

Information for Authors

All the papers are submitted and published in English. Authors should submit only papers presenting results of their original research not previously published and not under consideration for publication elsewhere. Authors are requested to prepare the manuscript following the instructions carefully before submission. Corrections/alterations should be avoided after acceptance.

On-line submission of manuscripts to *Sādhana*
(www.editorialmanager.com/sadh/)

Subscription Information

Institution: One year — Rs 800

Personal: Two years — Rs 700

International subscriptions are processed by
Springer (www.springer.com)

The Americas (North, South, Central and the
Caribbean): customerservice@springer.com

Outside the Americas: subscriptions@springer.com

SĀDHANĀ

ACADEMY PROCEEDINGS IN ENGINEERING SCIENCES

Published by

Indian Academy
of Sciences

Springer

Sādhanā — *Academy Proceedings in Engineering Sciences* was started in 1978 after it split from being a part of the *Proceedings of the Indian Academy of Sciences* Section C, and was renamed *Sādhanā* in 1984. The word *Sādhanā* in Sanskrit means “accomplishment, proof, instrument or tool,” all conveying the sense of physical achievement that is central to successful engineering.

ISSN	0256-2499 (print)
eISSN	0973-7677 (online)
Frequency	12 issues per year

Aim and Scope

The journal covers all branches of engineering science and technology including mechanics (fluid, solid, thermal), computer science, electronics, energy, aerospace technology, materials science, nuclear engineering, systems analysis, alternative technologies, etc. The journal focuses on papers that are relevant to more than one professional group, either because the work is fundamental or because it reflects the best in current technology. The journal also encourages critical reviews, especially on subjects of interest to the country. Papers on developments in Indian technology must pay special attention to the problems peculiar to the country in such projects.

Co-publishing arrangement with Springer

Sādhanā is distributed in print outside India and online worldwide by Springer, co-publisher of the journal together with the Indian Academy of Sciences. The journal is part of SpringerLink (www.springer.com/12046), one of the world's leading interactive databases of high quality STM journals, book series, books, reference works and online archives collection. Print subscriptions within India and open online access are served from Indian Academy of Sciences.

Peer review system

Sādhanā has a three tier Editorial Board with the Editor, seven Senior Associate Editors and more than 66 Associate Editors, and a galaxy of subject expert reviewers. All submitted papers are rigorously reviewed by a Senior Associate Editor, an Associate Editor and 2-3 Reviewers.

Special issues

Sādhanā brings out special issues on theme-based topics or in the frontier areas of engineering sciences. Regular papers, review articles and survey papers and proposals for special issues are reviewed by the Editorial Board. All these need to be submitted to the Editor in a prescribed format that is available on the *Sādhanā* website.

Special issues/sections published in 2015:

- Fluid Mechanics and Fluid Power and International Union of Theoretical and Applied Mechanics (IUTAM) Symposium: Deformable Tubes
- Applications of Data Sciences
