(Lausanne, Switzerland) - Frontiers, a community-driven open-access publisher and research network, part of Nature Publishing Group family, is pleased to announce the launch of a new open-access journal: *Frontiers in Nutrition*.

Frontiers in Nutrition is the latest addition to the "**Frontiers in**" journal series and will publish scientific investigations and research of the highest quality relevant to eating behavior, clinical nutrition, food science technology and more.

"In a world where malnutrition, hunger and obesity continue to rise at the same time, *Frontiers in Nutrition* will generate an integrated platform for the exchange of science, concepts and ideas taking into account the perspectives from academic research labs, private sector science and non governmental organizations," says Dr. Johannes Le Coutre, Nestlé Research Center, Switzerland, and Field Chief Editor of *Frontiers in Nutrition*. "Frontiers' unique Interactive Peer Review will enable authors, editors and reviewers to work together to generate a sound knowledge base in the field of nutrition that will have an impact on the problems we face."

The mission of Frontiers is to place scholarly publishing back in the hands of working researchers and to promote an **interactive, fair, and efficient review** process of a range of **article** types. Articles are rigorously reviewed based on objective criteria in an average time of 84 days, published under the Creative Commons Attribution (CC-BY) license, and are freely available to an international audience. **Impact Article level metrics** and post-publication review will be available on all articles, and the **Frontiers Tiering System** will showcase high impact research for a broader audience.

Current specialty sections open for submissions to Frontiers in Nutrition include:

- **Clinical Nutrition** (Speciality Chief Editor: **Omer Kucuk**)
- **Eating behaviour** (Speciality Chief Editors: **Adrian Meule** and **Claus Vögele**)
- **Nutrigenomics** (Speciality Chief Editors: **Martin Kussmann** and **Steven H Zeisel**)
- **Nutrition and Environmental Sustainability** (Speciality Chief Editor: **Barbara Burlingame**)
- **Nutrition and Food Science Technology** (Speciality Chief Editors: **Chor San H Khoo** and **Dietrich Knorr**)
- **Nutrition Methodology** (Speciality Chief Editors: **David B Allison** and **Tapan Mehta**)

About Frontiers

Frontiers is a community-driven open-access publisher and research network, part of the Nature Publishing Group family. The "Frontiers in" journal series has published more than 15,000 peer-reviewed articles, receives over 6 million monthly views, and is supported by over 100,000 leading authors and editors worldwide. Frontiers drives innovations and new technologies around peer-review, article and author impact analytics, social networking for researchers, and a whole ecosystem of open science tools. With headquarters in Lausanne, Switzerland, Frontiers has become the largest and fastest-growing open-access publisher and the first to combine open-access publishing with research networking. For more information, please visit <http://www.frontiersin.org>.

About Nature Publishing Group (NPG)

Nature Publishing Group (NPG) is a publisher of high impact scientific information in print and online. NPG publishes journals, online databases and services across the life, physical, chemical and applied sciences.

Focusing on the needs of scientists, *Nature* (founded in 1869) is the leading weekly, international scientific journal. NPG publishes a range of Nature research journals and *Nature Reviews* journals, and a range of prestigious academic and partner journals including society-owned publications. Online, nature.com provides over 8 million visitors per month with access to NPG publications and services, including news and comment from *Nature*, and the leading scientific jobs board *Naturejobs*.

Scientific American is at the heart of NPG's consumer media division, meeting the needs of the general public. Founded in 1845, *Scientific American* is the oldest continuously published magazine in the US and the leading authoritative publication for science in the general media. Together with scientificamerican.com and 14 local language editions around the world it reaches over 5 million consumers and scientists. Other titles include *Scientific American Mind* and *Spektrum der Wissenschaft* in Germany.

Throughout all its businesses NPG is dedicated to serving the scientific community and the wider scientifically interested general public. Part of Macmillan Science and Education, NPG is a global company with principal offices in London, New York and Tokyo, and offices in cities worldwide including Boston, San Francisco, Washington DC, Buenos Aires, Mexico City, Sao Paulo, Cairo, Dubai, Delhi, Mumbai, Hong Kong, Shanghai, Melbourne, Osaka, Seoul, Barcelona, Madrid, Basingstoke, Heidelberg, Munich and Paris.
