, is classified as an initial component and is located in Naguilian. In addition to this, the Marcos Highway Watershed Forest Reserve spans 15,038 hectares and encompasses multiple municipalities including Agoo, Tubao, Rosario, Pugo, Santo Tomas, and Aringay; it is also designated as an initial component. These protected areas demonstrate ongoing efforts to conserve key ecosystems in the region/province, with legal statuses varying from legislation to initial component recognition under national protection policies. (See Table 8)

I. Coastal Area

The Barangays in La Union are categorized into four: Coastal, Lowland, Riversides, and Upland. Out of 576 barangays, 344 are located in the lowland areas, 113 in the upland, 90 in the coastal areas, and 29 are identified in the riversides of Bacnotan and Bangar. (See Table 9)

In terms of municipalities, each district has 6 coastal municipalities (District I – Balaoan, Bangar, Luna, Bacnotan, San Fernando, and San Juan; District II – Bauang, Agoo, Aringay, Caba, Sto. Tomas, and Rosario)



J. Shoreline

The province's coastline, encompassing 12 coastal municipalities, extends for a total of 122.03 kilometers. This shoreline is distributed unevenly across the municipalities. District II, in particular, exhibits a significant variation in shoreline length. The Municipality of Sto. Tomas boasts the longest stretch, measuring 20.372 kilometers. In contrast, the Municipality of Rosario, also within District II, has the shortest recorded shoreline, a mere 4.08 kilometers. This substantial difference in shoreline length between these municipalities likely reflects variations in topography, geographic features, and historical land use patterns along the coast. (See Table 9)

K. Land Conversion

Based on the report of the Department of Agrarian Reform Provincial Office, the application for reclassification of land continuously increases from CY 2022-2024. The majority of the conversions are situated in District II. For CY 2022, there were 14 applications approved converting a total area of 4.57790 hectares. In 2023, the number

of applications increased to 19, with 15 approved, resulting in a total converted area of 5.1093 hectares. A significant increase in applications was observed in 2024, with 28 applications submitted, 25 were approved, resulting in the conversion of approximately 6.2528 hectares. The upward trend in application submissions reflects a growing interest in land reclassification due to urbanization and declining agricultural productivity, while the approved application also reflects an increasing trend due to improved processing of the conversion of land. (See Table 11 & 13)

L. Sanitary Landfill

All 19 municipalities in La Union operate their sanitary landfills, classified as Category I, which can accommodate up to 15 tons of waste per day. In contrast, the landfill in the City of San Fernando falls under Category II, capable of handling more than 15 tons but less than 75 tons of residual waste daily (see Table 53). Material Recovery Facilities (MRFs) play a crucial role in waste management by reducing the amount of waste sent to landfills; they receive, separate, and prepare recyclable materials for reuse. The total number of MRFs increased from 1,627 in 2022 to 1,719 in 2023, reflecting ongoing efforts to improve waste segregation and recycling. However, in 2024, the number slightly declined to 1,515 due to wear and tear of existing facilities, highlighting the need for regular maintenance and timely upgrades. This trend underscores the importance of investing in infrastructure maintenance to sustain operational efficiency and maximize the capacity of waste management systems (See Table 17).

Table of Contents

Table Number	Particulars	Page Number
1	Land Area, Number of Barangays and Area by Tourism Circuit, and by District/Municipality/City in La Union	14
2	Existing Land Cover Distribution, by Categories, by Municipality/City in La Union:2020	15
3	Slope Classification and Area, by Tourism Circuit, and by District/Municipality/City in La Union	16
4	Land Classification and Area, by Tourism Circuit, and by District/Municipality/City in La Union	17
5-5a	La Union Watersheds by Municipalities Covered and Corresponding Area in Hectares	18-19
6	Watershed Areas Supporting NIA Irrigation System (NIS)in La Union: 2024	20
7	Locally-Managed Marine Protected Areas (MPAs) by Municipality/City in La Union: 2024	21
8	Protected Areas within La Union under National Integrated Protected Areas System (NIPAS) in La Union: 2024	22
9	Number of Upland, Lowland, Coastal and Riverside Barangay and Kilometerage of Shoreline by Tourism Circuit and by District/Municipality/City of La Union	23
10	Registered Electronic Titles (e-Titles) for the Support to Parcellation of Lands for Individual Titling (SPLIT) Project by Tourism Circuit and by District/Municipality/City in La Union: 2024	24
11	Number of Approved Application for Land Conversionand Total Area Converted , by Tourism Circuit and by District/Municipality/City in La Union: 2022-2024	25
12	Membership Classifications in Organizations Formed/involved in Agrarian reform Communities by Tourism Circuit, and by District/Municipality/City in La Union: 2024	26
13	Monitoring of Compliance to Granted Conversion, by Tourism Circuit and by District/Municipality/City in La Union: 2022-2024	27
14	Temperature by Level and by Month and by Station: 2021-2022	28
15	Volume of Non Metallic Minerals by Tourism Circuit, and by District/Municipality/City in La Union: 2024	29
16	Number and Barangay Location of Quarrying Areas, by Tourism Circuit, and by District/Municipality/City in La Union: 2024	30
17	Number of Material Recovery Facility by Tourism Circuit, and by District/Municipality/City in La Union: 2022-2024	31
18	Sanitary Landfill by Category, by Tourism Circuit, and by District/Municipality/City in La Union: 2022-2024	32
19	Annual Waste (Manure) of Animals by Type , by Tourism Circuit and by District/municipality/City in La Union: 2024	33

CHAPTER III – SOCIAL DEVELOPMENT (MACRO)

A. Population

1. Population Growth Trends

Figure 5. Population in La Union, Region I and Philippines: 2010-2015-2020

	2010	2015	2020
La Union	720,972	786,653	822,352
Region I	4,748,372	5,026,128	5,301,139
Philippines	92,337,852	100,981,437	109,035,343

According to the latest 2020 Census of Population and Housing, La Union's total population reached 822,352 persons, contributing 15.51% to Region I and 0.75% in the entire Philippines. This marks an increase of 35,699 individuals from the population of 786,653 recorded in 2015 which is nearly half of the 65,681 recorded between 2010 and 2015. The slowdown in population growth during this period may indicate changes in demographic trends, migration patterns, or other socio-economic factors affecting the province.

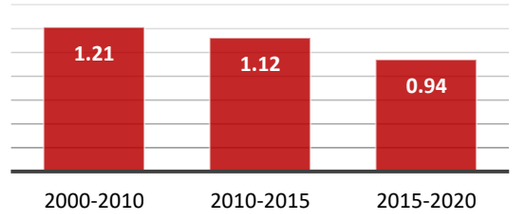
District I accounts for 376,529 residents, constituting 45.79% of the total population, while District II holds a larger share with 445,823 residents; both districts collectively have the smallest percentage share of the population. Refer to Table 1 for detailed statistics. (See Table 2)

2. Population, Growth Rate, and Doubling Time

From 2000 to 2010, the annual population growth rate (PGR) showed consistent improvement. This trend continued between 2010 and 2015, as well as from 2015 to 2020, with decreasing growth rates of 1.21, 1.12, and 0.94, respectively. This decline in growth rate was observed across various municipalities, including the City of San Fernando. Notably, Pugo and Naguilian experienced negative growth rates from 2015 to 2020. This drop can be attributed to residents who work in nearby provinces as they were not counted as residents of these municipalities because they did not meet the residency requirement of returning home at least once a week. (See Table 3)

The province's population is projected to double in approximately 74 years, by the year 2094. However, there are significant variations within the province: for instance, an upland municipality in District I, Santol, and Burgos in District II are expected to double their populations in much shorter timespans of 24 and 29 years, respectively. In contrast, Sudipen in District I face a much slower growth trajectory, requiring 428 years to double its population.

Figure 6. Annual Growth Rate in La Union 2000-2010-2015-2020



Source of data: Philippine Statistics Authority

3. Migration

La Union's coastal areas and beaches have become magnets for migrants seeking to capitalize on the promising tourism industry in the region. The influx of tourists and investments in tourism has not only boosted the local economy but also created numerous job opportunities in hospitality, services, and related sectors. This economic growth has been a significant driver of internal migration into the province, evidenced by the rapid expansion of industries.

4. Population Density

The province of La Union, encompassing approximately 145,481.77 hectares of land, has a population density of 565 persons per sq.km. District I enjoys a slightly lower population density at 487 persons per sq km, while District II is slightly denser at 596 persons per sq km.

The City of San Fernando, located in District I, exhibits the highest population density in the province at 1,288 persons per hectare, closely followed by Agoo in District II at 1,286 persons per hectare. In contrast, Bagulin in District II and San Gabriel in District I have the lowest population densities, with figures of 98 and 122 persons per hectare, respectively.

These figures highlight varying population distributions across La Union's districts and municipalities, reflecting different levels of urbanization and development within the province. (See Table 4

5. Urban-Rural Distribution

5.1 Level of Urbanization

As of the 2020 census, the total population of La Union is 822,352, with 21.06% residing in urban areas and 78.94% in rural areas. The trend is observed in the distribution of population across municipalities. In District I, 100% of the population in five municipalities - Bangar, Luna, Santol, Sudipen, and San Gabriel - reside in rural areas. Similarly, in District II, three municipalities - Bagulin, Burgos, and Pugo - are entirely rural. (See Table 5)

In contrast, San Fernando City exhibits a higher level of urbanization, with 53 urban residents for every 100 residents.

5.2 Tempo of Urbanization

The level of urbanization in La Union has increased steadily over the years. In 2020, the proportion of the total population living in urban barangays reached 21.10%, which is 1.8 percentage points higher than the 19.3% level of urbanization in 2015. This trend indicates a growing urbanization rate in the province.

Some rural areas have transformed into urban barangays over the past five years. In Balaoan, Barangay Osias is now classified as an urban area, while Patac in Sto. Tomas and Lloren and Poblacion in Tubao have also transitioned from rural to urban status. (Please see Table 24)

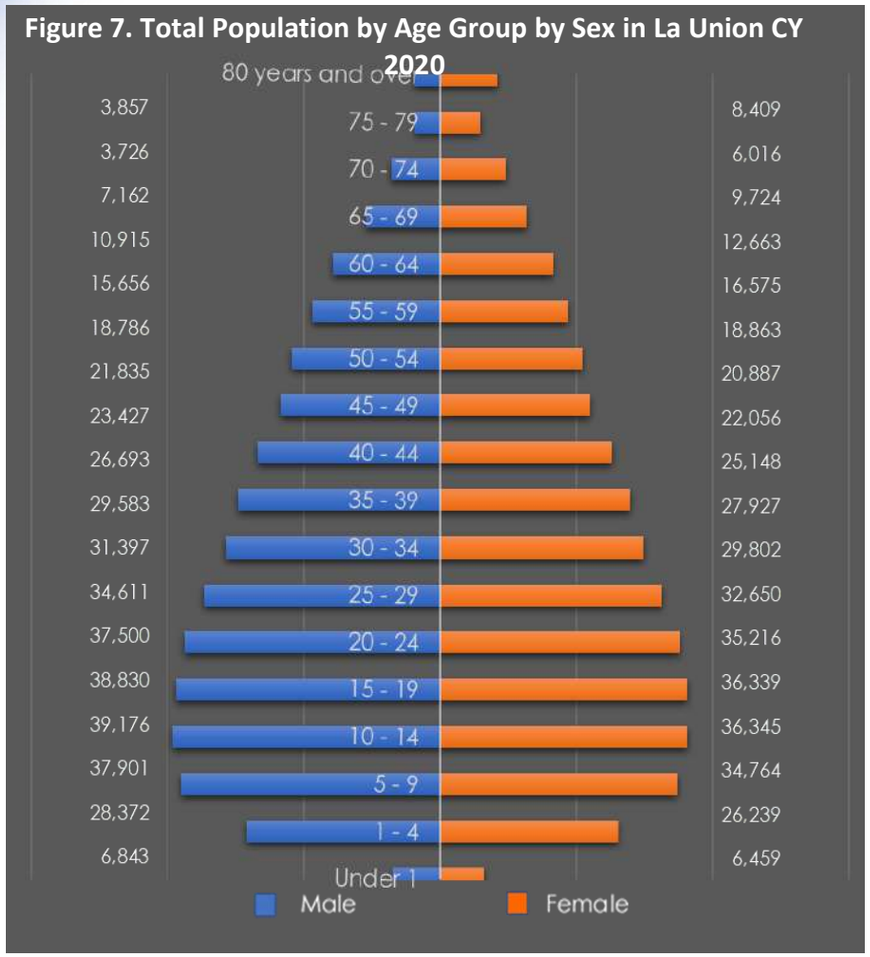
Among the 19 municipalities and 1 city in La Union, four municipalities and one city have registered a higher level of urbanization compared to the provincial average (21.21%) in 2020. The City of San Fernando leads the list with an impressive 53.15% urbanization rate, followed by Bauang at 45.85%, San Juan at 26.82%, Rosario at 26.74%, and Bacnotan at 21.76%.

6. Age-Sex Structure

6.1 Age Sex Ratio

The sex ratio in La Union was calculated at 102 in 2020. This means that there were 102 males for every 100 females. Data reveals that the sex ratio of children aged below 15 years is 108 males per 100 females, while those aged 15 to 64 years had a sex ratio of 105 males per 100 females. Moreover, among those aged 65 years and over, the sex ratio dropped to 70 males per 100 females. This depicts a longer life expectancy among females than males or a higher mortality among males than females in the older age groups. (See Table 25-25a)

Males outnumbered the females in District I, resulting in the evinced sex ratio of 102, Males (50.41%) and females (49.59%). The same picture in District II with a ratio of 103 males (50.70%) and females (49.30%). Across all municipalities in both Districts, only the City of San Fernando had females slightly outnumbering the males, with a percentage of 49.91% males vs 50.09% females.



6.2 Age Dependency Ratio

The dependency ratio is a measure of the number of dependents aged zero to 14 and over the age of 65, compared with the total population aged 15 to 64.

For the province of La Union, 66.06% percent of the total Household population comprised the economically active population aged 15 to 64 years. Population aged 0 to 14 years constituted 216,040 or 26.34 percent of the total population while those 65 years and over made-up 7.60 percent or 62,395. The overall dependency ratio in 2020 was 51 dependents breakdown to 39 youth and 12 old dependents for every 100 of the working population.

7. Household Population and Household Size

7.1 Household Distribution

Based on the 2020 Census of Population and Housing, the province of La Union had a total population of 822,352 persons. Of this total, the household population comprised 99.8 percent or 820,343 persons.

Of the total household population of La Union in 2020, 50.74 percent are males (416,270) while 49.26 percent are females (406,802). In terms of age group, 216,040 (26.34%) were under 15 years of age (young dependents). On the other hand, persons aged 15 to 64 years (working age or economically active population) totaled 541,908 (66.06%) while those in age groups 65 years and over (old dependents) comprised the remaining 62,395 (7.60%). There were more males (51.57%) than females (48.43%) in the 0 to 54 age group. On the other hand, among the older age group (55 years and over), females (54.60%) outnumbered males (45.40%).

People aged 60 years old and over, regarded as senior citizens in the Philippines, made up 11.52 percent (94,566) of the household population of La Union in 2020. There were more females (56.37%) than males (43.63%) among the senior citizens of the province in 2020.

7.2 Household Size

Out of the total Household Population of 820,343 in La Union, there were 205,034 households, reflecting an average of 4 household members per household.

The average number of households in the twelve municipalities (Bangar, Santol, Sudipen, San Gabriel, San Juan in District I, and Bagulin, Burgos, Naguilian, Agoo, Aringay, Rosario, and Tubao in District II) shows a higher average number of households, while the remaining six municipalities (Balaoan, Luna, Bacnotan in District I, and Bauang, Caba, Santo Tomas, and Pugo in District II), plus the City of San Fernando, recorded a lower average number of households compared to the provincial level.

8. Labor Force and Employment

8.1 Labor Force

The total population of the labor force in La Union was estimated to be 339,100. This represents a significant proportion of the regional labor force population, accounting for 14.89%. Moreover, La Union's labor force population constitutes only 0.72% of the total labor force in the Philippines, highlighting its importance as a contributor to the national economy.

8.2 Labor Force Participation Rate

The Labor Force Participation Rate is the proportion of the population from 15 years old and over actively seeking work. The total population in the labor force in 2020 to 2021 increased from 362,600 to 381,250 and decreased to 369,970 in 2022, which reflected a labor participation rate of 62.70, 65.00, and 62.07 percent, respectively.

8.3 Employment Rate

In terms of Employment Rates, the province of La Union recorded a significant increase of 3.53 points from 85.70 to 89.23 in 2020-2021 and then further increased to 91.66% in 2022. Similarly, the Unemployment Rate is observed with an improvement rate from 14.30 to 10.77 in 2020-2021 and continuously improved to 8.34 in 2022, thus reflecting a decrease of 5.96 points from the initial year to the final year.

8.4 Underemployment Rate

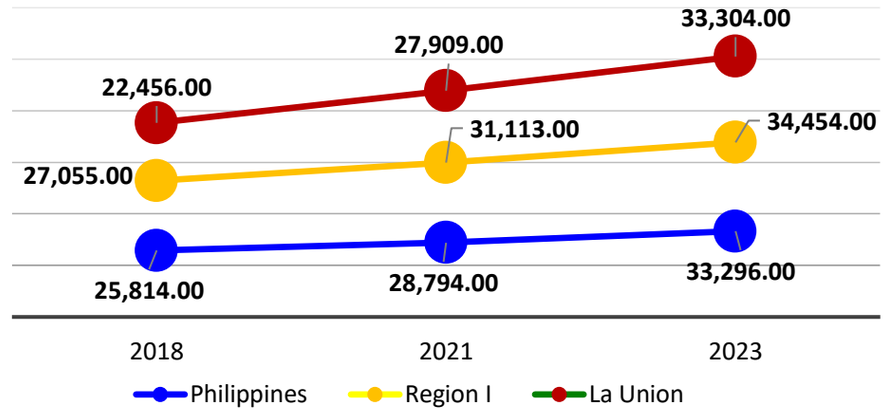
As to the underemployment rate, the percentage of 25.80 in 2020 decreased by 11.67 points in 2021 and slightly decreased again from 14.13 to 13.75 in 2021-2022. This implies that those who are employed still believe themselves to be underemployed and want to have additional jobs particularly those construction workers whose work is seasonal and temporary in nature.

9. Poverty and Income

9.1 Poverty Threshold

The poverty threshold in La Union continuously increased from 22,456.00 in 2018 to 27,909.00 in 2021 and further increased to 33,304.00 in 2023. This is the minimum income needed for a family or individual to meet their basic food and non-food requirements. The same trend is observed at the regional and national levels.

Figure 8. Poverty Threshold in La Union, Region I and Philippines 2018-2021-2023



Source of Data: 2023 PSA Full Year Official Poverty Statistics

The poverty threshold in La Union and Region I is higher than the national average, indicating that the province and the region may be more economically developed than others. This could also indicate that La Union has made more progress in addressing poverty compared to the national average.

9.2 Average Family Income

Based on the Philippine Statistics Authority, 2018-2021-2023 Family Income and Expenditure Survey, this shows a general increase in income and expenditures in the Philippines, Region I, and the province of La Union, reflecting economic growth. However, the survey also reveals disparities in family income and expenditure levels. For the year 2023, the province of La Union had an average annual income of roughly PhP393,220.00 and expenditure of around PhP259,350.00, resulting in a savings of about 133,870.00 (See Table - 52)

9.3 Poverty Incidence and Magnitude of Poor

Poverty Incidence among families and the population

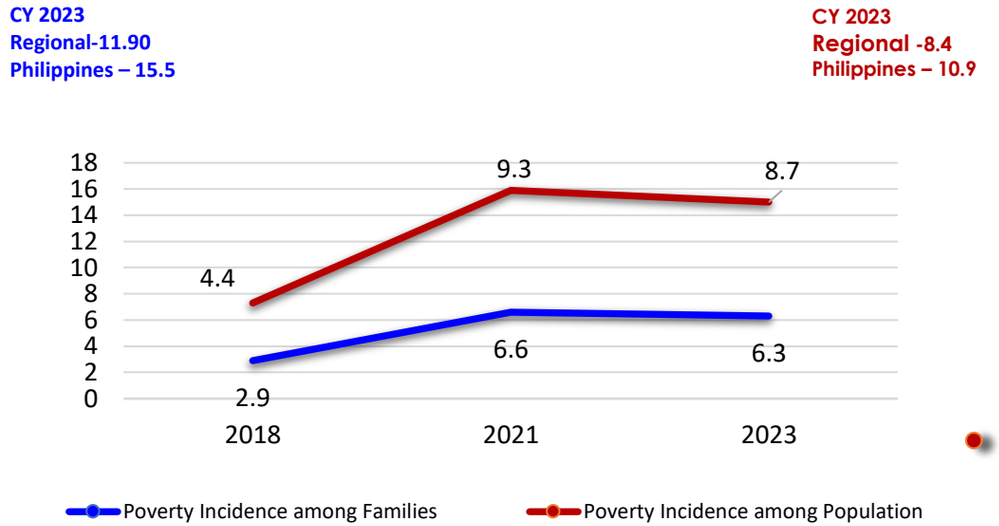
a.1 Provincial Level

Poverty incidence among families in La Union exhibited a significant increase of 4.9 percentage points from 2.90% in 2018 to 6.60 in 2021, followed by a slight improvement to 6.3% in 2023. La Union's poverty incidence rate remains lower than the regional and national levels, with rates of 8.40% and 10.90%, respectively. The same picture was observed in the poverty incidence among the population.

a.2 Municipal Level

Based on the Philippine Statistics Authority project on the generation of the small area estimates of poverty, the Poverty Incidence Rate has generally increased across all municipalities, including the City of San Fernando, from 2018 to 2021. In CY 2021, the Highest Poverty incidence Rate was recorded in Santol, La Union, at 16.9% while the City of San Fernando registered the lowest poverty incidence rate of 5.1% (See Table 54)

Figure 9. Poverty Incidence Among Families and Among Population in La Union:2018-2021-2023



Source of Data: 2023 PSA Full Year Official Poverty Statistics

Figure 10. Poverty Incidence by Municipality/City in La Union:2018 and 2021

	Balaoan	Banga	Luna	Santol	Sudipen	Bacnotan	San Fdo. City	San Gabriel	San Juan	Bagulin	Bauang	Burgos	Naguilian	Agoo	Aringay	Caba	Sto.Tomas	Pugo	Rosario	Tubao

2021	9.5	10.0	8.7	16.9	11.3	6.5	5.1	13.5	7.3	16.2	7.5	10.7	9.0	8.7	10.7	10.5	10.5	10.0	10.7	10.8

a. Magnitude of Poor Families and Poor Population

The magnitude of Poor Families in La Union shows an improvement from 13,360 in 2021 to 13,150 in 2023. This reflects that 210 families in La Union are being pulled out of poverty, equivalent to a reduction of 3,130 individuals in the poor population.

Overall, poverty incidence and magnitude significantly doubled the increase from 2018 to 2021 and with an improvement of almost 6% from 2021-2023. This could be due to various factors such as changes in employment opportunities, income distribution, demographic trends, and the pandemic period. (See Table 53)

CHAPTER III – SOCIAL DEVELOPMENT (HEALTH)

A. Social Services and Status of Well-Being
B.1 Health

1. Life Expectancy

Life expectancy at birth in La Union has shown a steady increase over the past decades, from 70.20 years in 2000 to 72.75 years in 2010, further rising to 74.85 years in 2020 and eventually reaching 76.55 years in 2030. This upward trend indicates a marked improvement in the overall health and well-being of the population.

Female life expectancy consistently exceeds male life expectancy, with females living an average of 77.92 years compared to males' 70.80 years in 2020. This gap is projected to continue, with females expected to reach an average life expectancy of 79.52 years by 2030, while males are projected to reach 73.57 years.

Figure 11. Life Expectancy at Birth by Sex in La Union: 2000-2030

	2000-2005	2005-2010	2010-2015	2015-2020	2020-2025	2025-2030	2030-2035	2035-2040
women	73.52	74.72	76.92	77.92	77.92	78.92	79.52	80.32
men	66.87	68.37	69.57	70.77	71.77	72.77	73.57	74.73
average	70.20	71.55	72.75	73.85	74.85	75.75	76.55	77.53

2. Birth

Data shows that the crude birth rate increased significantly from the calendar year (CY) 2022 to CY 2023 then declined to 9.3 per 1,000 population in CY 2024. The same picture was observed for the Crude Death Rate, which rose from CY 2022 to CY 2023 and then declined to 7.06 per 1,000 population in CY 2024. As a result, the gap between birth and death rates narrowed over these years, particularly in 2024, which may suggest potential demographic shifts or a slowdown in population growth. Overall, the trends point to a temporary boost in birth rates followed by stabilization. The Province of La Union reported a crude birth rate of 9.3 per 1,000 population, while the Crude Birth rate is posted at 7.06 per 1000 population. (See Table 57)

3. Deaths

In CY 2024, La Union reported that the leading causes of death in the province were found to be Myocardial infarction with a staggering (285 fatalities), followed closely by pneumonia (279), Cerebrovascular accident (145), Shock (112), Hypertension (97), Fatal arrhythmia (87), Vehicular accident (67) and Sepsis (62) Deaths. Chronic obstructive pulmonary disease with 488 deaths. Cancer of all forms also ranked high on the list, with 211 reported fatalities. (See Table 56)

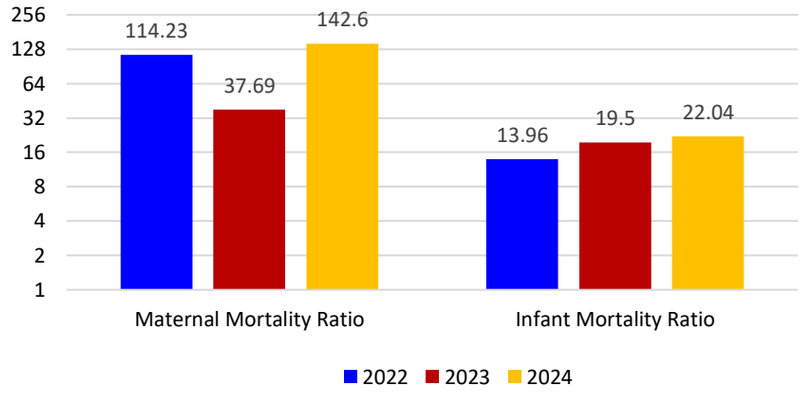
3.1 Infant Mortality Ratio

Infant mortality increased from a rate of 13.96% deaths per 1,000 live births in 2022 to 19.50% deaths per 1,000 live births in 2023 and continued to increase to 22.04 deaths per 1,000 live births in 2024. The leading causes of infant mortality included Sepsis, Pleural Effusion, Prematurity, Intrauterine Fetal Demise, and Pneumonia. In 2024, females accounted for 61.45% of these deaths caused by the above conditions, compared to 38.55% among males. (See Table 62)

3.2 Maternal Mortality Ratio

The Maternal Mortality Ratio (MMR) has shown a significant decline, decreasing by a substantial 76.54 percentage points from 114.23% in 2022 to 37.69% in 2023. The decrease in MMR is a result of the efforts of healthcare providers and policymakers in addressing maternal health concerns. Postpartum hemorrhage, pre-eclampsia, and pulmonary embolism remain the top three causes of maternal deaths.

Figure 12. Maternal Mortality and Infant Mortality Ratio in La Union :2022-2024

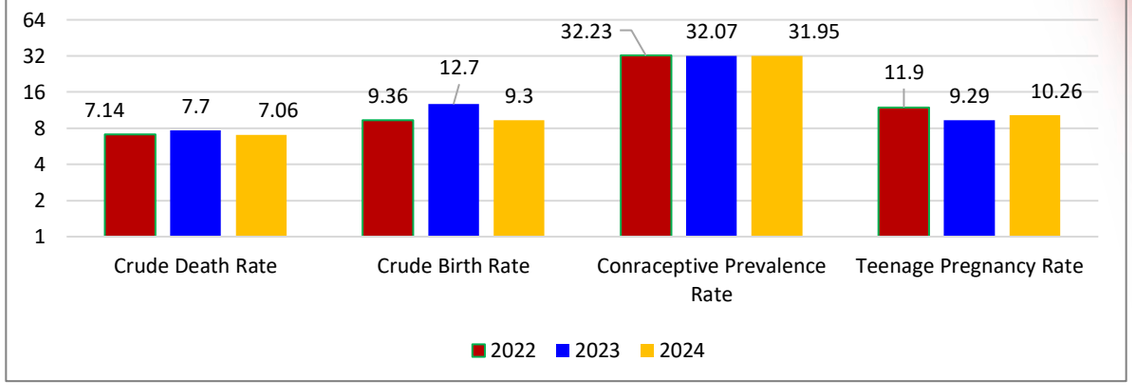


4. Morbidity Rates

The data from La Union for 2022 to 2024 reveals that acute respiratory infections consistently rank as the leading cause of morbidity, with cases increasing significantly from 2022 to 2023 before slightly declining in 2024. This was closely followed by Hypertension, which remains a major health concern, particularly among females, with higher case counts each year. Infectious diseases such as urinary tract infections, pneumonia, and skin infections also contribute substantially to the morbidity burden. The COVID-19 cases were prominent in 2022 and 2023, with a record of 9,997 cases in 2022 to 1,123 in 2023, and continuously decreased in 2024, reflecting potential improvements in control measures. Gender disparities show females experiencing higher rates across most causes, indicating a need

for gender-sensitive health strategies. Emerging issues like animal bites and diabetes mellitus are also notable, emphasizing the importance of continued public health interventions focused on respiratory health, chronic disease management, and infectious disease prevention.

Figure 13. Crude Birth and Death, Contraceptive Prevalence, and Teenage Pregnancy Rate in La Union :2022-2024



5. Contraceptive Prevalence Rate

The contraceptive prevalence rate over the three years from 2022 to 2024 reflected a slight downward trend. In 2022, the rate was 32.23%, which decreased marginally to 32.07% in 2023 and further declined to 31.95% in 2024. Although the changes are small, this shows a gradual decline in contraceptive use within the population. The decline is possibly related to access, awareness, cultural attitudes, or policy effectiveness. The rate remains relatively stable, highlighting the need for sustained and targeted efforts to promote and support contraceptive use to ensure consistent reproductive health services and maintain progress in family planning Health.

6. Health Facilities

6.1 Hospitals

La Union Province of La Union is equipped with a total of 23 hospitals, with 16 private hospitals and 7 government-run hospitals. The combined bed capacity across all hospitals is 968, with public hospitals providing 599 beds and private hospitals offering 369 beds in private hospitals. The Ilocos Training and Regional Medical Center, a government-run hospital, has a bed capacity of 200, serves as a major healthcare provider in Region I.

6.2 Health Centers/Clinics/BHSs

La Union province has a comprehensive healthcare network ensuring accessible healthcare services to its population. Each municipality is served by at least one Rural Health Unit or Family Planning clinic, except for San Fernando City, which has two Community Health Offices to cater to its larger population. In addition to these, the province has a total of 290 Barangay Health Stations (BHS), with the upland area of Burgos having the least number of four Barangay Health Stations.

Based on the Philippine Health Organization's (PHO) projected population for 2024, with a total of 829,158, an average of 2,859 individuals are served by each BHS. Most of the barangays have their own BHS. The presence of private clinics and diagnostic centers is concentrated in urban municipalities, catering primarily to the middle to upper-income class population. This healthcare network is strategically positioned to effectively meet the diverse needs of the province's population.

7. Health Manpower

There are 539 health personnel/staff in various health facilities in the province, comprising 37 physicians (29 LGUs), 13 dentists (2 LGUs, 7 PGLU, 6 DOH), 156 nurses (85 LGUs, 83 DOH), 239 midwives (150 LGUs, 42 PGLU, 30 DOH), 6 nutritionists (LGU), 41 Medical technologists (24LGUs, 18 DOH), and 47 sanitary inspectors (24LGUs, 24 PGLU). In addition to these numbers is the assistance of the 3,922 barangay health workers who provide support to the healthcare system.

8. Malnutrition

Nutritional indicators in La Union show a mixed picture between 2022 and 2024. Wasting prevalence, a serious indicator of acute malnutrition, decreased significantly from 2.0% in 2022 to 0.8% in 2023 and 0.66% in 2024. This positive trend reflects a successful program intervention to prevent malnutrition. Conversely, stunting, a marker of chronic malnutrition, exhibited a concerning upward trend during the same period, rising from 3.0% in 2022 to 3.14% in 2023 and 3.3% in 2024. While wasting rates have improved, stunting rates remain a significant public health concern, particularly among pre-adolescents and older children (10-19 years.

9. Immunization of Children

Immunization coverage among children aged 9 to 11 months across all municipalities and cities shows encouraging progress. The total Eligible Population for this age group is 13,436 children. For CY 2024, 73.32% of these children are fully immunized, indicating that they have received the essential vaccinations to prevent childhood diseases. Specifically, 72.62% of the total eligible population have received 3rd dose of Dose of Hepatitis B vaccine. This vaccine is a crucial step in ensuring long-term immunity against hepatitis B infection.
The exclusive breastfeeding rate is approximately 94.57% of infants exclusively breastfed up to the 4th month of life. This high breastfeeding rate not only contributes to better health outcomes but also complements immunization programs by enhancing the overall resilience of children against illnesses.

These indicators reflect significant progress in the province's child health initiatives. The combination of wide immunization coverage and sustained breastfeeding practices highlights the effectiveness of ongoing health campaigns and community engagement efforts. These strategies will further improve health outcomes, reduce childhood morbidity and mortality, and ensure that all children in the province have access to essential health services from an early age.

10. Maternal Care

The proportion of pregnant women receiving essential maternal services such as prenatal check-ups, nutritional assessments, postpartum iron supplementation, and vitamin A distribution remains relatively low in La Union. Less than half of the eligible population access these services: specifically, 49.61% of pregnant women and 48.47% of postpartum mothers received complete iron supplementation across all municipalities and the city, indicating significant gaps in the continuity of care after delivery. Iodized oil supplementation was administered to only 19 pregnant women, highlighting the urgent need to strengthen iodine deficiency prevention strategies. Similarly, vitamin A supplementation among lactating mothers is minimal, with only 53% of eligible women receiving the supplement.

In terms of prenatal checkups, out of the total eligible population of 14,695 women aged 10-49, only 8,011 received 4 or more prenatal checkups, and 6,815 women were assessed for nutritional evaluation during the first trimester

The low coverage rates show that there is a need to strengthen maternal health programs, increase awareness, and ensure equitable access to essential nutritional and health services for all women to promote better health outcomes.

11. Teenage Pregnancy

Teenage pregnancy rates per 1,000 population experienced a notable decline from 2022 to 2023, decreasing from 11.9 to 9.29. This shows progress in reducing societal issues among women aged 10-19 years old. However, in 2024, there was a slight increase to 10.26, indicating a modest rise compared to 2023, though the rate remained below the 2022 level. This reflects an initial improvement followed by a small resurgence, highlighting the need for continued efforts in addressing teenage pregnancy for those aged 10-19 years old.

Figure 14. Teenage Pregnancy Rate in La Union: 2022-2024

CHAPTER III – SOCIAL DEVELOPMENT (EDUCATION)

B.2 Education

1. Formal Education

1.1 Physical Facilities

a. Elementary and Secondary Level

La Union is a province with a total of 419 public schools serving its educational needs. This includes 341 elementary schools and 112 secondary schools, with 109 junior high schools and 96 senior high schools. Integrated schools offer both elementary and secondary levels, while some secondary schools only offer junior high school or both junior and senior high school levels.

In addition to public schools, La Union has 68 private schools that cater to the educational needs of its residents. Of these, 20 schools offer kindergarten education, while 49 schools offer complete elementary education. Secondary level education is offered by 51 private schools, with 43 junior high schools and 40 senior high schools. These private schools are found in all the municipalities of La Union except for the upland municipalities of Santol, Sudipen, Bagulin, and Burgos. It was also observed that most of the private schools are concentrated in the City of San Fernando.

b. Tertiary Level

For tertiary education, La Union has a total of 27 institutions, consisting of 23 colleges and 4 state universities. These institutions cater not only to the educational needs of La Union residents but also to those from nearby provinces. Of the 23 colleges, 8 have already closed down. Most of the remaining colleges are located in the City of San Fernando, while the four state universities - Don Mariano Marcos Memorial State University - have campuses strategically located in Bacnotan, Agoo, and two campuses in the City of San Fernando.

These tertiary institutions provide opportunities for residents of La Union to pursue higher education and achieve their academic goals.

1.2 School-Going Age Population

Based on the 2020 Census of Population, the province had a total school-going age population of 282,564. As to the school level, the elementary (6- 12 years old) had the highest share of 105,422 children, while the secondary (13 – 16 years old) posted 59,511 students, and the tertiary level (17-24 years old) accounted for 117,631 students.

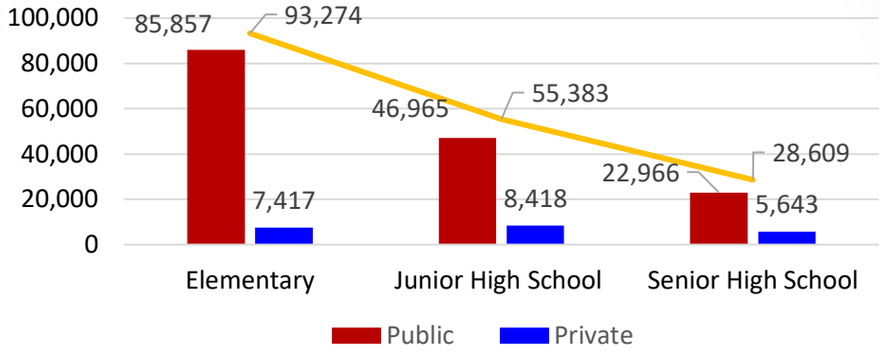
1.3 Enrolment

a. Elementary and Secondary Level

The total enrollment for the province is 177,266 learners. Elementary education dominates the overall enrollment, with 93,274 pupils (52.62% of the total) enrolled. Junior high school has the second-largest number of students, with 55,383 students (31.24% of the total), while the Senior high school has the smallest number of students, with 28,609 students (16.14% of the total).

Public schools account majority of the enrollment at 155,788, while private schools have a relatively smaller share at 21,478.

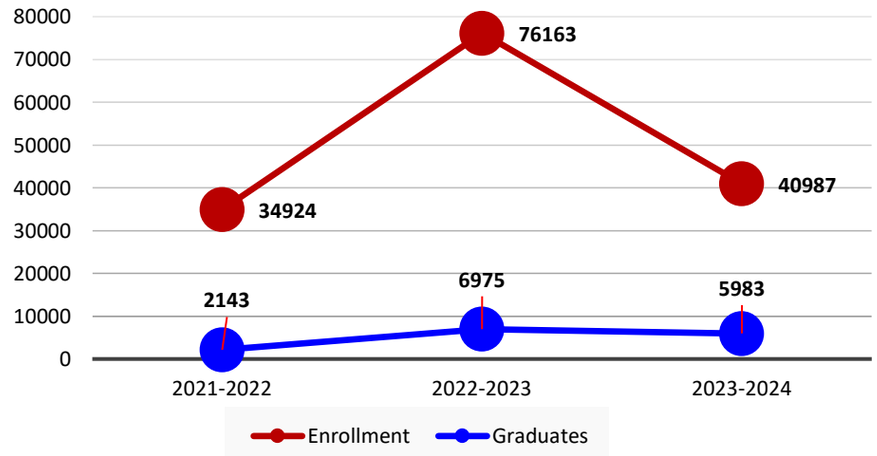
Figure 15. Enrolment in Public and Private Elementary and Secondary School: SY 2022-2024



Source of data: Department of Education

b. Tertiary Level

Figure 16. Number of Tertiary Enrollment and Graduates in La Union: SY 2021-2024



The 15 Colleges and 8 State Universities in the province posted a total enrollment of 76,163 students. Colleges and State Universities in the province have a higher proportion of female students compared to male students. With a figure of 41,889 as against the 34,274 males for SY 2022-2023.

1.4 Graduates

For SY 2022 – 2023, the total number of graduates is 6,052, with varying numbers across different disciplines. Business, engineering, and health-related fields are the most numerous among graduates in La Union.

In terms of baccalaureate, Bachelor of Science in Criminology posted the highest number of graduates (564), followed by Bachelor of Science in Business Administration (487), closely followed by Bachelor of Science in Hospitality Management (471). These are the trends of student choices and potential job market demands.

c. Vocational Level

From 2022 – 2023, enrollment and graduation rates in Technical and Vocational Education and Training (TVET) reflected a significant increase. However, both metrics experienced a decline in 2024. The number of individuals assessed showed a slight decrease in 2023 compared to 2022, but then increased again in 2024, while the number of graduates who applied for assessment and were given certification followed a similar pattern; it increased in 2023 before partially recovering in 2024. The most striking change is observed in employment figures, which remained relatively low in 2022 and 2023 but surged dramatically in 2024 due to massive tracking of employment of graduates conducted in 2024 that boosted the employment data, indicating a substantial improvement in job placement and economic conditions.

In 2024, a total of 14,803 students enrolled in Technical-Vocational Educational Training (TVET) programs. Of these, a remarkable 14,760 students completed their training and graduated. From this total number of graduates, 12,713 applied for assessment to acquire the National Certification. Of these, a notable 11,966 students passed the assessment and earned their National Certification (NC). Based on the recorded NC Holder, 7,644 were employed in the different industries.

1.4 Classroom-Pupil Ratio

For SY 2023-2024, the province has adequate classrooms in the public schools for the elementary level as evidenced by the classroom-to-pupil ratio of 1:23, 1:36 for the secondary level (Junior High School), and 1:41 in the secondary level (Senior High School). This indicates that public schools have enough classrooms to accommodate their learners, meeting the Department of Education's (Dep. Ed.) standard ratio of 1:40. Despite the manageable ratio of classroom to learner, there is still a need for additional infrastructure resources. The existing school buildings, constructed several years ago, are now at the stage of deterioration and require replacement.

1.5 Teacher-Pupil/Student Ratio

As to manpower, the number of public elementary school teachers for SY 2023-2024 totaled 3,818, with a teacher-pupil ratio of 1:22, while the secondary level JHS teachers accounted for a total number of 2,246, or a ratio of 1:21 and 1:28 for secondary (Senior High School). This reflects a generous teacher provision by the Dep Ed, or the province had an adequate number of teachers for public basic education. However, there are a few schools in the province that continue to manage combination and multi-grade classes, especially in the rural hinterlands, due to the lengthy process of transferring teachers, which leads to an uneven distribution of educators.

1.6 Performance Indicators in Public Schools

As shown in Table No. 16, Net Enrolment Rate, Completion Rate, Cohort Survival rate, Retention Rate, and School Leaver Rate increased from SY 2020-2021 to SY 2021-2022 and slightly decreased in SY 2022-2023 for all grade/year levels.

For the school year 2022-2023, the Net enrolment rate of 79.3 % in the elementary level is lower by 1.49 points compared to the secondary level with 80.79% (JHS-89.63 & 71.95%-SHS). The Completion rate was posted at 98.82% in the elementary level and 87.95% in the secondary level (JHS-93.87% & SHS-82.02%). This implies that entrants in the elementary level have a greater chance of completing the level than those in the secondary level.

More enrollees in the beginning grade can reach the final grade of the elementary level than enrollees in the secondary level, as reflected in the cohort survival rate of 99.21% for the elementary level and 89.12% in the Secondary Level (JHS 93.87% & SHS-84.37%)

For the Retention Rate performance, the elementary level has a percentage of more than 100 percent while the secondary level is only 97.29 (JHS-97.91% & SHS-96.67%). This revealed that the percentage of enrollees in the elementary level who continue to be in the school the following year is greater as compared to the secondary level.

1.7 Literacy Rate

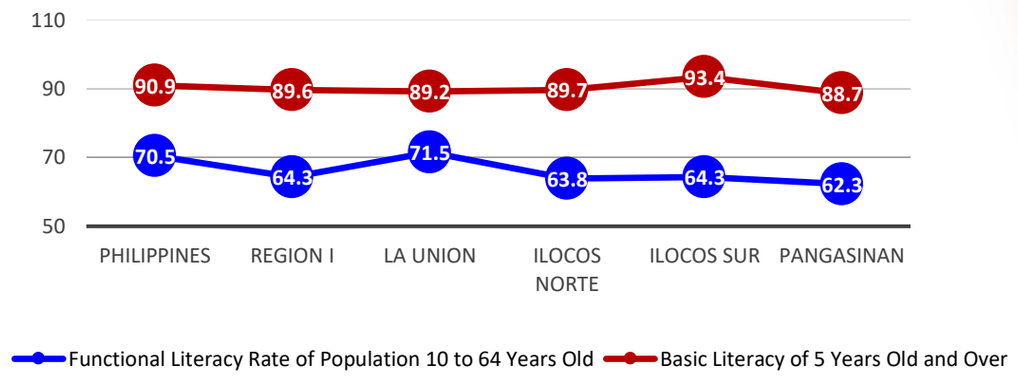
Based on the 2020 Census of Population, the Literacy Rate among residents in La Union was recorded at 99.01 percent for the household population 5 years old and over. It was observed that literacy was higher among females, with a rate of 99.0% while the males were at 99.00% in CY 2020.

Among the municipalities, San Juan posted the highest literacy rate of 99.35, which is higher by 0.34 percent than the provincial rate of 99.01 percent; All other municipalities are at a literacy rate of more than 96%.

The literacy rate is an important indicator of a community's level of education and development. High literacy rates can lead to improved economic and, better health outcomes and increased social mobility. In La Union, the high literacy rate among the household population 5 years old and over reveals that the community is well-equipped to access education.

Meanwhile, based on the Functional Literacy, Education, and Mass Media Survey conducted by the Philippine Statistics Authority, the 2024 data on literacy in the Philippines indicates a national functional literacy rate of 70.50% and a basic literacy rate of 90.90%. Region I has a functional literacy rate of 64.30%, which is below the national average, but maintains a high basic literacy rate of 89.60%. Among its provinces, La Union stands out with the highest functional literacy at 71.50%, ranking third in basic literacy at 89.20%. Ilocos Sur has the highest basic literacy rate at 93.40%, despite a moderate functional literacy rate of 64.30%. Pangasinan has the lowest functional literacy in the region at 62.30%. Basic Literacy is the ability of a person to read and write with understanding and to compute basic arithmetic, while Functional Literacy is the ability of a person to read, write, compute, and comprehend

Figure 19. Basic and Functional Literacy Rate by Province, Region I and Philippines :2024



Source of data: PSA - Functional Literacy, Education and Mass Media

2. Non–Formal Education

To address the needs of out-of-school youth, non-formal education is being offered by the Department of Education. Under the Accreditation and Evaluation Program, there are 3,520 enrollees in the Division of La Union for SY 2023 – 2024 or a decrease of 267 from the figure of 3,787 in SY 2022 – 2023. Some also availed of the Basic Literacy Program. For SY 2023 – 2024, 354 are enrolled under the City Division and 111 in the Division of La Union.

CHAPTER III – SOCIAL DEVELOPMENT (SOCIAL WELFARE)

B.3 Social Welfare

1. Day Care Services

From 2022 to 2024, there is a steady growth in the number of children utilizing daycare services, increasing from 14,028 in 2022 to 15,425 in 2023 and then experiencing a surge to 19,294 in 2024. The 2024 increase is attributed to the inclusion of daycare children enrolled in private schools and home-based daycare settings. The upward trend shows a rising demand for early childhood care, possibly driven by demographic changes or increased awareness of the importance of such services. In contrast, the number of daycare workers remains relatively stable, fluctuating from 624 in 2022 to 628 in 2023 and then decreasing slightly to 621 in 2024 due to staff resignations. This implies that the workforce has not expanded proportionally to accommodate the growing number of children. The number of daycare centers remained relatively stable, increasing from 621 in 2022 to 636 in 2023. However, there was a slight decrease to 627 centers in 2024, primarily due to closures and the absence of daycare workers to manage the centers (See Table 113)

2. Youth

2.1 Out-of-School Youth

The total out-of-school youth (OSY) sharply increased from 5,121 in 2022 to 14,177 in 2023. The increase is possibly due to the disruption caused by the COVID-19 pandemic, which has contributed to the decline in school attendance. The upward trend continued in 2024, with the number reaching 14,711 due to massive tracking of out-of-school youth.

For CY 2024, the municipality of Aringay (1,644) and Sto Tomas (1,44) had the greatest number of OSY, closely followed by the municipality of Balaoan with 1,576 youth. Naguilian posted the lowest number of OSY at 122 youth. (See Table 115)

2.2 Person with Disability (PWD)

Persons with Disabilities (PWD) – Youth are present in La Union, with their presence documented in almost all municipalities. Specifically, these youth are found in every municipality except Balaoan, San Gabriel, Bauang, Aringay, and Rosario, indicating a varying distribution of PWD youth across the province. The City of San Fernando has the highest recorded number of PWD youth, totaling 348 individuals possibly due to its large population and the diligence of concerted offices in reporting. In contrast, the municipalities of Caba and Bagulin have the lowest counts, with only 4 PWD youth each, possibly due to smaller populations or underreporting issues.

3. Kalipunan ng Liping Pilipina (KALIPI)

Reports reflected a remarkable growth in the Kalipunan ng Liping Pilipina (KALIPI) membership in La Union over the past three years. In 2022, the membership was 2,735, which almost tripled in 2023 with a total of 8,715. This further increased to 9,252 in the year 2024. This consistent growth shows the organization's growing influence and the increasing recognition of its role in empowering women and fostering community development within La Union. The upward trajectory continued into 2024, with the membership further increasing to 9,252 members. (See Table 117)

4. Senior Citizens

The total number of senior citizens issued ID cards in La Union is 107,666, with a significant disparity between males and females. Males account for 45,490 (42.25%) of the senior citizens, while females account for 62,716 (57.75%) of the senior citizens. Out of the total 62,716 female senior citizens, 13 are centenarians, which almost tripled the number of male centenarians (5) in CY 2024. Under the provision of assistance, 27,106 senior citizens benefited under the Social Amelioration Program.

In 2022, there were 6 males and 39 females centenarians, totaling 45 individuals, with females making up the majority. In 2023, both groups saw significant increases, with males rising to 12 and females to 51, resulting in a total of 63 individuals may be attributed to improved health care and longevity. However, in 2024, there was a marked decline in sexes, with males decreasing to just 5 and females to 13, bringing the total down to only 18. Throughout the period, females consistently outnumbered males, but the overall trend reveals a peak in 2023 followed by a steep decline in 2024, indicating that many centenarians did not survive up to 2024. (See Table 118)

5. Poor Households and Individuals

The total number of poor Households slightly increased from 5,254 in 2023 to 5,260 in 2024. Correspondingly, the number of poor individuals increased from 36,517 to 36,558 poor individuals within the same period. The variance of 6 poor households, equivalent to 41 poor individuals, is primarily attributed to the Special Assessment/Validation conducted by the Listahanan Project, focusing solely on household beneficiaries of the Pantawid Pamilyang Pilipino Program (4Ps) household beneficiaries only. The Data used is sourced from the Department of Social Welfare, Listahanan 3 Database of Poor Households with 2023 Data recorded as of September 22, 2023, and the 2024 data as of December 31, 2024, instance. See Table 120)

6. Indigenous People

The province of La Union is also home to 96,316 individuals belonging to various Indigenous Peoples communities. There were 6 identified IP municipalities consisting of Santol, Sudipen, San Gabriel, Burgos Bagulin, and Pugo. The largest concentration is in the municipality of Bagulin, with 88.09 % of the residents belonging to the IP community, closely followed by Sudipen at 73.50%, Burgos at 67.82%, and San Gabriel at 69.45%. At present, the IP community is present across all municipalities in La Union, contributing to the cultural diversity of the province due to migrations, except for the municipalities of Bangar and Luna, which do not have recorded Indigenous People residents in their locality. Based on the report of the National Commission on Indigenous Peoples (NCIP), the reported IP population in 2024 is gathered from various years. (See Table 122)

7. Parole and Probationers

The number of parolees is continuously increasing from 14 in 2022 to 17 in 2023 and continues to increase to 27 in 2024. The Increase is possibly attributed to Programs and Policies that promote early release for good behavior. In 2024, males dominated the number of females with a total of 26 males as against 1 female. Parolees are offenders who were released earlier from prison after they had served a portion of their sentence.

Meanwhile, the offenders who serve their time in the community with supervision or the probationers reflected a fluctuating trend. It increased from 337 in 2022 to 441 in 2023 and decreased to 357 in 2024. The decrease is a result of increased efforts in crime prevention, youth education, and community engagement that reduce the incidence of offenses, leading to fewer probation cases.

Probationers are offenders who serve their time in the community with supervision. For CY 2024, the total number of probationers is 357, disaggregated into 44 females and 325 males. Same situation with the number of parolees, males dominated the number of females, with a total of 26 males as against 1 female. Parolees are offenders who were released earlier from prison after they had served a portion of their sentence. (See Table 136)

Table of Contents

Table Number	Particulars	Page Number
107	Annual Per Capita Poverty Thresholds by Classification, Poverty Incidence and Magnitude of Poor Families and Population in La Union, Region I and Philippines:2018-2021-2023	159
108	Poverty Gap, Severity of Poverty, Subsistence Incidence Magnitude of Subsistence of Poor Families and Population in La Union, Region I and Philippines: 2018, 2021 and 2023	160
109	Poverty Incidence by Tourism Circuit and by District/Municipality/City in La Union: 2018-2021	161
110	Number of Poor Households and Individuals by Tourism Circuit, and by District/Municipality/City in La Union: 2023-2024	162
111	Number of Families, Total and Average Annual Family Income and Expenditure (Current Prices) with Measures of Precision, in La Union, Region I and Philippines: 2021	163
112	Magnitude of Poor Among Basic Sectors by Tourism Circuit and by District/Municipality/City in La Union: 2024	164
113	Number of Day Care Centers/Workers/ Children by Sex, by Tourism Circuit and by District/Municipality/City in La Union: 2024	165
114	Number of Supplemental Feeding Centers and Beneficiaries by Sex, by Tourism Circuit and by District/Municipality/City in La Union: 2024	166
115	Number of PAGASA Youth Association (PYA) Organized, Members (OSY), by Sex, by Tourism Circuit and by District/Municipality/City in La Union : 2024	167
116	Number of Persons with Disabilities by Kind of Disabilities, by Age Group, by Sex, by Tourism Circuit and by District/Municipality/City: 2024	168
117	Number of KALIPI Members by Tourism Circuit and by District/Municipality/City in La Union: 2022-2024	169
118	Number of Senior Citizens Issued ID Cards and Number of Centenarian by Sex, by Tourism Circuit, and by District/Municipality/City in La Union: 2024	170
119	Number of Centenarians by Sex, by Tourism Circuit, and by District/Municipality/City in La Union: 2023-2024	171
120	Number of Pantawid Pamilya, Social Amelioration Program, and Social Pension Beneficiaries, by Tourism Circuit and by District/Municipality/City in La Union: 2023-2024	172
121	Number of Families provided with Relief Assistance by Tourism Circuit by District/Municipality/City in La Union: 2022-2024	173
122	Indigenous Peoples Population, Population Density , Number of Tribal Council and Organization by Tourism Circuit and by District/Municipality/City in La Union: 2024	174
123	Number of OWWA Members, by Tourism Circuit and by District/Municipality/City in La Union: 2022-2023-2024	175
124	Number of Active and Inactive Overseas Filipino Workers, by Tourism Circuit and by District/Municipality/City in La Union: 2023-2024	176
125	Ratio of Female to Male Rice Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	177
126	Ratio of Female to Male Fruit Trees Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	178
127	Ratio of Female to Male Leafy Vegetable Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	179
128	Ratio of Female to Male Fruit Vegetable Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	180
129	Ratio of Female to Male Legumes Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	181
130	Ratio of Female to Male Root Crops Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	182
131	Ratio of Female to Male Root Vegetable Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	183
132	Ratio of Female to Male Corn Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	184
133	Ratio of Female to Male Commercial Crops Farmers by Tourism Circuit and by District/Municipality/City in La Union: 2024	185
134	Ratio of Female to Male Operators/Fishers by Tourism Circuit and by District/Municipality/City in La Union: 2024	186
135	Ratio of Female to Male Police by Tourism Circuit and by District/Municipality/City in La Union: 2024	187
136	Number of Parolees, Pardonees and Probationers by Tourism Circuit, and by District/Municipality/City in La Union: 2024	188

Table 107. Annual Per Capita Poverty Thresholds by classification, Poverty Incidence and Magnitude of Poor Families and Population, Per Capita Food Thresholds and Income Gap in La Union, Region I and Philippines: 2018, 2021 and 2023

CHAPTER III – SOCIAL DEVELOPMENT (HOUSING)

B.4 Housing

1. Housing and Resettlement

For housing and resettlement areas, two projects were developed, Sagayad Phase I and Phase II located at a five (5) hectare lot owned by the Provincial Government of La Union in Barangay Sagayad, City of San Fernando, La Union.

Sagayad Phase 1 area developed 2.9 hectares, with lots already awarded to its beneficiaries. There were 214 lots intended for Housing and 10 intended for open space (Water pump, basketball court, etc.). The Sagayad Phase 2 area developed 2.1 hectares. These two resettlement areas partially catered to low-income groups displaced by government projects, and those located in unsafe areas, especially in the City of San Fernando, such as squatters along the western portion of the PNR and the By-Pass Road, were relocated. (See table 137)

2. Squatters

The province of La Union is home to a significant number of informal settlers, with a total of 3,131 families reported by local government units. The majority of these families are found in the municipalities of Bauang (706), San Juan (416), and City of San Fernando (501), with the remaining families dispersed across seven other municipalities (Bangar-166, Luna-367, Bacnotan114, Agoo-319, Aringay-40, Caba-290, Rosario-212) that have identified informal settler.

Most of the informal settlers are situated along critical infrastructure, particularly along railroad corridors, where residents often establish makeshift homes in informal settlements due to limited access to formal housing options. These areas are typically characterized by inadequate infrastructure, limited access to basic services such as water, sanitation, and electricity, and heightened vulnerability to natural disasters and environmental hazards. The presence of these informal communities highlights ongoing challenges related to urban planning, housing, and social services in La Union.

3. Occupied Housing Units

For CY 2020, a total of 820,335 household population resided in 192,998 housing units. It registered a ratio of 1.06 households per occupied housing unit or a ratio of 4.25 persons per occupied housing unit. The data presented exclude households enumerated as homeless. (6 Households with a population of 8 in the municipalities of Bacnotan, Bauang, and the City of San Fernando). (See Table 139)

4. Housing Materials

Out of 192,998 occupied housing units, 83.24% or 160,661 are in good condition, 20,512 need major repairs, 401 are being dilapidated/condemned, 2,521 are under renovation/being repaired, 2,781 are under construction (ongoing), 5,916 are unfinished construction, 201 are not reported, and 5 are not applicable. (See table 141-142)

5. Occupied Housing Units by Type of Roofing Materials

In La Union, the majority of houses (93.34 percent) have roofs made of galvanized iron or aluminum. In contrast, only 0.43 percent of the occupied housing units have roofs made of cogon, nipa, or anahaw. Additionally, 74.44 percent of the homes use concrete, brick, or stone as construction materials for their outer walls.

6. Occupants by floor area

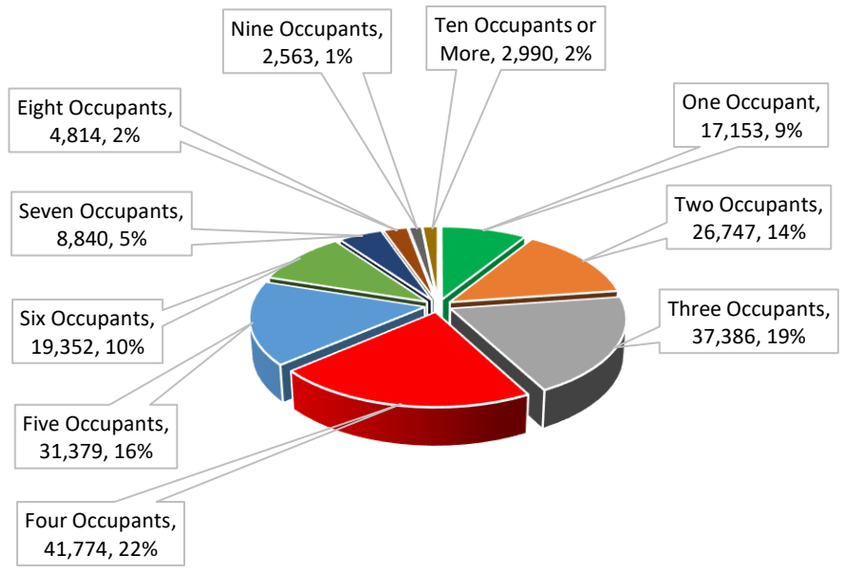
The largest proportion of housing units has 3-5 occupants, with a total of 110,539 (37,386 three occupants, 41,774 four occupants, 31,379 five occupants), making up 57.27% of the total occupants.

More than 50% of the housing units occupied range from 20 to 69 square meters, as reflected in the distribution of occupants by floor area.

The category of four occupants per housing unit recorded the highest number of occupied housing units, totaling 41,774. The same category also posted the highest number of occupied areas measuring between 30 and 49 square meters, which accounted for 9,775 occupied housing units.

Cities and municipalities in La Union have different occupancy patterns; some have a higher percentage of housing units with fewer residents (1-2), while others have more occupants (6-10 or more).

Figure 20. Number of Occupied Housing Units by Number of Occupants : 2020



Source of Data: Philippine Statistics Authority, 2020 Census of Population and Housing

7. Type of Structure

Single Houses got the most number at (95.79 % in 2020), Duplex (2.19%), and Multi-Residential (0.53%), respectively. The rest (1.49%) are commercial/Industrial/ Agricultural, etc. District II had higher data of having single houses (54%) over the provincial total, while District I had 46 percent.

8. Land Ownership

There are 205,028 households in La Union. District II has a higher number of households owning various types of land compared to District I. District I owns 3,790 other residential lands, 8, 260 agricultural lands, 349 agricultural Land Acquired through CARP, and 35 other lands while District II had 11,037 other residential lands, 21,538 agricultural lands and 1,305 agricultural Land Acquired through CARP and 191 other lands. (See table 145-146)

Across municipalities, the City of San Fernando posted 32,181 landowners, followed by Bauang with 19,794.

CHAPTER III – SOCIAL DEVELOPMENT (PROTECTIVE SERVICES)

B.5 Protective Services

1. Crime Statistics

1.1 Crime Rates

The overall crime rate in La Union province is relatively low, with an average of 1.72 monthly index crimes per 100,000 population. However, there are significant variations across districts/municipalities/cities.

The stable peace and order situation in the area makes the people feel safer to go around at any time of the day. Out of 135 index crimes, 47 are recorded under the crime against property. In terms of crime against person, there were 88 occurrences and rape is the most prevalent in the area as reported by the PNP- La Union with a total of 54 crimes committed. Index crimes are considered the most serious and violent crimes (murder, homicide, robbery, and rape) While Non-index crimes are less severe crimes, such as damage to property, theft, and vandalism.

In the province of La Union, the reported number of non-index crimes is comparatively high, with a total of 504 crimes as against the number of Index crimes. Property damage is the most numbered, with a total of 475, followed by physical Injuries, 303, and 88 homicides. (see Table 147)

1.2 Drug Clearing Operations

The number of barangays identified as having drug problems decreased significantly, from 45 in 2022 to 33 in 2023, and then further to 16 in 2024. This decline indicates effective intervention strategies are being implemented at the local level. Simultaneously, the number of drug-free barangays saw a dramatic increase, rising from 16 in 2022 to 468 in 2023, before slightly decreasing to 392 in 2024. The number of drug-clearing operations and buy-bust activities also rose over the years, indicating intensified law enforcement efforts to combat drug issues, leading to a healthier, safer environment across the province. (See Table 156)

2. Private Security Agencies

The province of La Union has a total of nine (9) security agencies operating in the area of responsibility. Four of these agencies are stationed in the City of San Fernando, while three (3) are based in San Juan, one (1) in Rosario, and one (1) in Sto. Tomas, La Union. Aside from government offices in charge of peace and order, these security agencies also serve to prevent and deter crime in the province and to ensure a safe and secure environment.

3. Fire Protection

The province has a comprehensive fire protection system, with a total of twelve (12) fire stations strategically located to ensure the safety of its citizens. The six fire stations in the first district are comprised of Bacnotan, Balaoan, Bangar, City of San Fernando, and San Gabriel. The municipality of Santol is, in addition to the area of responsibility of Balaoan Fire Station, while the municipality of Luna is included in the responsibility of Bangar. San Juan is under the care of the City of San Fernando fire stations. Meanwhile, the six fire stations in the second district, covering Agoo, Aringay, Bauang, Naguilian, Rosario, and Sto. Tomas caters to the fire safety needs of these municipalities.

The division of the area of responsibility was based on the geographical locations of each municipality, ensuring that each station was well-equipped to respond quickly and effectively in case of a fire emergency.

To further enhance the province's fire protection capabilities, there are nine (9) local government unit (LGU) fire trucks in support of the thirty (30) Bureau of Fire Protection fire trucks available to cater to the needs of the community in case of a fire. In terms of Human Resources, a total of 350 dedicated fire personnel are stationed in key locations to effectively address community fire needs and ensure a swift response to fire incidents. (See Table 154)

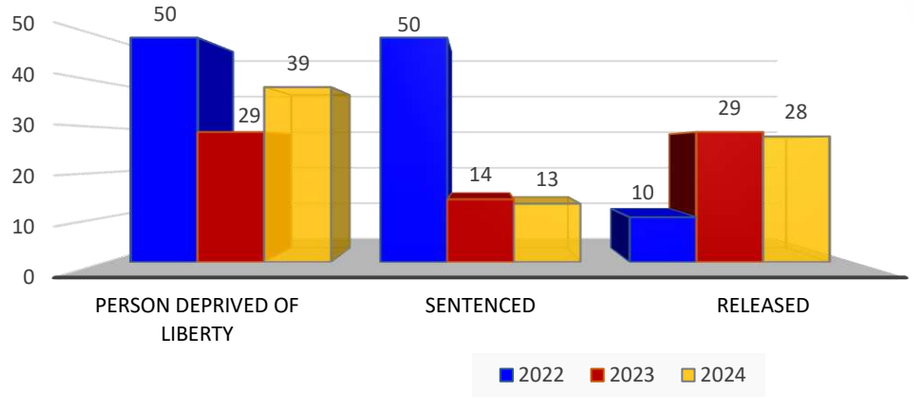
In 2024, La Union experienced a total of 114 fires across municipalities and the city, primarily caused by structural issues (about 60% or 69 occurrences) and forest/grass fires (around 31% or 35 occurrences), and the remaining 9% or 10 occurrences were attributed to forest fires. The City of San Fernando posted the highest incidents with 26 occurrences, followed by Bauang with 10 incidents. Most fires were in urban areas, indicating a need for improved building safety and fire prevention measures.

4. Provincial Jail Services

All persons deprived of liberty decreased in 2023 compared to 2022, followed by a slight increase in 2024. Males constitute the majority of detained individuals, with numbers declining from 47 in 2022 to 22 in 2023, then rising to 38 in 2024. In contrast, female detainees show a continuous decline over the same period, with figures decreasing from 3 in 2022 to 2 in 2023, and further down to 1 in 2024, highlighting the persistent gender disparity in detention.

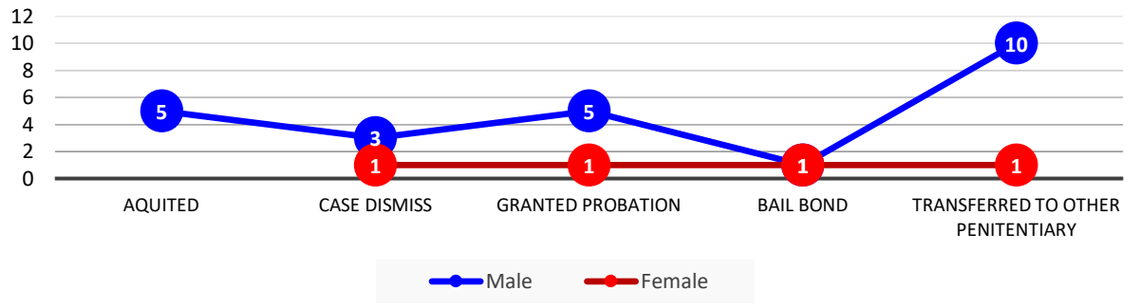
Regarding judicial outcomes, all persons deprived of liberty (50) were sentenced in 2022; however, this number decreased to 14 in 2023 and decreased again to 13 in 2024. This shows that some cases may have required extended periods before reaching a final judgment. (See Table 158-160)

Figure 21. Persons Deprived of Liberty, Sentenced and Released in La Union: 2022-2024



Source of data: Provincial Jail

Figure 22. Released Person Deprived of Liberty by Type of Case by Sex: 2024



Source of data: Office of the Provincial Jail

In terms of legal statuses for the year 2024, a significant disparity exists in the number of males and females in each category. Males are represented in every status category, with the highest count in "Transferred to other Penitentiary" at 10. Conversely, females are present in fewer categories, and their highest count is in "Case Dismiss" and "Bail Bond," each with only one entry. Most cases result in release or transfer, with a minimum remaining unresolved.

5. Disaster Services

5.1. Natural Hazards

La Union is vulnerable to several kinds of natural hazards, including flooding and landslides caused by rain, storm surges, ground shaking, and others, just like the other provinces in Region 1. These risks typically result in the destruction of the province's main economic and social sectors, including agriculture, forestry, water supply, coastal industries, and health.

Out of 288 affected barangays, 179 are severely affected by landslide, being included in the High/Very high category. For CY 2024, the municipality of San Juan posted the highest number of barangays affected, closely followed by the municipality of San Juan. In terms of flooding, the majority of the barangays are affected by this type of natural hazard. A total of 508 or 88.19% of the total barangays are affected, categorized as follows: 110 low, 131 moderate, and 267 are under the High/Very High category. (See Table 162)

5.2 Preparedness

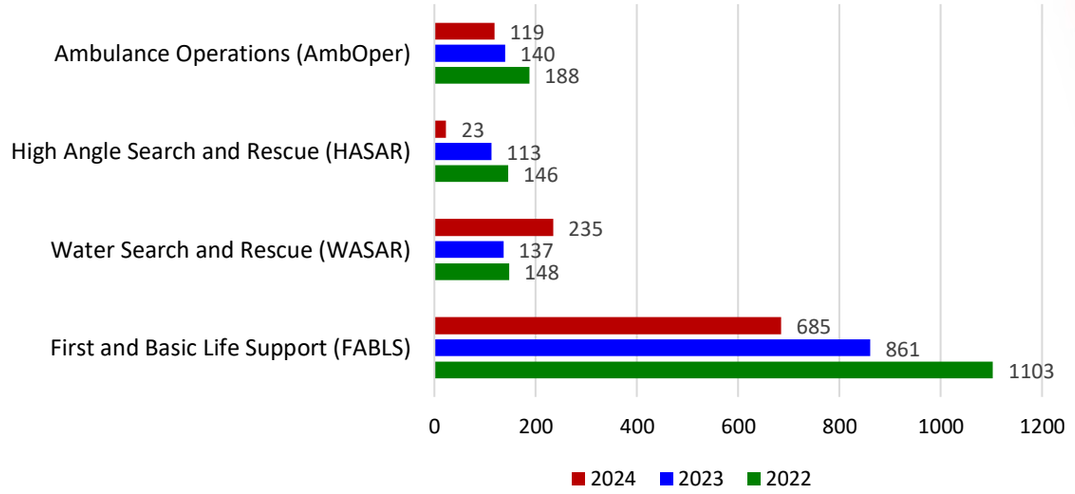
a. Evacuation Centers

In the province, various government facilities are strategically designated and utilized as evacuation centers to ensure the safety and well-being of residents during times of calamity or emergency. These facilities serve as safe havens where evacuees can seek shelter, access basic needs, and receive assistance. Specifically, a total of 269 schools across the province are prepared to accommodate displaced individuals, leveraging their spacious classrooms and open areas. Additionally, 423 barangay halls—local government buildings within neighborhoods—are designated as evacuation centers, providing accessible and community-based shelter options. Furthermore, there are 255 other government facilities, which may include health centers, public buildings, or multi-purpose halls, that are also available for occupancy by evacuees. The readiness and availability of these facilities underscore the province’s commitment to disaster preparedness and community safety, ensuring that there are sufficient and accessible locations for affected residents to seek refuge during emergencies. (see Table 163)

b. Training and Capacity Development

As to manpower, trained individuals in different emergency response programs show a continuous decrease from CY 2022 to 2024, except for the trained individuals for Water Search and Rescue (WASAR), which decrease from 148 to 137 in CY 2022 to 2023 and significantly increase to 235 in 2024. First and Basic Life Support (FABLS) had a significant drop from 1,103 to 685 participants, while High Angle Search and Rescue (HASAR) and Ambulance Operations (AmbOper) also showed a reduction to a lesser degree. The decrease is possibly due to resource constraints or shifting of priorities. The increasing trend in the number of individuals trained under WASAR means that the community is more technically equipped to handle a water calamity and provide timely assistance when needed. Trained Individuals under pieces of training conducted by other public and private companies, SUCs, and organizations are included in the data reflected. (see table 166)

Figure 23. Number of trained Individuals on FABLS, WASAR, HASAR and AmbOper in La Union: 2022-2024



Source of data: Provincial Disaster Risk Reduction Management Office

c. Vehicle, Rescue Equipment, and Supplies

Based on the latest inventory submitted, there were 29 Ambulance, 7 Watercraft (Boats), 78 Emergency Vehicles, 98 Trauma Kits, 97 Stretchers and Spine Boards, 244 Two-way radio, 640 Water Rescue Kits, Rope Floatation, Life Vest, 1,327 Protective Gear, Helmets and Life Vest, 630 Tents, 27 Defibrillator and Nebulizer, 42 Portable Generator, 59 Megaphones, 49 Flood Light, 20 Extrication Kits, and 189 ropes and throw bags readily available across municipalities.

Early Warning System and Stations. The Department of Science and Technology -Provincial Office deployed different early warning systems in disaster-prone areas such as an automated rain gauge in Mini Gymnasium, Central West #2, Bangar; Mangaan ES, Santol, SFC Airport Special Freeport Zone, CFC; Barangay Looy, San Gabriel; Libbo ES, Bagulin; Agoo Civic Center Roof Deck, Agoo; and Poblacion East Rosario; and a Water level Monitoring system in Naguilian and Aringay Bridge. In addition to this, early warning station sites are located in Brgy. Mindoro, Basketball Court, Bangar; Old Sudipen ES, Sudipen; Brgy. Balbalayang, Brgy. Hall, San Gabriel; Brgy. Pugo, Brgy. Hall, Bauang, and Brgy. Samara, Day Care Center, Aringay. (See Table 169)

CHAPTER IV – ECONOMIC DEVELOPMENT (AGRICULTURE)

A. Agriculture

1 Agriculture Production and Sufficiency

The province's agricultural activities encompass rice farming, fruit and vegetable production, legume cultivation, root crops, and fisheries. For the past three years, data indicates fluctuating trends across these sectors. Rice sufficiency level experienced an increase from 125 in 2022 to 142 in 2023, before slightly declining to 137 in 2024, reflecting ongoing efforts to improve rice cultivation with some challenges. Conversely, the cultivation of fruit trees saw a sharp decline from 185 in 2022 to 44 in 2023, with a modest recovery to 59 in 2024, possibly due to environmental or market constraints. Leafy vegetables and fruit vegetables also faced significant drops after 2022, with leafy vegetables decreasing from 399 to 37 by 2023 and then slightly rising to 56 in 2024, while fruit vegetables declined from 292 to 138, stabilizing around 136 in 2024. Legume and root crop production saw consistent decreases over the years, indicating shifting priorities or resource limitations. Corn production, however, showed a positive trend in 2023, increasing from 147 to 165, before dropping again to 122 in 2024. The fisheries sector remained relatively stable, with slight fluctuations. For all the commodities mentioned, Rice, Fruits, vegetables, Corn, and fisheries remained sufficient for the past three years despite the fluctuation of production levels.

Figure 24. Sufficiency Level by Agricultural Commodity in La Union: 2022-2024

	2022	2023	2024
Rice	125	142	137
Fruit Trees	185	44	59
Leafy Vegetables	399	37	56
Fruit Vegetables	292	138	136
legumes	108	61	51
Rootcrops	365	94	82
Corn	147	165	122
Fishery	105	117	107

Source of data: Office of the Provincial Agriculturist

1.1 Palay

Palay remains the major cash crop of the province with a total production of 223,474. Metric Tons in CY 2024.

District I's total production of 113,535.46 metric tons accounts for about 50.80% of the province's total palay production. San Juan of District I posted the highest production at 20,298.28 metric tons, while Bagulin of District II had the least at 3,967.42 metric tons.

Converting the palay production to rice, this resulted in a total of 127,825 metric tons. Of this amount, only 93,446 Metric Tons were consumed, giving the province an average sufficiency level of 137%. (See Table 171)

In terms of consumption, this varies significantly across municipalities/cities. San Fernando City has a high consumption of rice (14,405 mt), while Burgos has a relatively low consumption (913 mt).

The total area planted with palay is 37,226.79 hectares, of which 25,100.41 hectares were irrigated (16,536.12 hectares during the wet season and 8,564.29 hectares in the dry season) and 13,626.38 hectares were rainfed. Despite the typhoons that frequently visited the province, rice sufficiency was still attained.

1.2 Fruit Trees

A total of 1,637.67 hectares were devoted to fruit-bearing tree production in the province. The Top three produce fruits are Mango, Banana, and Watermelon. Banana posted the highest production of 7,565.68 metric tons, closely followed by Mango 7,231.50 metric tons, then watermelon with 1,259.96 metric tons. In addition to this primary crop, the province also cultivates other crops like Watermelon, Calamansi, Avocado, Papaya, Guayabano, Guapple, Jackfruit, Grapes, Citrus, and Dragon Fruit, but on a smaller scale. (See Table 174)

1.3 Leafy and Fruit Vegetables

Leafy and Fruit vegetables are another source of income for the farmers in rural areas of the province. The record shows that fruit vegetables have a total production of 34,860.41 metric tons and 1,920.19 metric tons of leafy vegetables. The province has enough produced in terms of fruit and vegetables that resulting in a 136% sufficiency level. In contrast, there is a deficit in leafy vegetables. (See Table 177 and 180)

1.4 Legumes

Legumes, which include Munggo, Peanut, and Beans, are also one of the commodities produced in La Union. As per the report, all 19 municipalities and 1 City have planted Munggo with an average productivity level of 1.26 mt/ha and peanut with a total production of 1,923.72 metric tons. In terms of beans, cultivation is limited to Luna and Aringay, which are the only municipalities that planted this commodity for CY 2024.

The Municipality of Luna in District I leads the production of legumes with a total of 1,060 metric tons produced from 250 hectares, with the significant contributions from Bacnotan (239.40 mt) and Rosario (236.70mt). (See Table 189)

1.5 Root crops

In addition to other commodities cultivated in the province, Root crops (Sweet Potato, Gabi, Ube, Cassava, Ginger, & Onion) are also produced with a total volume of 5,139.54 metric tons. Among these various root crops, sweet potatoes stand out as the leading crop, accounting for a substantial 42.87% of the total produce with a yield of 2,203.66 metric tons. (See Table 192)

The Municipality of Naguilian has the highest production across municipalities in terms of sweet potato (380mt), while San Gabriel has the highest production of Ginger (369 mt), Ube (208 mt), and Gabi (272 mt) in Tubao and onion (194 mt.) in Balaoan.

The Municipality of Naguilian leads in sweet potato production, with an impressive total of 380 metric tons, making it the highest among all municipalities. Meanwhile, San Gabriel stands out for its remarkable agricultural output of ginger, producing 369 metric tons. Tubao leads in the production of Ube with 208 metric tons and excels in Gabi cultivation, producing 272 metric tons. Additionally, Balaoan contributes significantly to the province's agricultural production with 194 metric tons of onions.

1.6 Corn

Corn is the second most important crop in the province as well as the entire country. It served as the staple food and ingredients for feeds for livestock. Corn is also processed into high-value products such as starch, oil, gluten, and snack foods. The largest area planted with yellow corn can be found in San Juan of District I, with an area of 582.00 hectares, while Rosario of District II has the biggest production of green corn (240 mt) in District II. (See Table 195)

2. Fishery Production and Sufficiency

The province of La Union boasts a rich marine ecosystem that supports a diverse range of fish species. The province's fishery production is characterized by both marine and inland fisheries activities, with aquaculture gaining prominence in recent years. Fish farms along rivers, ponds, and coastal areas produce tilapia, bangus (milkfish), and shrimp using sustainable aquaculture practices. These practices help meet the growing demand for seafood in the province and beyond, particularly for high-value species like bangus.

In 2024, fishery production in La Union reached a total of 20,079.15 metric tons, providing not only a significant source of income for local fishermen but also a vital source of food for the community.

While the production in almost all municipalities is not sufficient to meet local demand, there was an overall surplus of 1,287.49 metric tons, achieving a decent sufficiency level of 107% for the province of La Union. This surplus comes from the municipalities of District II, specifically Sto. Tomas with 4,739.49 metric tons, Aringay with 1,645.53 metric tons, Agoo with 1,049.89 metric tons, and Luna with an impressive surplus of 518.51 metric tons. Sto. Tomas also had the largest area dedicated to aquaculture fishing, accounting for 40.67% of the provincial total, and was home to the largest municipal fishing area with a 49.07% share. (See Table 204)

3. Livestock Production and Sufficiency

3.1 Livestock Production

Total Production of livestock commodities and poultry has continuously increased from 35,561.91 metric tons in 2022 to 42915.58 metric tons and further increased to 45,041.73 metric tons in 2024. The growth may be attributed to government programs aimed at increasing the animal population through artificial insemination as well as the sustained demand for chevon in "kambingan" stalls.

Modern farming equipment has largely replaced the use of carabao for plowing and harrowing rice paddies. This shift has led to a decline in the carabeef production, as farmers now prioritize dairy production and local milk supplies. Consequently, carabeef production has decreased significantly from 919.43 metric tons in 2022 to 822.70 in 2023, and further down to 802.39 metric tons in 2024. Conversely, Beef production shows an increasing trend from 1,520.70 metric tons in 2022 to 1,594.32 in 2023 and further increases to 2,856.88 in 2024. This growth in Beef production may also be linked to the government program in increasing the population of the animal through artificial insemination.

Figure 25. Livestock Sufficiency Level by Commodity in La Union: 2022-2024

	Beef	Carabeef	Pork	Chevon	Poultry
2022	132	194	89	174	267
2023	137	172	130	165	292
2024	243	166	127	166	304

Source of data: Office of the Provincial Veterinary

Chicken production reflected a consistent upward trend, rising from 21,767.19 metric tons in 2022 to 23,941.95 metric tons in 2023, and further increasing to 25,089.78 metric tons in 2024. This growth was driven by the expansion of both semi-commercial and commercial layer farms owned by individual farmers, and by the substantial broiler commercial (contract growing) operations of poultry integrators, notably San Miguel Foods, Incorporated, Foster Foods, Incorporated, Bounty Agro Venture, and C-Joy.

For other livestock commodities, the fluctuating trend in chevon production is attributed to damages caused by Typhoons “Betty” and “Egay,” which occurred on May 30-31, 2023, and July 25-28, 2023, respectively. This resulted in a downward trend from 337.89 metric tons in 2022 to 321.96 in 2023, before increasing slightly to 326.92 metric tons in 2024, due to high stocks and sustained demand from “kambingan” stalls.

Pork production increased from 11,016.70 in 2022 to 16,234.65 in 2023 but declined by approximately 268.89 metric tons from 16,234.65 metric tons in 2023 to 15,965.76 metric tons in 2024. The decline in growth was attributed to confirmed cases of African Swine Fever (ASF) reported in the municipalities of Balaoan, Luna, San Fernando City, Bangar, Bacnotan, San Juan, Santol, and Rosario.

3.2 Livestock Sufficiency

Sufficiency level in all livestock commodities is fluctuating from CY 2022 – 2024. Despite the observed decrease in the production of Carabeef and Pork, the livestock sector, the province of La Union was still able to meet the requirements for human consumption needs with a sufficiency level of more than 100% in all livestock commodities

Beef production doubled the local consumption requirement by 243%. Similarly, carabeef production reached 166.56% of the demand, ensuring ample supply for the population.

For pork, the production was at 127.00% of the local needs, indicating a surplus that can support both local consumption and potential exports or stockpiling. Chevon (goat meat) production stood at 166.56% of the demand, reflecting a substantial surplus, while poultry production was particularly high, with a sufficiency level of 304.01%. This indicates that poultry products are more than three times the local consumption needs, ensuring a stable and sufficient supply for consumers.

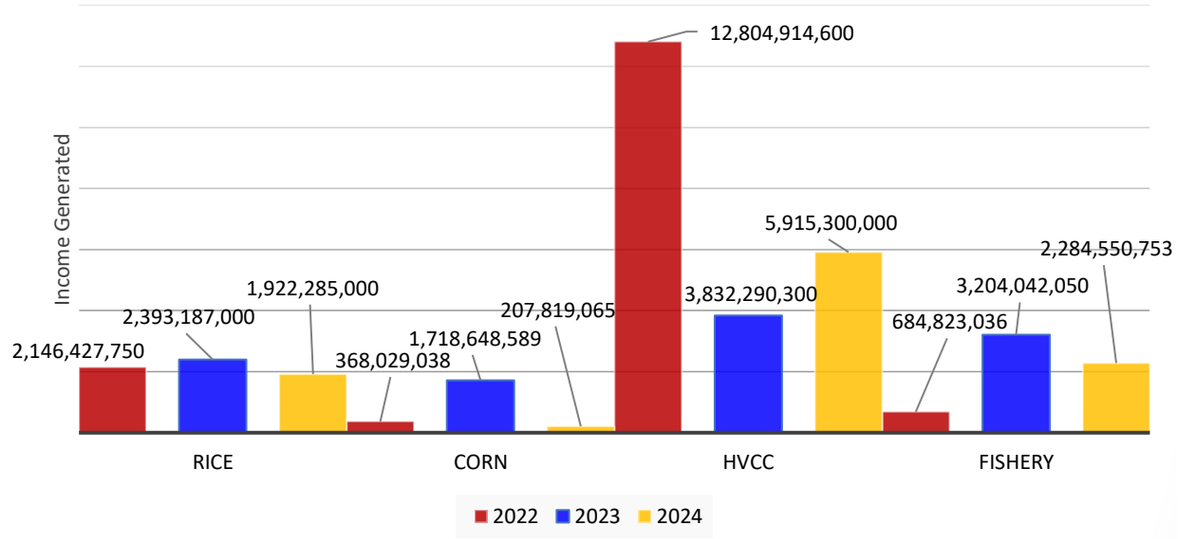
4. Agricultural Income and Employment Generated

4.1 Income Generated

The total income generated, rice shows substantial growth, rising from approximately 2.14 billion in 2022 to 2.39 billion in 2023 and dropping to nearly 1.92 billion in 2024. Corn income declines sharply from about 368 million in 2022 to just over 207 million in 2024. The HVCC sector's income increases from roughly 12.8 billion in 2022 to about 5.91 billion in 2024, reflecting significant growth. Fishery income also sees a marked rise, from approximately 684 million in 2022 to over 2.2 billion in 2024. Overall, the data indicates varying trends across sectors, with some showing consistent growth in employment and income, while others experience fluctuations. (See Table 221)

For the past three years, Fishery had the highest employment generated, from 17,376 in 2022 to 32,383 people in 2024, while HVCC had the highest income generated with a total amount of PhP5,915,300,000.00. Meanwhile, the lowest employment and income generated is in the corn industry, with 390 employment and PhP207,819,065.00 income generated for CY 2024. The low employment and income generated for corn is due to an incomplete report that was consolidated at the provincial level.

Figure 26. Income Generated by Agricultural Commodity in La Union: 2022-2024



4.2 Employment Generated

The total employment generated for the five commodities: Rice, Corn, HVCC, Fishery, is 48,082 people with a total income generated of 10,329,954,817 in CY 2024. Comparing the data reported for the past 2 years, rice employment shows a steady increase from 12,551 in 2022 to 12,730 in 2023, with a slight rise in 2024 to 12,936. Corn employment also grows from 1,476 in 2022 to 1,969 in 2023, but then declines significantly to 390 in 2024. In the HVCC commodities, employment decreases from

Figure 27. Employment Generated by Agricultural Commodity in La Union: 2022-2024

	Rice	Corn	HVCC	Fishery
2022	12,551	1,476	6,070	17,376
2023	12,730	1,969	2,042	20,635
2024	12,396	390	2,913	32,383

6,070 in 2022 to 2,042 in 2023, before increasing again to 2,913 in 2024. Fishery employment increases consistently across the three years, from 17,376 in 2022 to 20,635 in 2023 and further increases to 32,383 in 2024.

5. Livestock Income and Employment Generated

5.1 Employment Generated

Based on the report of the Office of the Provincial Veterinarian, Cattle and carabao raising generated the highest employment provision in terms of man-years, with 6,027 for cattle and 5,646 for carabao. Overall, a total of 16,193 man-years were spent in the industry in 2024, reflecting a significant contribution of livestock and poultry raising to local employment. Employment for carabao, swine, and cattle reflected a continuous increase from 2022 to 2024 due to rising demand for dairy products and meat. In addition to this, government support programs and improved access to veterinary services may have contributed to the growth in employment in these sectors.

In contrast, cattle showed a decreasing trend in employment during the same period, which could be attributed to challenges such as rising feed costs. On the other hand, Chicken and Goat demonstrated a fluctuating trend, possibly due to seasonal factors and market price variations

5.2 income Generated

In terms of income, the total amount generated from the food animal industry was estimated at PHP 6,855,184,630.16. Among the various sectors, the swine industry recorded the highest earnings this year, amounting to approximately PHP 3.2 billion. This sector primarily comprises semi-commercial and commercial farm operations located in the municipalities of Aringay, Balaoan, Bauang, Caba, Luna, Naguilian, Pugo, Rosario, San Gabriel, and San Juan. (See Table 222)

The poultry sector closely followed, with total revenues reaching around PHP 3.0 billion. This includes income from layer semi-commercial and commercial farms operated by individual farm owners, as well as broiler commercial farms engaged in contract growing. These operations are predominantly managed by major poultry integrators such as San Miguel Foods, Incorporated; Foster Foods, Incorporated; Bounty Agro Venture; and C-Joy.

CHAPTER IV – ECONOMIC DEVELOPMENT (TRADE INDUSTRY AND TOURISM)

B. Trade and Industry

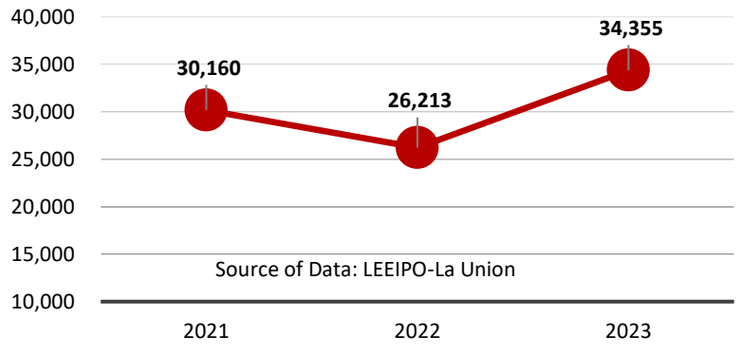
1. Establishments

The Local Economic Enterprise and Investment Promotion Office (LEEIPO) reported that the number of registered enterprises/ establishments operating in the province of La Union decreased from 30,160 in 2021 to 26,213 in 2022 due to the COVID situation and showed recovery to 34,355 in 2023. These figures are consolidated from the submissions collected across the 19 Municipalities and 1 City in the province of La Union. (See Table 224)

The majority of these establishments include bakeries, tailoring and dress shops, rice mills, furniture shops, sash and hollow block factories, and 19 major manufacturing establishments. These are the cement factory in Bacnotan (HOLCIM), the Coca-Cola Plant in San Fernando City, the Pepsi Cola Plant in Rosario, and the five (5) redrying and flue-curing plants (3 in Agoo, 1 in Bacnotan, and 1 in Tubao). Steel Corporation, Ice Plant, Soil Tech Agricultural Products Filipino, Pilipinas Shell Petroleum Corporation, Petron, Caltex, and Shell Depot are also found in San Fernando City. Other establishments found in the province include B-Meg Satellite Plant (Feed mill) in San Juan and Bacnotan, Bauang Private Power Plant Corporation, and the Shell Liquefied Petroleum Filling Station in Rosario.

On the other hand, the Philippine Statistics Authority (PSA) reported that as of 2021, there were 9,909 establishments in the province, more than one-half (8,281or 83.57 percent) offer services, 127 for agriculture, and 1,501 are industries (18-Mining and Quarrying, 1,457-Manufacturing, Electricity, Gas, Steam, and 18- Air Conditioning Supply and 8 Water Supply; Sewerage, Waste Management and Remediation Activities).

Figure 28. Registered Enterprises/Establishments in La Union:2021-2023

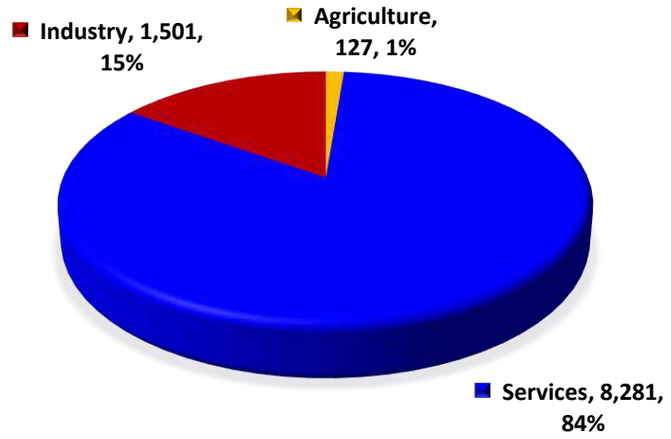


Source of Data: LEEIPU

The discrepancies that exist between the PSA data and the submission from the local government units (LGUs) 2021 primarily because the PSA's figures focus on establishments that generate employment, while the consolidated data from LGUs includes sole proprietorships and other establishments that may not directly contribute to employment figures. (See Table 225)

2. Commerce

Figure 29. Number of Establishment by Area Industry in La Union CY 2021



Source of Data: Philippine Statistics Authority

The majority of Commercial activity in the province of La Union consists mostly of wholesalers and retailers and is concentrated mainly in the City of San Fernando, which is the business center.

Commercial activity in the province of La Union is predominantly driven by wholesale and retail enterprises, reflecting a vibrant local economy that caters to both residents and visitors. These businesses play a crucial role in facilitating the distribution of goods and services, supporting the livelihoods of many residents, and fostering economic growth within the region. The concentration of commercial establishments in La Union underscores the importance of the retail and wholesale sectors as the backbone of the province's economic landscape.

The City of San Fernando, serving as the provincial capital and business hub, is the epicenter of commercial activity in La Union. It hosts a wide array of markets, shopping centers, and wholesale outlets that attract customers from neighboring towns and provinces. This strategic concentration of commerce not only boosts local employment but also enhances the accessibility of goods and services, making San Fernando a vital center for trade and economic development in the region. The city's role as the main commercial hub underscores its importance in shaping the overall economic vitality of La Union.

3. Trends in Consumer Price Index, Inflation Rate, and Peso Purchasing Power

3.1 Consumer Price Index

The overall consumer price index (CPI) in the province, which is a measure of the changes in average price of goods and services that consumers normally purchase, went up to 115 in 2023 from its original level of 110.20 in 2022 and further increased to 118.5 in 2024. The significant increase was observed in the top three major commodity groups: Alcoholic Beverages and Tobacco, which has the highest index at 155.2, followed by Financial Services at 145.3, and Transport at 123.2. Moderate increases were seen in other categories like Alcoholic Beverages and Tobacco, Housing, and Transportation. Conversely, some categories, like Information and Communication and Restaurants, experienced minimal price changes. Throughout the period, the CPI consistently peaked every December, reflecting a recurring seasonal pattern of price increases during the holiday season. (Please see Table 230)

3.2 Inflation Rate

The inflation rate in La Union shows a fluctuating pattern from 2022 to 2024, with varying rates each year. In 2022, the rate generally increased throughout the year, peaking at 4.9% in December. In 2023 reveal a more varied trend is revealed, with the highest at 6.7% in January, while the lowest is 2.3% in July. The year ended with a 4.1% inflation rate. Meanwhile, in 2024, data shows a significant decrease in the inflation rate compared to the previous year, with a low of 1.3% in September and ending the year at 2.4%. (Please see table 230)

3.3 Purchasing Power of Peso

The purchasing power of the peso gradually decreased from 2022 to 2024 with values of 0.91,0.87, and 0.84, respectively. In 2022, the value ranged from 0.89 to 0.93, with the highest recorded in January and February, and the lowest in December. For 2023, the data slightly decreased with values fluctuating between 0.85 to 0.87, wherein the lowest data is the same as the previous year, which also occurred at the end of the year. The data on the purchasing power of the peso continued to decrease in 2024, reaching its lowest in December at 0.83. The downward trend reflects that the power of peso to purchase goods and services has been weakening during the period of study. This means a decline in the value of the currency, from one peso in 2018 is equivalent to only 83 centavos in 2024.

4. Financial Institutions

4.1 Bank

There are a total of 119 banking offices in the province, including branch offices, which are classified into three main categories: Universal/Commercial Banks, Thrift Banks, and Rural Banks. The majority of Universal/Commercial Banks are located in the City of San Fernando, with 27 branches, while Agoo has 8 branches, and each of San Gabriel, Naguilian, Caba, Pugo, and Rosario has 1 branch. Similarly, the majority of Thrift Banks are located in the City of San Fernando, with 9 branches, while Agoo has 2 branches, and each of Bacnotan, Bauang, and Pugo has 1 branch. All municipalities have at least one Rural Bank, except for Burgos and Bagulin.

Most onsite ATMs are provided by Universal/Commercial Banks (62), followed by Thrift Banks (9) and Rural Banks (6)". District I, particularly in the City of San Fernando, has the greatest number of ATMs at 57.14%, with a total of 77 onsite and offsite ATMs. (See Table 234)

Despite the absence of banks in Burgos and Bagulin, each area has at least one ATM from a Universal/Commercial Bank, providing residents with access to basic banking services

4.2 Pawnshops and Other Financial Institutions

Pawnshops and money service businesses play a significant role in the country's financial system. The Bangko Sentral ng Pilipinas (BSP), the central bank of the Philippines, regulates and supervises these entities to ensure that they operate safely and soundly.

2.2.1 Pawnshops

A total of 151 registered pawnshops with the Bangko Sentral ng Pilipinas are situated in the province of La Union. Most of these pawnshops (116) are allowed to operate as Remittance and Transfer Companies (RTCs) with Money Changing (MC)/Foreign Exchange Dealing (FXD) capabilities. The remaining 35 pawnshops belong to the following categories: 22 without Remittance and Transfer Company (RTC) designation; 4 with Money Changing (MC)/Foreign Exchange Dealing (FXD) capabilities only; and 9 with Remittance and Transfer Company (RTC) designation only. (See Table 235)

2.2.2 Money Service Business

Money Service Businesses (MSBs) are entities that provide financial services such as money transmission, foreign exchange, and e-wallet services. In the province of La Union, there are several BSP-registered MSBs that cater to the financial needs of its residents, tourists, and businesses. As of 2023, there were 62 MSBs, with most of them located in business centers: 26 in the City of San Fernando, 10 in Agoo, 6 in Bauang, and 5 in Naguilian. The remaining MSBs are scattered throughout the rest of the municipalities, except for those in Luna, Santol, Bagulin, and Pugo. (See Table 235)

B. Tourism

1. Tourist Destinations

1.1 Natural Attractions

a. Beaches: La Union is known for its beautiful beaches with white and gray sand, such as Bauang Beach, San Juan Beach, and Caba Beach. These beaches offer activities like swimming, snorkeling, diving, and surfing.

b. Island Hopping: Visit the White Sand Beach in Poro Point for snorkeling and scuba diving and explore the nearby islands for their unique geological formations.

c. Mountains: The upland municipality of Bagulin offers trekking trails with scenic views of the surrounding landscape.

1.2 Man-Made Attractions

a. *Historical Landmarks*: Visit the Provincial Capitol Building, Luna Watchtower, Baroro Bridge Markers, USAFIP-NL Military Shrine and Park, Pindangan Ruins, and Museo de La Union to learn about the history and culture of La Union.

b. *Museums*: Explore the Museo de Iloko in Agoo, which showcases Ilocano culture and traditions, and the Museo de La Union in San Fernando City, which features archeological finds from pre-Spanish times.

c. *Pottery Making*: Visit Taboc in San Juan to see traditional pottery-making techniques being practiced.

d. *Blanket Weaving*: Watch weavers at work in Bangar, Rayon, and cotton combination.

e. *Basi Making*: Learn about the traditional process of making basi, a type of wine made from sugar cane juice and "duhat" tree bark.

1.3 Religious Attractions

a. *Churches*: Visit the Shrine of Our Lady of Charity in Agoo, Our Lady of Lourdes Grotto in Balaoan, Filipino-Chinese Friendship Pagoda in San Fernando City, and Macho Temple in San Fernando City.

b. *Festivals*: Join the Agoo Semana Santa procession during Holy Week, the Feast of Our Lady of Casaysay in September, and the San Fernando City Fiesta in February.

1.4 Special Interest

a. *Surfing*: Try your hand at surfing at Monaliza Beach Cottages in Urbiztondo, San Juan.

b. *Trekking*: Explore the hills and mountains of Bagulin for scenic views and trekking trails.

c. *Scuba Diving*: Dive at Fagg Reef, Research Reef, Tamyo Reef, Fourteen Mile Reef, or Black Buoy for an underwater adventure.

d. *Hiking*: Enjoy an exhilarating hike at Arosip Ecotrail in Bacnotan. The trek is 6.5 kilometers long, and you'll be greeted by several falls along the way, including Zim-sim-ug Twin Falls, Padtok Falls, and Tekdag-Aso Falls.

e. *Nightlife*: San Juan is the hub of excitement and activity, where you'll find the best nightlife in La Union

f. These destinations offer a mix of natural beauty, cultural heritage, history, and adventure activities that cater to various interests and preferences.

2. Tourist Attraction

In 2024, La Union recorded a total of 1,480,072-day tourist arrivals at its major attractions. The majority of these visitors were drawn to the surfing areas of San Juan, which welcomed 416,869 tourists. Other popular destinations included Eco Fun World in Agoo, with 363,130 visitors, and the Halo Halo de Iloko, which attracted 267,779 visitors. Immuki Island had 124,477 tourists; Bahay na Bato, which received 91,040 visitors, and Kamay na Bato in Luna with 49,746 visitors. Pugo Adventure in Pugo had 80,099 visitors; Tangadan Falls in San Gabriel attracted 61,470 tourists, and the Grape Farms in Bauang recorded 25,502 visitors. (See Table 239)

3. Tourist arrivals

3.1 Tourist arrival in establishments

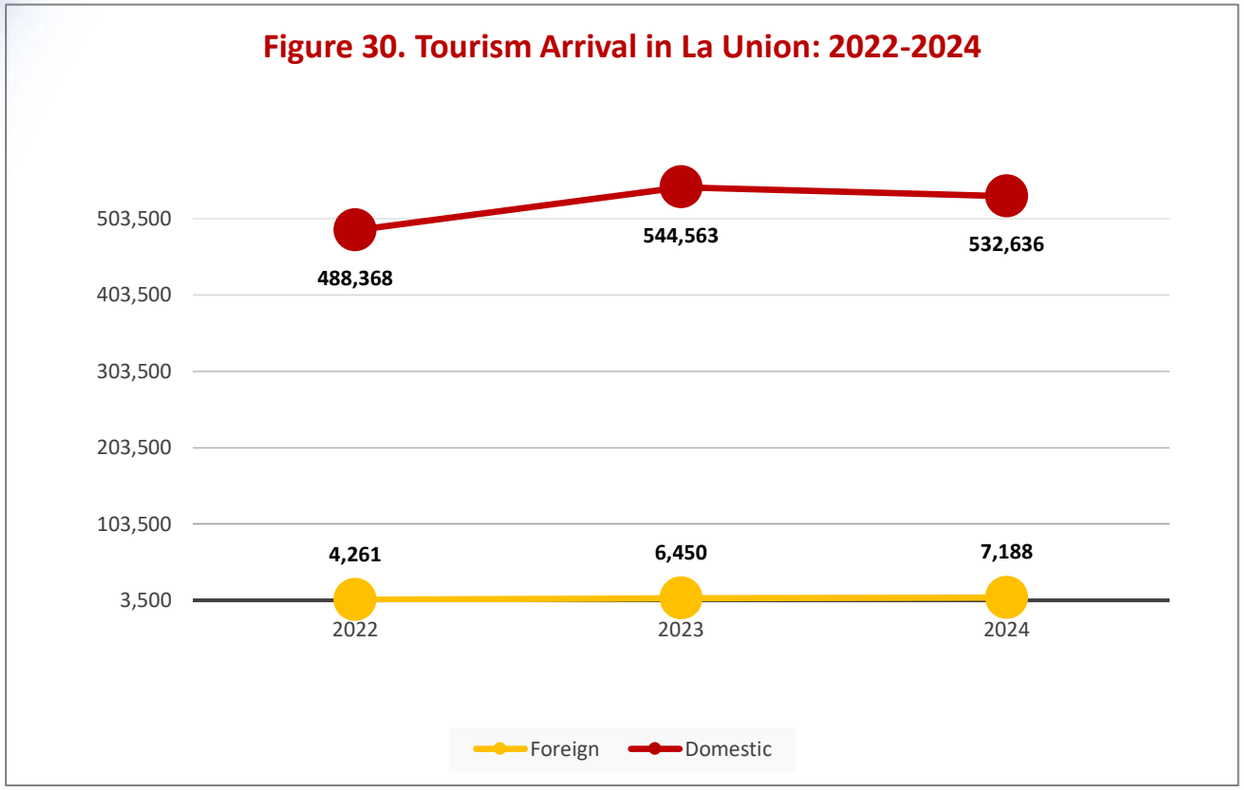
The number of tourist arrivals in the different establishments of La Union has increased from 492,629 in 2022 to 550,359 in 2023 and slightly decreased to 539,824 in 2024. The decrease is attributed to an incomplete report that was consolidated for the provincial level.

The majority of tourist arrivals are concentrated in District I, which accounts for 64.44% of the total arrivals. District II accounts for around 35.56%.

Across all municipalities, San Juan has experienced a significant increase in tourist arrivals from 2022 to 2023, which escalated to 54.42% and followed by a slight decrease of 2.08% in 2024. Similarly, the municipality of Bauang saw an increase of 26.15% in the same period and continuously increased from 108,740 in 2023 to 105,527 in 2024. Additionally, it was observed that Naguilian had no tourist arrivals in 2022, but it began receiving tourists in 2023 and 2024. The same applies to Burgos, which reported 160 visitors in CY 2024. It is also worth mentioning that the municipalities of Santol, San Gabriel, and Bagulin reported no tourist arrivals, primarily due to the lack of accommodation establishments in those areas. (See Table 238)

3.2 Tourist arrivals by source of origin

In 2024, the province received approximately 540,000 tourists, mostly domestic travelers. International visitors numbered around 7,200, with the largest groups coming from China, Korea, Japan, and the United States. The province's international visitors also included tourists from Europe, Oceania, Africa, and other parts of Asia, the Middle East, and America.



The number of foreign overnight stays increased significantly from 4,261 in 2022 to 6,450 in 2023 and further increased to 7,188 in 2024, representing an average growth rate of 31.41%, while the Domestic overnight stays recorded an increasing trend from 488,368 in 2022 to 544,563 in 2023 and slightly decreased to 532,636 in 2024.

The average length of stay increased by .04 points from 1.29 days in 2022 to 1.33 days in 2023, and slightly decrease to 1 day in 2024 same picture was observed in the average occupancy rate which improved by 2.23 points from 19.78% in 2022 to 22.01% in 2023 and slightly decrease to 18.20 % in 2024.

This trend may be attributed to tourists' tendency to stay overnight in one accommodation before transferring to another hotel to enjoy different amenities and experiences across La Union. Such behavior results in a decreasing average length of stay while simultaneously contributing to an increase in overall occupancy rates.

4. Travel and Tours

The travel and tours sector had a strong presence of accredited entities, with 14 in 2022 and 13 in 2023, respectively, and very few non-accredited entities, totaling only 1 and 3. This shows that most operators were maintaining proper accreditation, reflecting a relatively stable and compliant industry environment at that time. However, by 2024, there was a noticeable shift: the number of accredited entities decreased to 10, while non-accredited entities surged to 19. This trend points to a decline in accreditation among operators, possibly due to stricter standards, resource constraints, or other compliance challenges.

5. Hotels, Resorts, Motels, Inns

La Union offers a total of 519 hotels and tourist inns to choose from in 202, with options ranging from luxurious 5-star hotels to budget-friendly guesthouses and inns. The number of accommodations continuously increases, reaching 309 in 2023 to 519 in 2024. Whether you're looking for luxury, mid-range comfort, or an affordable stay, La Union has something for every traveler's taste and budget. With so many options, prioritize your needs and choose a place that suits you best, considering factors like location, amenities, and reviews. The highest number of establishments is concentrated particularly in San Fernando City and San Juan.

For CY 2024, San Juan posted a total of 235 accommodation establishments, representing 45% of the total accommodations in the province. This is closely followed by the City of San Fernando, which has 129 accommodation establishments.

6. Restaurants/Dining and Rest Areas

Beyond the province's extensive range of resorts, hotels, and lodging houses, La Union offers a vibrant food scene with 205 restaurants, dining establishments, and rest areas (18 Accredited and 187 Non-Accredited) that cater to tourists in 2022. This culinary landscape expanded significantly in subsequent years, increasing to 231 establishments in 2023 and reaching 389 in 2024. Many of these eateries are conveniently located along the beaches, providing a stunning backdrop of La Union’s renowned sunsets.

Whether you're in the mood for local specialties or international cuisine, you'll find a wide variety of options to suit your taste buds. San Juan and San Fernando City host the highest number of restaurants, but most remain non-accredited. Other municipalities have only non-accredited establishments. While some municipalities have a relatively higher proportion of accredited restaurants. (See table 236)

7. Annual Fiestas/La Union Day

The municipalities in the province celebrate their rich cultural history through Parochial and Patron Fiestas, which showcase their connection to the Christian faith and unique traditions. The City of San Fernando's fiesta is particularly notable, featuring activities like boxing, motocross, and a beauty contest with celebrity guests, as well as the encouraging prices of bargains that are present during the one-month-long celebration

The province of La Union commemorates its founding anniversary every 2nd of March with a series of activities and events that take place throughout the month. This grand celebration is made possible through the collaboration of various government offices and is eagerly anticipated by locals and visitors alike. Some of the events are the coronation of Mutia ti La Union and the Ayat Festival that celebrates the province’s history and culture.

All Local officials and PGLU employees are gathered in front of the Provincial Capitol to participate in the simultaneous flag raising, a major activity in the celebration of the province's Founding Anniversary." (See Table 240)

8. Market Days

The Province of La Union is renowned for its vibrant market days, a tradition that brings together the vendors to trade their products. Each municipality has its own distinct market day schedule, with the majority operating two-day markets. However, Balaoan in District I and Rosario in District II have a more compact schedule, with three market days.

In contrast, the municipalities of Luna, Sudipen, and Bagulin have a shorter market day duration, with each having a single day dedicated to trade and commerce.

Regarding market facilities, the Municipality of Bacnotan is renowned for its modern infrastructure, featuring a well-equipped elevator that provides convenient access to the second and third floors of the market, reflecting its commitment to enhancing accessibility and customer convenience, particularly for the elderly and persons with mobility challenges. (See Table 240)

Table of Contents

Table Number	Particulars	Page Number
223	Existing Major Resources, Potential Industries, and OTOP/Major Industry by Tourism Circuit and by District/Municipality/City in La Union:2023	355

CHAPTER V – INFRASTRUCTURE DEVELOPMENT

A. Infrastructure and Utilities

1. Transportation

La Union boasts a well-developed public transportation system that caters to the needs of both residents and tourists. The province offers a range of affordable transportation options, including buses, jeepneys, tricycles, and taxis.

Several bus companies operate in La Union, providing daily trips to major cities such as Manila, Baguio, and Dagupan. Some of the prominent bus companies in the province include Partas, Bataan, Maria de Leon, and Viron.

Jeepneys are widely available in La Union and offer an affordable way to get around the province. Tricycles are a popular mode of transportation in rural areas, particularly in towns with limited road infrastructure. Tricycles can be distinguished by their body colors, which are assigned by each local government unit.

Taxis are also available in the City of San Fernando, providing a convenient option for those who prefer a more personalized transportation experience.

1.1 Land Transportation

a. Roads

The province has a comprehensive road network spanning approximately 2,591.28 kilometers, comprising various pavement types such as concrete, asphalt, gravel, and unsurfaced roads. Using the standard road-to-population ratio—2.4 kilometers per 1,000 people for urban areas and 3.9 kilometers per 1,000 for rural areas—the estimated required road length for La Union's population of 822,352 is approximately 2,590.41 kilometers. Based on an average ratio of 3.15 kilometers per 1,000 population, the existing road length slightly exceeds this standard requirement. Therefore, with 2,591.28 kilometers of roads, the province's road network is within the acceptable range, indicating it is adequate for the current population. (See Table 241)

National roads comprised about 11 percent of the total road length, serving as the primary arteries that connect La Union to neighboring provinces and major urban centers. These roads are crucial for regional trade, commerce, and mobility.

The remaining portions of the road network are managed at the provincial, municipal, and barangay levels. Provincial roads account for approximately 10 percent, linking towns and municipalities within La Union and supporting intra-provincial travel. Municipal roads make up about 7 percent, providing access and connectivity

Figure 31. Existing Roads,Type of Pavement, by Administration in La Union:2024

	National	Provincial	Municipal	Barangay
Concrete	109.4320	262.4950	166.7988	1560.2050
Asphalt	161.4510	3.6150	2.0616	2.3800
Gravel		0.1630	1.2746	29.3644
Earthfill/ Unsurfaced		0.5910	17.3800	274.0703
Total	270.8830	266.8640	187.5150	1866.0197

Source of Data: DPWH District I & II, Office of the Provincial Engineer and 20 LGUs

within individual towns and cities. The largest share, around 72 percent, consists of barangay roads, which are vital for local mobility, enabling residents to reach markets, schools, health facilities, and other essential services within their barangays.

The paved road network in the province was placed at 2,265.3034 kilometers or 87.42% of the total surface area of roads. District I had a bigger share in terms of paved road network, comprising 52.0584 percent (1,348.98 km) of the province's total.

La Union's unpaved road is 325.9783 kilometers or 12.58 percent of the overall road network of the province. District I have the greatest proportion in terms of unpaved road distribution (3.2012 percent), particularly in barangay, while unpaved provincial, municipality/city roads are still seen in both districts. (See Table 242)

b. Registered Transport Vehicles

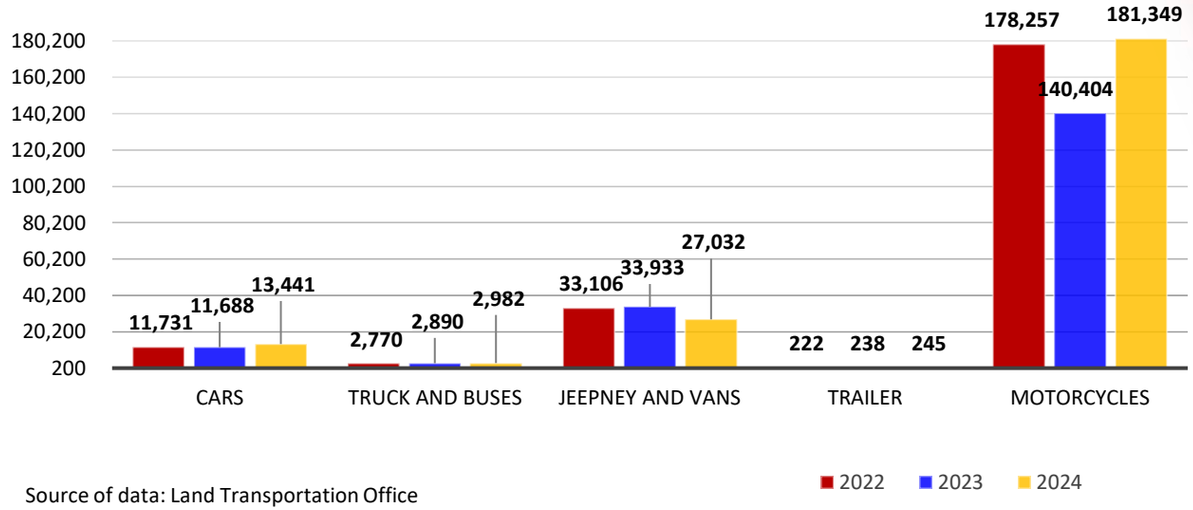
As of 2024, La Union boasts a total of 225,049 registered transport vehicles. This includes approximately 13,441 cars, primarily serving individual and family needs for daily commuting, errands, and leisure travel. Trucks and buses comprising 2,982 are indispensable for the movement of goods and passengers, facilitating commerce and providing public transportation services across municipalities and to neighboring regions. Jeepneys and vans, with a total of 27,032 registered units, form the backbone of intra-municipality mobility, predominantly serving residents and commuters within barangays, thus ensuring accessibility and connectivity at the grassroots level.

A substantial portion of the vehicle count, 81% consists of motorcycles and tricycles, their affordability, maneuverability, and fuel efficiency make them the preferred mode of transport for many residents, especially in rural and congested areas. These vehicles are also easy to park and economical to operate making them indispensable in life.

Finally, 245 trailers are utilized for transporting larger quantities of agricultural produce, raw materials, and commercial goods, supporting the province's economic activities. Utility vehicles, including pickups and vans, comprise approximately one-third of the total vehicle count, playing a crucial role in transporting goods, equipment, and services across various communities. (See table 253)

The trend over the recent years, number of registered transport vehicles was recorded at 226,086 in 2022, decreased to 189,153 in 2023, and then rebounded to 225,049 in 2024. This indicates growth in transportation resources over the observed periods, which has significant implications for both transportation and commerce.

Figure 32. Registered Vehicles in La Union by Type in La Union:2022-2024



Source of data: Land Transportation Office

c. Bridges

Bridges in the province had a combined length of 15,066.42 lineal meters. spanning approximately 5,036.97 meters for national bridges, 1,773.75 meters for Provincial,1,753.65 meters for Municipal, and 6,502.05 meters for Barangays. Concrete and steel bridges are predominantly found along the primary roads while secondary and feeder roads often utilize semi-permanent materials like timber and Bailey bridges for cost-effectiveness and ease of deployment. In addition to this are numerous footbridges found in remote areas to facilitate pedestrian access across rivers. Bridges varied on the geographical landscape to enhance connectivity and access to vital services across the province. (See Table 248)

2. Sea Transportation

San Fernando City, La Union Seaport is a significant international port of entry that can accommodate various types of vessels, including cruise ships, roll-on/roll-off (RORO) vessels, motor tankers, barges, cargo vessels, motor tugboats, passenger vessels bound for Batanes Island, and fishing boats (motor banca).

The seaport handles a wide range of cargo, including fertilizer, cement, coal, copper concentrate, gypsum, silica, rice, fuel, and round logs.

In addition to the San Fernando City Seaport, several other non-commercial private seaports operate in La Union province. These include:

- 1590 EC Pier (Bauang Private Power Corporation) in Bauang
- SMC Shipping & Lighterage Corporation in Payocpoc, Bauang
- Isla LPG Corp. in Namonitan
- Seaoil Philippines Inc. in Sto. Tomas
- Seaport facilities in Rabon and Rosario
- Paratong IV Seaport in Bangar

These private seaports cater to both domestic and international trade, providing an additional layer of support for the province's economic activities. (See Table 256)

2.1 Wharves and Piers

Existing wharves and piers within the province are managed by the Philippine Ports Authority and the Poro Point Management Corporation. Under the Philippine Ports Authority, facilities include the 1590-EC Pier in Bauang, La Union, which is equipped with a power plant, unloading bunker, and has a 9-meter deep docking area, and the SMC Shipping & Lighterage Corporation in Sto. Tomas, featuring a 700-meter-long RORO landing suitable for vehicle transport. The Isla LPG Corp. jetty in Rosario supports LPG shipments with a 10-meter-deep dock and pipeline infrastructure, while Seaoil Philippines in Bangar operates a sizable port capable of handling fuel products with a 15-meter deep docking area.

Meanwhile, the Poro Point Management Corporation oversees the San Fernando International Seaport, comprising three piers with lengths ranging from 150 to 200 meters and widths of around 21 meters, designed for versatile port operations accommodating various vessel sizes. In addition to this, the Soiltech Pier in San Fernando spans 315 meters in length with a 20-meter width, indicating its utility for larger cargo vessels. (See Table 255)

3. Air Transportation

The province is accessible via air. The existing airport located in the province is serving the general area of San Fernando. It is classified as a community airport by the Civil Aviation Authority of the Philippines. (See Table 259)

Aircraft passenger traffic in 2024 varied throughout the year, with private flights (13,877) significantly outnumbering government/military flights (267). Total traffic showed seasonal patterns, peak was recorded in the month of August with an average of 132, and off-peak in May (76) and September (79). Passenger Traffic numbers (inbound, outbound, and net) were substantial. (See Table 260)

B. Waterworks and Sewerage Facilities

1. Water Systems

The main sources of water supply for the overall households in the province for drinking, kitchen use, or washing clothes are: (1) shallow wells, (2) deep wells, (3) Spring Development, and (4) Rain Collectors.

The waterworks systems operating under the Local Water Utilities Administration (LWUA) are the Metro La Union Water District, Balaoan Water District, Naguilian Water District, Agoo Water District, and the Rosario Water District.

The main source of water distribution for the Metro La Union Water District is in Lon-oy, San Gabriel; the secondary source is in Cadaclan, San Fernando City. Its operational expansion includes the urban areas of the municipalities of San Fernando City, Bauang, San Juan, Bacnotan, and San Gabriel as its service area. Metro Agoo, Naguilian, and Rosario Water Districts serve the urban areas of the municipalities. (See Table 269)

2. Water Supply

As of 2024, about 175,894 households, or 85.09 percent, are using safely managed Drinking Water Services. Level I recorded a total of 119,712 or percent of the households served, Level II at 10,941 or percent and Level III is 69,913 or 28.20 percent (See Table 279).

3. Irrigation Systems

Figure 33. Validated Irrigated Areas by Irrigation System in La Union: 2022-2024

	2022	2023	2024
Private Irrigation System	0	0	65
Shallow Tube Well	2,884.85	2,860.71	2,870.99
Communal Irrigation System	10,685.56	10,837.29	11,757.42
National Irrigation System	8,085.19	8,392.34	8,555.55

Two major rivers serve as diversion points for irrigation water: the Amburayan River Irrigation System (AMRIS) in the 1st District and the Masalip River Irrigation System (MARIS) in the 2nd District, both part of the National Irrigation System (NIS). In addition to these large rivers, smaller rivers, creeks, and streams have been utilized, with small diversion dams constructed to irrigate farm areas.

A major problem currently faced is the scarcity of base flow in these water resources, primarily due to heavy siltation from their watersheds. This siltation is caused by the kaingin farming system practiced by upland farmers, aimed at developing land suitable for cash crop production.

The validated irrigated areas across municipalities are categorized by different irrigation systems, with communal irrigation being the most extensive, serving 11,757.42 hectares. The National Irrigation System contributes 8,555.55 hectares, while private irrigation systems and shallow tube wells cover 65 hectares and 2,870.99 hectares, respectively. The

variation in irrigation system utilization indicates differing levels of agricultural activity and infrastructure development among municipalities. Service area under national and communal irrigation systems remained consistent from 2022 to 2023 and 2024, except for the municipality of Pugo. In Pugo, the service area reflected a modest increase from 14,919.93 hectares in 2023 to 14,949.93 hectares in 2024. This 5-hectare increase is attributable to the newly implemented Pugo Solar Power Irrigation Project. (See Table 272)

C. Infrastructure Buildings

1. Education

The education infrastructure support in La Union demonstrates a solid foundation for basic education, with opportunities for growth through increased private sector involvement to further strengthen the educational framework. The province has a total of 419 public schools across elementary and secondary levels, with a significant concentration in District II (231 schools) compared to District I (188 schools). The infrastructure appears proportionate to the student population, comprising 341 elementary schools and 112 secondary schools, indicating a well-structured network to facilitate accessible education. At the tertiary level, there are four universities and fifteen colleges, primarily located in the City of San Fernando. In terms of private educational institutions, municipalities in upland areas such as Santol, Sudipen, Bagulin, and Burgos currently have no private schools. (See Table 275)

2. Health

The presence of hospitals across municipalities demonstrates that primary health care in the province is strengthened through the existence of the Ilocos Training and Regional Medical Center (ITRMC) located in the City of San Fernando. The Hospital is supported by six more government hospitals, such as: Balaoan District Hospital, Banotan District Hospital, City of San Fernando Health Office, Naguilian District Hospital, La Union Medical Center, Caba District Hospital, and Rosario District Hospital. In addition to this are the 16 Private hospitals that cater to other patients in need of more extensive health care.

The widespread presence of hospitals across the municipality underscores the strength of primary health care in the province, exemplified by the Ilocos Training and Regional Medical Center (ITRMC) located in the City of San Fernando. This major medical facility is complemented by six additional government hospitals: Balaoan District Hospital, Banotan District Hospital, the City of San Fernando Health Office, Naguilian District Hospital, La Union Medical Center, Caba District Hospital, and Rosario District Hospital.

Furthermore, 16 private hospitals serve patients requiring more specialized and extensive health care services. Together, these institutions form a comprehensive network aimed at ensuring accessible and quality health care for all residents of the province. (See Table 278)

3. Others

All municipalities and cities are equipped with their own municipal or city halls, public markets, and other essential public facilities to ensure efficient governance and service delivery. At the barangay level, each barangay has its dedicated barangay hall and daycare centers to promote localized governance and community welfare.

Continued investment and maintenance in these infrastructures are vital to support effective administrative functions, foster community development, and improve the quality of public services across all levels of local government. (See Table 277)

Based on the comprehensive inventory of Agri/fishery and Livestock support facilities submitted by the Office of the Provincial Agriculturist, the province is equipped with a variety of vital infrastructure to bolster its agricultural and fisheries sectors. These facilities include an air curing shed designed for the proper drying and preservation of agricultural produce, a processing center that facilitates value-adding activities for various farm products, a Flue Curing Ban to regulate and improve tobacco curing processes, and a locally registered meat establishment that ensures the safe and hygienic processing of meat products for local consumption and distribution.

In addition to these support structures, the province boasts two strategically located fish ports—one in Agoo and another in Sto. Tomas—that serve as critical hubs for the landing, storage, and transportation of fresh catch. Furthermore, there are eight designated fish landing centers dispersed across various coastal communities, which facilitate the efficient unloading and marketing of marine resources. Collectively, these facilities and infrastructure components are instrumental in promoting sustainable agriculture and fisheries development, enhancing local livelihoods, and ensuring food security within the province. (See Table 276)

D. Power Supply

All the barangays in La Union are energized under the La Union Electric Company (LUECO) and the La Union Electric Cooperative (LUELCO). LUELCO is serving all the municipalities in La Union with a percentage of 106.41% of the total potential household, while 71 barangays from two municipalities (San Juan and Bauang) and the City of San Fernando are electrified under LUECO with a percentage of 71.11% of the total potential household consumers with connections. (See Table 264)

In terms of consumers' distribution by classification, LUELCO is solely serving 2,233 public buildings, 197 communal water systems, 2 sale-for-resale consumers, and 6,768 BAPA, while 4,948 general services X1, 885 general services X2, and 6 hospitals are under its LUECO services. Residential, industrial, and streetlights are served by either LUECO or LUELCO. (See Table 265)

E. Communication

1. Postal Communication

Postal services were accessible to La Union residents and businesses through a network of 20 post offices in all municipalities. However, from 2022 to 2024, a significant decline was observed in mail volume. The number of posted mails decreased from 143,676 in 2022 to 141,416 in 2023, and finally to 135,495 in 2024. Concurrently, delivered mail volumes saw a drastic drop, from 2,020,377 in 2022 to 1,086,227 in 2023, and 700,673 in 2024. This substantial decrease likely reflects the increasing use of mobile phones for communication, which has made alternative methods of transmitting information more readily available and convenient. In 2024, the monthly average for posted mail was 11,291 pieces, and the average for delivered mail was 58,385. This translates to a total mail volume of 135,495 posted and 700,673 delivered items for the year. (See Table 261)

Private messenger services still exist within the province of La Union, of which are LBC Express, DHL Worldwide Express, JRS Business Corporation, EXL Worldwide Express, Aboitiz, etc. These private messenger services offer a wide range of services to meet the diverse needs of businesses and individuals in La Union. Some of these services include:

- Express delivery: Fast and reliable delivery of packages and documents
- Cargo forwarding: Handling and transportation of goods and cargo
- Warehousing: Storage and management of goods and inventory
- Logistics solutions: End-to-end logistics management for businesses

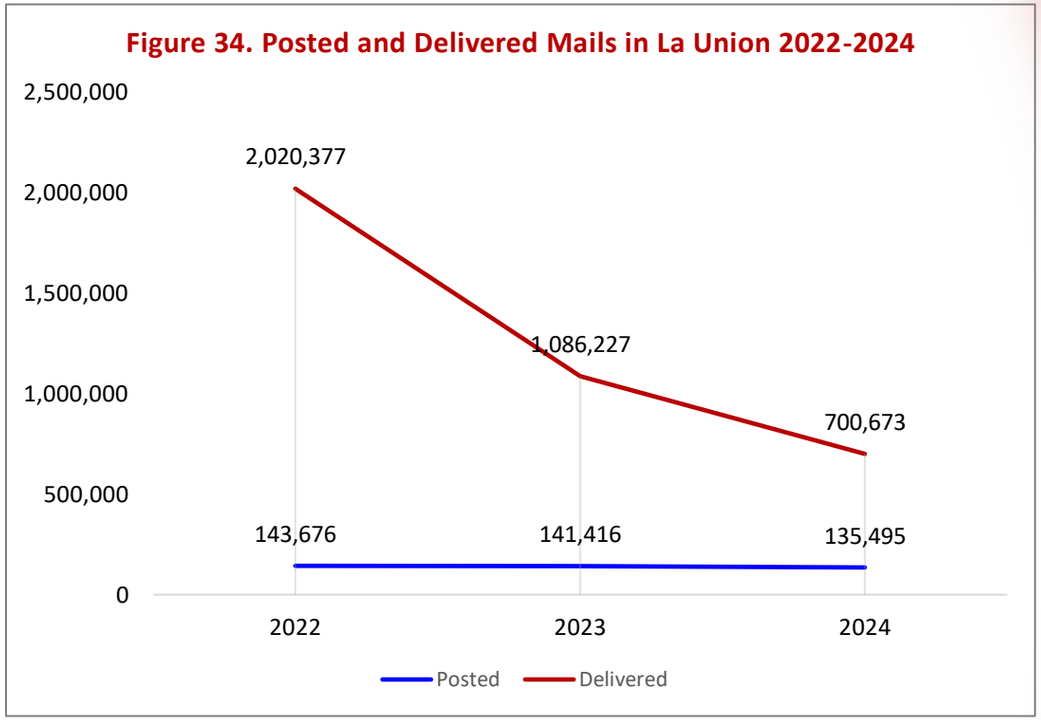


Figure 34. Posted and Delivered Mails in La Union 2022-2024

2. Telecommunication

The province offers a comprehensive telecommunication network, enabling seamless communication through a range of facilities. The area is equipped with advanced telephone infrastructure, providing both domestic and international linkages to cater to the diverse needs of its residents and businesses. Four major service providers, PLDT and three mobile firms – GLOBE, SMART, and DITO – work together to provide robust connections for cellular phones.

The widespread adoption of personal cellular phones in La Union has a significant impact on the traditional landline market. In fact, the number of landline subscribers has decreased from 33,830 in 2022 to 33,563 in 2023 and continuously decreased to 38,796 in 2024, indicating a potential shift in consumer preferences or renewed demand for landline services. (See Table 262)

3. Internet Connections

Major telecommunications providers such as Globe Telecom, Smart Communications, and PLDT have made significant investments to expand their network coverage across La Union, aiming to deliver more reliable and faster internet services in both urban and rural areas. Based on the report of the National Telecommunication Commission, the number of cell sites installed across municipalities increased from a total of 174 in 2023—comprising 66 by Globe, 83 by Smart, and 25 by Dito—to 180 in 2024, with Globe operating 71 sites, Smart maintaining 83, and Dito increasing to 26.

As of 2024, these three companies collectively operate 180 cell sites provincewide, supporting widespread mobile internet access, particularly 4G services, in urban centers. Despite these advancements, rural and mountainous regions may still experience fluctuations in connection quality and coverage limitations due to geographic challenges and limited access to reliable infrastructure (See Table 263)

4. Press and Publications

The province is home to a variety of local community papers that provide news, updates, and insights on local issues and events. These publications include: Amianan Tribune; Ilocos Herald; Norluzonian Courier; Weekly City Bulletin: High Plains Journal Ilocandia; Luzon Sunday Report; Northern Bits News Publishing; and Taud Naguilian

In addition to these local publications, national newspapers and foreign periodicals are also widely available in La Union. The provincial government also publishes its own official newsletter, "Baro a TIMEK ITI KAPITOLYO", which is released quarterly and circulated to the public.

La Union residents can access these publications through various channels: Newsstands, Online, and Distribution centers. By providing a range of media options, La Union's media landscape ensures that residents have access to information on local and national issues, as well as entertainment, education, and other topics that interest them.

5. Radio Stations

The seven radio stations (DZSO Bombo Radyo, City of San Fernando, La Union; DZNL Aksyon Radyo, City of San Fernando, La Union; DZAG Radyo Pilipinas, Agoo, La Union; Love Radio City of San Fernando, La Union; MY FM Communications, City of San Fernando, La Union; Big Sound FM City of San Fernando, La Union; Radyo Natin, Agoo, La Union) in the province work together to provide accurate and reliable information to the public, fostering a sense of community and promoting development through education and awareness. Supporting these radio stations not only helps keep the people of La Union well-informed but also fosters greater engagement in local governance and community development efforts.

6. La Union Facebook Page

The La Union Facebook page is a digital platform that serves as a hub for information, news, and updates about the province. The page is maintained by the provincial government of La Union and is designed to provide a space for citizens, tourists, and stakeholders to connect, share, and discuss various issues and concerns related to the province. To stay updated on the latest posts from the La Union Facebook page, follow these hashtags: #LaUnionPH, #IlocosRegion, #Philippines, #TourismPH, #LaUnionTourism

F. Other Utilities (Machinery and Equipment)

1. Agricultural Equipment

Based on the latest inventory submitted by the Office of the Provincial Agriculturist, there were 133 milling equipment, 21 combine harvesters, and 3,325 hand tractors in the province of La Union.

In terms of drying, the most frequently used is the Multi-Purpose Drying Pavement (MPDP). A total of 496 exist in the province. Some municipalities also use Mechanical Flash Dryers and Flatbed Dryers.

Thresher is the modernized way of separating grain from their chaff and straw which is now massively adopted by farmers as revealed in the number of threshers in the province which is 3,659 though there are still some areas that still practices the traditional way of threshing method which involved beating by hand with a flail. (See Table 271)

2. Construction Equipment

In addition to the equipment that the Department of Public Works and Highways had, there are also available heavy equipment such as Pay loaders, Graders, Haulers, Dump Trucks, etc. at the provincial motor pole. This equipment is maintained to ensure effective support for various infrastructure projects across the province and for clearing operations during calamities.

G. Sanitation Facilities

The basic sanitation facilities among households in La Union for 2024, revealed a significant disparity across various tourism circuits and districts. With a total of 206,706 households, approximately 81.91% have Pour/Flush Toilets connected to septic tanks, while only 6.42% are connected to community sewer systems, and 4.75% utilize Ventilated Improved Pit Latrines.

District II outperforms District I in overall sanitation access, with the latter exhibiting lower percentages for all sanitation types.

H. Other Facilities

1. Provincial/Municipal/Barangay Libraries

1.1 Provincial

The Provincial Library is located on the third floor of the Provincial Administrative Building at Quezon Avenue, City of San Fernando, La Union. Researchers can also access the PGLU Knowledge Resources Hub, which is conveniently available online through the PGLU website. This comprehensive hub contains a wealth of information about the province of La Union, including documents, data, and other resources that can be easily accessed and utilized by researchers.

1.2 Municipal

Each municipality has its mini library for information access, learning opportunities, and serves as a repository of books. The Library of the City of San Fernando is situated in the City Hall Building. Another one was established in 2017, the Alfredo F. Tadiar Library, located at Ortega Highway, Tanqui, San Fernando, La Union. It is known for showcasing Ilocano literature in the province. This is considered a cultural center because, aside from research and law books, it also features arts and crafts made by local artists. This Library is free and open from Wednesdays to Fridays, 12:30 PM to 5:30 PM, and Saturdays and Sundays, 10 AM to 5 PM.

1.3 Barangay

Some barangays in La Union have their libraries, providing residents with access to essential resources and services. These libraries also serve as valuable facilities for students and individuals seeking more information for their theses, academic projects, or other endeavors.

2. Sports Facilities

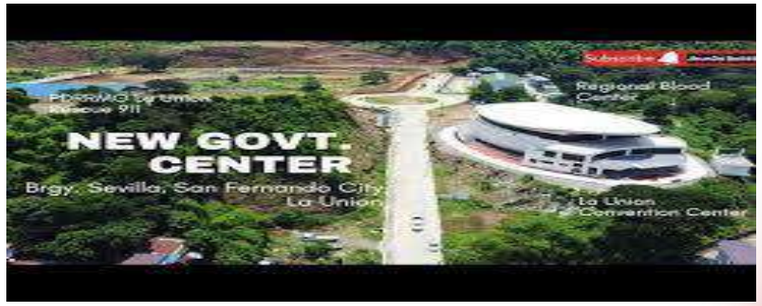
Every municipal plaza and educational institutions throughout the province have playgrounds, basketball courts, volleyball courts, etc., while at the barangay levels, Barangay Youth Councils have established their own playground.

Eight (8) major sports and recreation centers are found in the province, majority are in the regional center (San Fernando City), to wit: Rapok Rapok Bowling Center, Wallace Golf Club, PBP Friendship Ridge Golf and Country Club, Royal Bowling and Recreation Center, DMMMSU Southern La Union Campus, La Union National High School, Ilocos Training and Regional Medical Center and Agoo Civic Center.

The newly constructed Sangguniang Panlalawigan Building now houses a Health and Wellness Gym with sports facilities, supporting the province's Health and Wellness Program by providing employees with opportunities for regular exercise during breaks and after office hours.

3. Convention Facilities

Convention facilities are venues for meetings, conferences, seminars/ trainings, and can be found in the province. To name a few are Bangko Sentral ng Pilipinas, UCCP-Condora Damortis Training Center, Regional Educational Learning Center, DMMMSU-Sapilang, Ariana Hotel, Sobrepeña Civic Center, and the Newly Constructed La Union Cultural Convention Center.



4. Shopping Centers

La Union is home to a vibrant shopping scene that offers a diverse range of retail and entertainment options. Most shopping centers are strategically situated primarily in the heart of San Fernando City, the provincial capital, ensuring they are easily accessible for both local residents and tourists exploring the area. This centralization makes shopping a convenient and enjoyable activity for visitors and locals alike.

Some of the major shopping centers in La Union include CSI City Mall and Manna Mall, both situated in Barangay Biday, these malls serve as popular hubs for shopping, dining, and socializing. The area is currently undergoing further development with the ongoing construction of Shoe Mart at the same location, which is expected to enhance the retail landscape and provide even more shopping options for the community.

In addition, the newly opened Robinsons Mall in Sevilla, San Fernando City, has added a fresh dimension to La Union's retail environment, offering modern amenities, a variety of retail outlets, and entertainment facilities that appeal to diverse preferences. Furthermore, shopping centers are also present in neighboring municipalities, contributing to the overall vibrancy and accessibility of retail services across the province. The growth of shopping centers in La Union reflects the province's broader economic development and increasing consumer demand. These retail hubs are designed to serve the needs of residents, tourists, and business visitors, providing everything from everyday necessities to leisure and entertainment options.

Table of Contents

Table Number	Particulars	Page Number
241	Summary of Existing Roads, Percentage Share, Type of Pavement, by Administration in La Union	386

Table 259. Existing Airport, Location, and Classification: 2024	
Item	**Description**
I. Aerodome	San Fernando Airport
City	San Fernando
Aerodome	San Fernando airport
Classification	Community Airport
ICAO Reference Code	Annex 14
Aerodome Reference Point	16 35 44.17593N, 120 18 11.57355E
Distance and Direction from the City	3.101 Km 29 DEG 45 MIN
Elevation	16 35 22.812N, 120 18 9.56912E
Magnetic Variation	2.0 DEG W(2014)/ 2.1" increasing
Operational Hours	0800H to 1600H
Supervising Authority	BCDA/Poro Point Management Corporation
Transportation Available	Private and Public Transportation
II. Aircraft Operational Data	
Wind Coverage	0 to 20 Knots
Operational Category	Category G
Established Procedures	Arriving aircraft shall enter the traffic circuit on the downwind leg at an angle of 45 DEG, departing aircraft shall follow the traffic circuit after passing the aerodrome boundary, then leave the circuit at an angle of 45 DEG from the crosswind leg.
Local Flying Restriction	RWY01 non-standard traffic pattern(right hand turn) to standard traffic pattern(left hand turn), RWY19 standard traffic pattern(left hand turn) to non-standard traffic pattern(right hand turn)
III. Facilities	
1. Runway	
Designation	01 19
True Bearing	RWY01 005DEG 10' 9.8" GEO 007DEG 02' MAG RWY19 185 DEG 10' 10.9" GEO 187DEG 02' MAG
Dimension	RWY01 1,319m x 45m RWY19 2,120m x 45m
Longitudinal Slope	0.064% downhill towards THR19
Stop way	RWY 01 - 60m ; RWY19 - 801m
Runway Strip	110m
Surface	Concrete
Strength	PCN 46R/A/W/T

Item	**Description**
8. Rescue and Firefighting Facilities	
Vehicle	1992 SIDES Firetruck (SDN 616), 2012 Mercedez Benz Ziegler Firetruck and 2012 Shenyang Jinbei Ambulance (SKW 370)
Level of Protection	Category for Fire Fighting is CAT IV
Number of trained Personnel	9 Personnel ICAO Trained
9. Access Road	
Number	Two
Surface	Asphalt 6,201square meters Conrete 5,313 square meters
Power Supply	Lueco / 500 KVA with ATS/10 sec
Water Supply	Deep well with water pump
Sewerage System	Septic Tank
Drainage System	Reinforced concrete pipe with manhole
11. Others	
Fuel Shed	Reinforced concrete building with 125 square meters
PNP - Aviation Security Group Building	Reinforced concrete building with 86 sqm
SOU- Special Operation Unit	Reinforced concrete building with 32 sqm
12. Vehicle Parking Area	
Area	424 square meters
Capacity	32 allotted
Surface	Asphalt

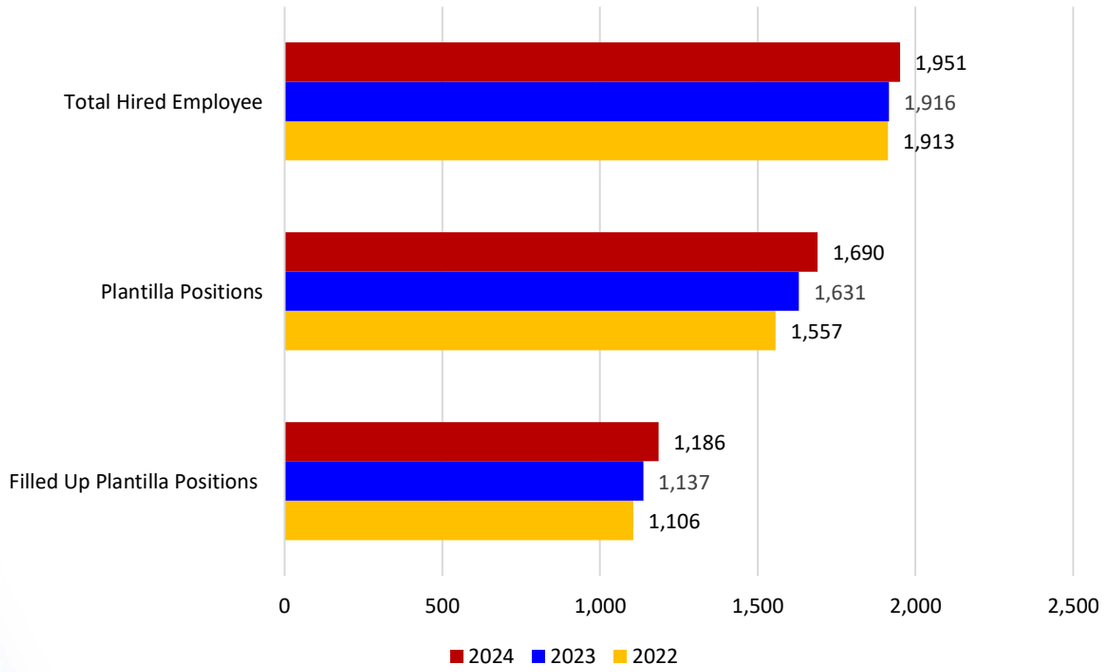
CHAPTER VI – INSTITUTIONAL DEVELOPMENT

A. Organization and Management

1. Organizational Structure

The number of filled plantilla positions filled up in the provincial government of La Union has shown a consistent upward trend, increasing from 1,106 in 2022 to 1,137 in 2023, and reaching 1,186 in 2024. Correspondingly, the total number of employees hired over the same period—including elected officials, consultants, co-terminus, temporary, permanent, casual, contractual, and job order personnel—also exhibited growth, rising from 1,913 in 2022 to 1,916 in 2023, and further to 1,951 in 2024.

Figure 35. Plantilla Positions Filled Up in the Provincial Government of La Union: 2022-2024



However, in terms of percentage of filled up position it reflected that there is a decrease of 1.32% dropping from 71.03% in 2022 to 69.71% in 2023 then increase to 70.18% in 2024. The fluctuation of trend is due to the number of filled positions increased by 31 from 2022 to 2023, but the number of new positions introduced during the same period rose by 74, resulting to a decline in the fulfillment rate.

As of CY 2024, the Provincial Government of La Union has made significant progress in filling its plantilla positions, achieving an impressive fulfillment rate of 70.18%. Out of a total of 1,690 positions, 1,186 have been filled, leaving 448 positions primarily due to financial constraints. To address this issue, the provincial government has implemented alternative measures by hiring 356 casual workers, 188 Contract of Service personnel, and 203 Job Order employees. (See Table 281,282 & 283)

Filled up positions reveals the gender distribution among employees. Males occupy 48.14% of the filled roles, while females make up 51.85%. Additionally, in second-level positions, females significantly outnumber males, with a sex ratio of 2:1 (two females for every one male). Conversely, in first-level positions, males dominate with a sex ratio of 150 males for every 100 females.

2. Procurement

The Agency Procurement Compliance and Performance Indicator (APCPI) for the Province of La Union from 2016 to 2024 reflected a multiple trend. A noticeable increase in APCPI from 2016 to 2018 was observed, where the values rise from 1.95 to 2.59, indicating an improvement in procurement compliance and performance during these years. However, in 2019, the value slightly increases again to 2.68, reaching its peak before a slight decline in the subsequent years. From 2020 onwards, the APCPI fluctuates minimally, with values of 2.59 in 2020, 2.62 in 2021, and then slightly increasing to 2.83 in both 2022 and 2023, before a slight decrease to 2.81 in 2024. Overall, the data suggests a general upward trend in procurement compliance and performance over the years, with minor fluctuations, indicating consistent efforts to improve procurement processes within the province. The slight decline in 2024 may warrant further investigation to understand the factors influencing this change, ensuring sustained performance improvements. (See Table 284)

3. Awards

3.1 Seal of Good Local Governance

The province of La Union has demonstrated a consistent commitment to good governance, as evidenced by its continuous passing of the Seal of Good Local Governance (SGLG) from 2016 through 2018. This recognition underscores the province's effective management, transparency, and service delivery at the provincial level.

At the municipal level, there has been notable progress over the years. In 2016, only five municipalities in La Union successfully met the criteria for the SGLG. This number significantly increased to thirteen municipalities by 2019, reflecting a positive trend towards improved governance standards within the local government units (LGUs). However, the regular assessments for 2020 and 2021 were halted due to the COVID-19 pandemic, which disrupted many government operations and evaluation processes nationwide. (See Table 285)

Following the resumption of the program, there was a slight decline in the number of municipalities passing the criteria, with only nine achieving recognition in 2022. Despite this setback, the region showed resilience and continuous improvement, as evidenced by the increase to sixteen municipalities passing the SGLG in 2023. The upward trend persisted into 2024, with the number rising to eighteen LGUs that meet the standards of good governance.

This progression indicates that an increasing number of local government units in La Union are maintaining and strengthening their governance practices. The consistent rise in the number of municipalities passing the SGLG over the years demonstrates a collective effort among LGUs to uphold transparency, accountability, and effective service delivery, ultimately fostering sustainable development within the province.

3.2 Provincial Government of La Union Recognitions and Awards Received

The number of achievements, recognitions, and awards received by the Provincial Government of La Union shows a fluctuating yet generally upward trend from 2017 to 2024. In 2022, there was a significant increase in total awards, reaching 50, which is the highest within the period. This year also marked the highest number of international awards, with three recognitions, indicating an expanding recognition of La Union's governance on a global scale. Meanwhile, regional awards have been consistently substantial, particularly in 2022 and 2024, reflecting strong regional performance and recognition. The year 2023 experienced a dip in total awards to 27, possibly due to challenges or variations in assessment, but it remains higher than the figures in 2017 and 2018, which were 11 and 24 respectively. (See Table 286)

4. Local Government Units Plans

The Comprehensive Land Use Plans (CLUPs) of the 20 Local Government Units (LGUs) in La Union exhibit a range of plan periods and updating statuses. Thirteen LGUs (Balaoan, Sudipen, Bacnotan, San Gabriel, Bauang, Agoo, Aringay, Caba, Sto. Tomas, Pugo, Rosario, Tubao, and the City of San Fernando) have actively updated their CLUPs, indicating a commitment to aligning their development strategies with current needs and projected growth. Conversely, four LGUs (Bangar, Luna, San Juan, and Burgos) are currently in the process of updating their CLUPs. Two LGUs (Santol and Bagulin) have their CLUPs under review by the Provincial Land Use Committee (PLUC while the municipality of Naguilian is slated for CLUP review. (See Table 289)

5. Election Data

A total of 3,805 precincts were established provincewide clustered to 1,728 precincts. Out of 550,243 registered voters, only 430,617 voted during the local elections with 78.26 percent of turnout on October 30, 2023. All municipalities recorded a range of 84.00-89.00 percent of turnout except for the Municipality of Bacnotan in District I with a percentage of 80.86 and Bagulin in District II with a significant of 90.66.

District II slightly outnumbered the other districts in terms of the proportion of the voting population, the number of precincts and the average number of voters per precinct. All the municipalities including the City of San Fernando posted a percentage turnout ranging from 80-82 except for the three municipalities which is recorded at 74.19% for Luna, 79.20% in Sudipen and 77.49 in Bauang.

Out of the 183,259 registered voters for the Sangguniang Kabataan election, only 143,909 voters voted in the same period of election. This reflected a 78.53 percentage of turnout. (See Table 291)

B. Fiscal Management

1. Revenue

The primary source of income for the province is derived from taxation. This revenue stream includes the internal revenue allotment, real property taxes, and other minor taxes. Additional sources of revenue include incidental revenues, receipts from the operation of public utilities, and aids from national and municipal governments.

For fiscal year, 2022, 2023 and 2024, total revenue steadily increased from amounted to PHP 2,207,525,778.12, with PHP 2,127,705,478.52 (96.38%) allocated to the General Fund and PHP 79,820,299.60 (3.62%) allocated to the Special Education Fund. (See Table 300)

2. National Tax Allotment

The 2022 and 2023 National Tax Allotment (NTA) was determined based on the certification by the Bureau of Internal Revenue (BIR) from the actual collection of National Revenue Taxes in 2020 and 2021. In 2023, the NTA amounted to PHP 1,707,907,987.00, which is significantly lower by PHP 288,942,259 compared to 2022, when it totaled PHP 1,996,850,246.00. This decrease is attributed to the lower revenue collection in 2020, largely influenced by reduced economic activity during the pandemic. (See Table 302)

3. Budget Appropriation and Expenses

The total appropriations for 2022 amounted to approximately PhP3,841,380,130.71, with expenses totaling to 3.022,447,927.20 resulting in a rate of 78.68%. In 2023, the appropriations increase to PhP4,036,410,293.93, with expenses of PhP3,051,530,040.57, leading to a slightly lower rate of 75.60%. For 2024, appropriations are projected to 2,317,574,469.99, with expenses of 2,317,574,469.99, and an expenditure rate of 82.78%, indicating a relative increase in spending efficiency. RA 7171 is included in the 2022 and 2023 appropriation. However, in 2024 RA 7171 is not included, as the supplemental budget for RA 7171 was not approved for that year.

The General Fund consistently holds the largest share of appropriations across all years. Other key classifications include Financial Stability, Economic Dynamism & Competitiveness, Resilient Communities, and Organizational Accountability and Governance, all showing varying trends in appropriations and expenses. The 5% PDRRM Fund exhibits a significant increase in appropriations from 2022 to 2023, while allocations for RA 7171 and Special Education Fund allocations also show upward trends. All the data indicates a steady growth in appropriations, with expenses generally following suit, and a slight increase in spending efficiency as reflected by the rising rate in 2024. (See Table 304)

4. Income Class

Based on Republic Act No. 11964, titled “Schedule of Income Classification for the First General Income Reclassification of Provinces, Cities, and Municipalities,” Local Government Units (LGUs) are categorized into five income classes. This classification is determined by their average annual regular income over the three fiscal years preceding the reclassification.

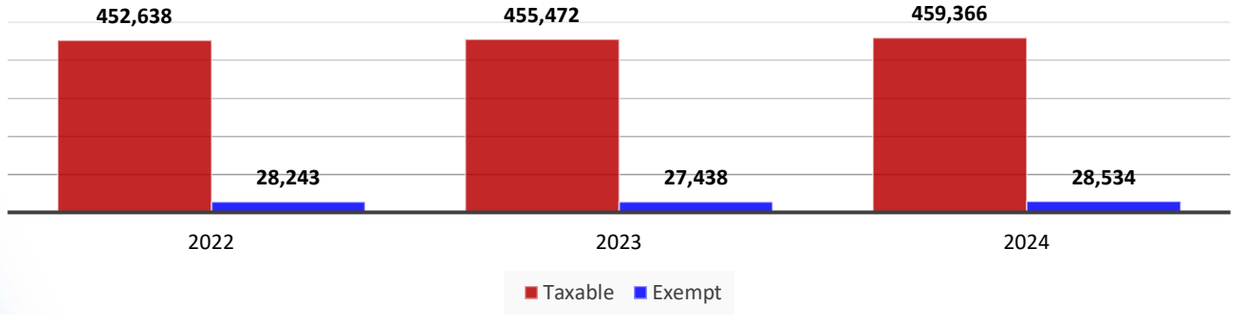
For 2024, the City of San Fernando has been classified as a Class C component city, while the province remains a first-class province.

Within the province, the Second District has a higher concentration of municipalities in the first income classification category, with four municipalities: Bauang, Naguilian, Agoo, and Rosario. In contrast, the First District has two municipalities in this category: Balaoan and Bacnotan. Both districts also include municipalities falling under the second income classification category; San Juan in the First District and Aringay in the Second District. Similarly, both districts have an equal number of municipalities classified under the fourth income category. The First District includes Santol, Sudipen, and San Gabriel, while the Second District comprises Caba, Sto. Tomas, and Tubao.

For the third income class, all municipalities are concentrated in the First District, including Bangar and Luna, which also encompasses the lone city, San Fernando, classified as a Class C component city, while municipalities classified under the fifth income class are predominantly located in the second district, including Bagulin, Burgos, and Pugo. (See Table 305)

5. Real Property Assessment

Figure 36. Number of Parcel of Real Property in La Union:2022-2024

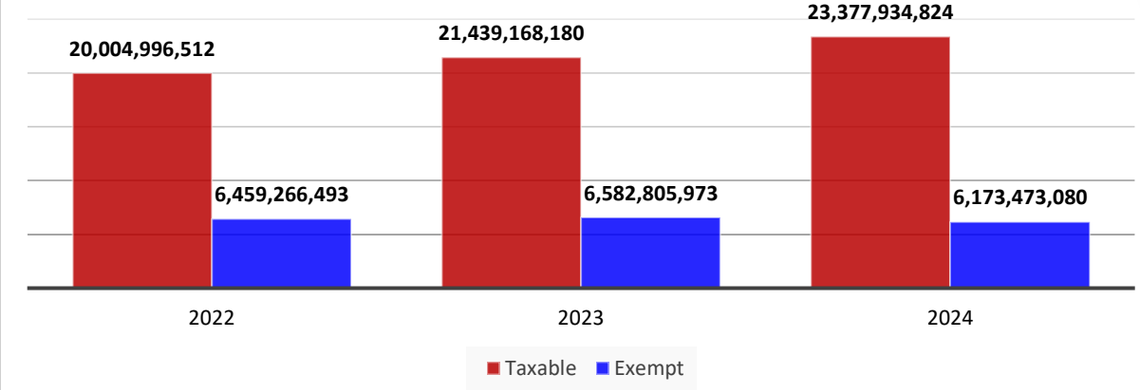


In 2022, the province was composed of a total of 480,881 land parcels. Following comprehensive appraisal and assessment operations, it was determined that, out of these, 452,638 parcels were subject to taxation, while 27,438 parcels were classified as exempt from tax collections. This data reflects the initial land asset profile for that year.

Moving into 2023, the total number of land parcels experienced a slight increase, rising to 482,910. The breakdown indicates that 455,472 parcels are taxable, with the remaining 27,438 classified as exempt. The trend of increasing land holdings continued into 2024, with the total parcels reaching 487,900. This figure includes 459,366 taxable parcels and 28,534 exempt parcels. The surge in the number of land parcels is primarily driven by heightened demand for residential land development, urban expansion, and the implementation of various government improvements and infrastructure initiatives.

Correspondingly, the assessed valuation of these land parcels has shown a consistent upward trend over the same period. In 2022, the total assessed value stood at approximately PHP 20,004,996,512. This figure increased to PHP 21,439,168,180 in 2023, and further increased to PHP 23,377,034,824 in 2024, reflecting growth in land value assessments due to development within the province. (See Table 305 and 306)

Figure 37. Assessed Value of Real Properties in La Union:2022-2024



6. Real Property Tax Collection

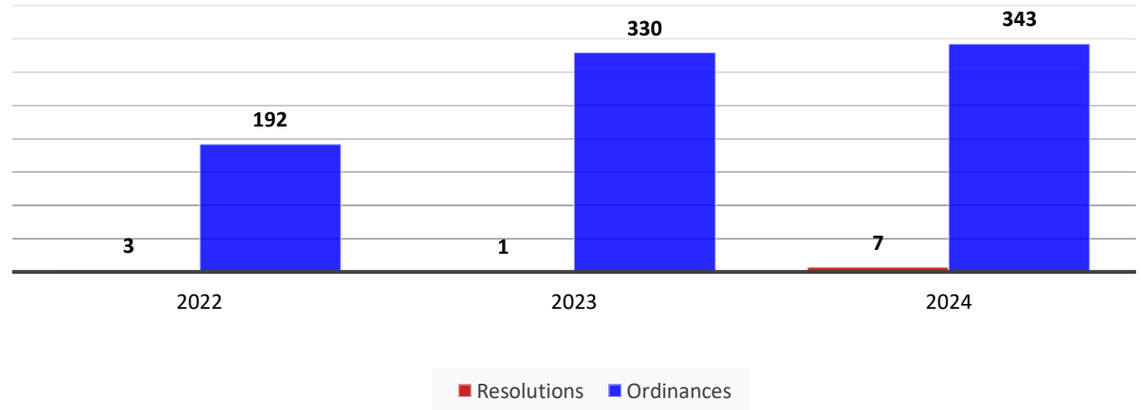
The actual collections for Real Property Tax (RPT) in the province reached a notable high of PhP 585,689,730.39 in 2022, which included the City of San Fernando. However, this figure declined significantly in subsequent years, dropping to PhP 480,540,797.03, and slightly increased to PhP 490,979,213 in 2024. This downward trend can be attributed to the unusual high collection in 2022, primarily due to a lump-sum payment of RPT delinquencies, which temporarily boosted collections. Among all municipalities/City, San Fernando City posted the highest collection, while the Municipality of Burgos recorded the lowest figures, indicating room for improvement in its collection efforts.

The efficiency rating is calculated as the ratio of actual collection to the total collectible tax, serving as an indicator of how effectively municipalities are collecting their due taxes. Among all municipalities in the province, Bauang consistently emerged as the top performer, maintaining the number one rank from 2022 through 2024. Notably, Bauang achieved remarkable efficiency ratings of 858%, in 2022, 220% in 2023, and 190% in 2024, demonstrating its strong collection performance. However, despite retaining its top position, both the efficiency rating and the actual amount collected have shown a declining trend over the years. This decrease can be attributed to the reduced share received from the 5190 corporation, which impacted overall collections. The performance of other municipalities and cities exhibited a mixed pattern, with some showing gradual improvements each year. These efforts are reflected in their improved rankings in 2024, indicating a concerted drive toward enhancing collection efficiency. (See Table 307)

C. Legislative Output

1. Resolutions and ordinances

Figure 38. Resolution and Ordinance Reviewed at the Office of the Provincial Legal Officer of La Union:2022-2024



The number of ordinances forwarded for review by the Office of the Legal Officer reflects heightened legislative activity, with a continuous increase from 192 in 2022 to 330 in 2023 and 343 in 2024. Conversely, the number of resolutions reviewed appears to fluctuate across municipalities and cities. This fluctuation may indicate shifts in the volume of legal issues or changes in policy priorities within the local government units. The Office of the Legal Officer remains actively committed to supporting local government units by providing legal guidance and ensuring that ordinances are well-crafted to promote effective governance, even as the volume of resolutions varies across municipalities/city. (See Table 288)

D. LGU-NGO-PO Linkages

1. Accredited Civil Society Organizations

In the management of development programs in the province, non-government organizations, and private and civic organizations are encouraged to mobilize active partners in the delivery of basic services. Likewise, all NGOs in the province are invited to apply for accreditation with the Sangguniang Panlalawigan to choose their own respective Special Bodies like the Executive Committee of the Provincial Development Council (PDC), Health/School Board, Pre-Qualification, Bids and Awards Committee (PBAC), etc.

A total of 421 Civil Society Organizations (CSOs) have been accredited by the Sangguniang Panlalawigan, as mandated by Department of the Interior and Local Government Memorandum Circular No. 2022-083 and Provincial Ordinance No. 314-2021. This accreditation aims to ensure that government programs and projects are implemented effectively and efficiently in the province.

The breakdown of accredited CSOs reveals that farmers' associations lead the pack with 202 registered organizations, followed closely by 111 Non-Government Organizations. Cooperatives, farmers and fisherfolks associations, labor associations, and people's organizations also have a significant presence, with 75, 19, 7, and 2 registered organizations, respectively. (See Table 292-293)

Table of Contents

Table Number	Particulars	Page Number
281	Functions and Percentage of Filled and Unfilled Plantilla Positions by Office in the Provincial Government of La Union: 2024	449
