Macmillan Science Communication (MSC), an exclusive partner of Nature Publishing Group (NPG), is proud to announce its first workshop in New Delhi on the 29 November 2013. Sponsored by Jawaharlal Nehru University (JNU), the intensive workshop will help one hundred researchers from across India improve their scientific writing skills and learn about the editorial processes at a top-tier journal. The one-day session is being held at the JNU Convention Centre. Registration information is available at <http://msc.macmillan.com/en/training/JNU>.

Dr James Butcher, a former editor and currently Associate Director of the Open Publishing Division at NPG, will deliver the workshop. Before moving to his current role, Dr Butcher was Publisher of the Nature Reviews journals.

This training workshop is aimed at science faculty and research scholars from any field in the natural sciences interested in developing their scientific writing skills to improve their chance of publishing research in top-tier journals. Dr Butcher will discuss the entire publishing process from paper submission to publication. Regular quizzes and a question-and-answer session will give participants ample opportunity to learn more about what it takes to get their research published in an international, peer-reviewed journal.

Registration fees are INR 10,000 for Faculty and INR 5,000 for PhD Scholars. In association with *Nature India*, an online news and research portal for the latest research in India, the workshop will also cover some of the big issues facing Indian scientists today. This is the first in a series of workshops that MSC plans to organize across India in coming years.

About MSC

As an exclusive partner to NPG, MSC has access to the editorial and publishing expertise of Macmillan Science & Education, the company behind *Nature* and *Scientific American*. MSC aims to meet the growing demand for high-quality scientific communications services from scientific institutions around the world. MSC offers clients tailor-made support in all areas of science communication, including:

- In-depth developmental scientific editing services;
- High-quality training workshops and seminars;
- Custom publications.

Macmillan Science Communication has offices in London, Tokyo, Madrid and New Delhi, and all of our services are available to researchers anywhere in the world.

About *Nature India*

The one-stop site for information on Indian science. Serving the scientific community of the world's largest democracy, it is replete with information on jobs, events, the best research and science news, in-depth features and commentaries from India.

It is dedicated to bringing high-quality research and innovative technologies from India, to scientists and professionals around the world. Each week, *Nature India*'s editor identifies the best and most recently published papers by scientists based in India. For papers appearing in *Nature* or Nature research journals, free access to full text of the original article is provided.

Nature India averages a lot of page views a month with around 18,000+ registered users and growing. The website is the most comprehensive, up-to-date online resource on information about India's science

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. NPG

publishes a range of Nature research journals and *Nature Reviews* journals, and a range of prestigious academic and partner journals including society-owned publications. Online, nature.com provides over 8 million visitors per month with access to NPG publications and services, including news and comment from *Nature*, and the leading scientific jobs board *Naturejobs*.

Scientific American is at the heart of NPG's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches over 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany.

Throughout all its businesses NPG is dedicated to serving the scientific community and the wider scientifically interested general public. Part of Macmillan Science and Education, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, San Francisco, Washington DC, Buenos Aires, Mexico City, Sao Paulo, Cairo, Dubai, Delhi, Mumbai, Hong Kong, Shanghai, Melbourne, Osaka, Seoul, Barcelona, Madrid, Basingstoke, Heidelberg, Munich and Paris.
