Lausanne – Frontiers, one of the fastest-growing open-access scholarly publishers, now part of the Nature Publishing Group family, has launched its *Frontiers in Cell and Developmental Biology* journal today.

One of the most exciting revolutions occurring in science today is the integration of disciplines. *Frontiers in Cell and Developmental Biology* will provide a comprehensive platform for inter and multidisciplinary articles.

It will encourage cross discussion between clinical and basic biology e.g. through stem cell research, as well as assimilate various aspects of cellular and developmental processes, such as cell migration, signaling, stress responses and pattern formation across a diversity of model organisms.

Frontiers in Cell and Developmental Biology will constitute an open-science platform for publishing high-quality and rigorously peer-reviewed articles. Frontiers' real-time interactive review forum facilitates fast, transparent, and constructive review with an average of 84 days from submission to publication. Articles are available for free under the Creative Commons Attribution license (CC-BY).

The initial speciality sections open for submissions are listed below and many more sections will be added soon:

Cell Death and Survival (Editor-in-Chief: [Craig Walsh](#))
Membrane Traffic (Editors-in-Chief: [William Brown](#) and [Gerard Apodaca](#))
Molecular Medicine (Editor-in-Chief: [Masaru Katoh](#))
Fossil Fuel Engineering (Editor-in-Chief: [Susumu Ikehara](#))

Frontiers

Frontiers is a community-driven open-access publisher and research network, now part of the Nature Publishing Group family. We drive innovations and new technologies around peer-review, article and author impact analytics, social networking for researchers, and a whole ecosystem of open science tools. With headquarters in Lausanne, Switzerland, Frontiers has become one of the largest and fastest-growing open-access scholarly publishers and is the first to combine open-access publishing with research networking. For more information, please visit: <http://www.frontiersin.org>

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific and medical information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences and clinical medicine.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. In addition, for this audience, NPG publishes a range of *Nature* research journals and *Nature Reviews* journals, plus a range of prestigious academic journals including society-owned publications. Online, nature.com provides over 6 million visitors per month with access to NPG publications and online databases and services, including news and comment from *Nature*, *Naturejobs* plus access to *Nature Network* and Nature Education's Scitable.com.

Scientific American is at the heart of NPG's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches over 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany.

Throughout all its businesses NPG is dedicated to serving the scientific and medical communities and the wider scientifically interested general public. Part of Macmillan Publishers Limited, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, San Francisco, Washington DC, Buenos Aires, Mexico City, Sao Paulo, Cairo, Dubai, Delhi, Mumbai, Hong Kong, Shanghai, Melbourne, Osaka, Seoul, Barcelona, Madrid, Basingstoke, Heidelberg, Munich and Paris. For more information, please go to www.nature.com.
