Swiss open-access publisher and research network, Frontiers, part of the Nature Publishing Group family, is pleased to announce the continuation of its open access publishing agreement University College London (UCL).

Since September last year, almost 100 authors affiliated with UCL have benefited from this publishing agreement, that enables researchers to publish their work in the "[Frontiers in" journal series](#), with UCL covering the article-publishing fees.

"Results from publicly funded research should be accessible to everyone. That is why UCL is pleased to team up with Frontiers and other high-quality open-access publishers to enable our scientists to make their research freely available. Our renewed agreement is a great step forward, especially as 2014 is the Year of Open Access in the UK," says Paul Ayris, Director of Library Services, UCL.

"We are delighted to collaborate with UCL to enable their world-class researchers to publish in the open-access "Frontiers in" journals," says Kamila Markram, Founder and CEO of Frontiers. "With Frontiers [unique publishing model](#), scientists can boost the reach and impact of their research by making it widely accessible."

UCL joins a [growing number](#) of institutions that support authors to publish with Frontiers, including the Max Planck Society, Bielefeld University, University of Nottingham, University of Stuttgart and others.

If you are a researcher or librarian and want to help your university go Open Access with Frontiers, please contact: institutions@frontiersin.org

For further information, please visit the [Frontiers Institutional Membership](#).

About Frontiers

Frontiers is a community-driven open-access publisher and research network, part of the Nature Publishing Group family. Established by scientists in 2007, Frontiers drives innovations in peer-review, article level metrics, post publication review, democratic evaluation, research networking and a growing ecosystem of open-science tools. The "Frontiers in" journal series has published 20,000 peer-reviewed articles across 46 journals, which receive 6 million monthly views, and are supported by over 140,000 editors, reviewers and authors worldwide. For more information, visit: <http://www.frontiersin.org>.

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. NPG publishes a range of Nature research journals and *Nature Reviews* journals, and a range of prestigious academic and partner journals including society-owned publications. Online, nature.com provides over 8 million visitors per month with access to NPG publications and services, including news and comment from *Nature*, and the leading scientific jobs board *Naturejobs*.

Part of the Nature Publishing Group family is Frontiers, a community-driven open-access publisher and research network. NPG and Frontiers work together to empower researchers to change the way science is communicated, through open access publication and open science tools. For more information on Frontiers, please go to www.frontiersin.org.

Scientific American is at the heart of NPG's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches over 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany.

Throughout all its businesses NPG is dedicated to serving the scientific community and the wider scientifically interested general public. Part of Macmillan Science and Education, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, San Francisco, Washington DC, Buenos Aires, Mexico City, Sao

Paulo, Cairo, Dubai, Delhi, Mumbai, Hong Kong, Shanghai, Melbourne, Osaka, Seoul, Barcelona, Madrid, Basingstoke, Heidelberg, Munich and Paris. For more information, please go to www.nature.com.
