## Global Payment Network – IIN Range Summary

An Issuer Identification Number is the first six (6) or eight (8) digits that comprise the initial part of a card number and designate the issuer that is permitted to issue cards with the identified card numbers (IIN). This IIN Range Summary is a list of all IIN ranges supported by the Discover® Network, Diners Club International®, and PULSE® locally and internationally via direct issuer relationships and relationships with other networks. Accepting cards that fall within these IINs allows merchants the ability to honor cards, tokens, and products across multiple networks and capabilities.

The Discover Network supports transaction routing for Japan Credit Bureau (JCB) and Union Pay International (UPI) IINs within the United States. JCB and UPI IINs are not currently enabled for Diners Club International members and participants. All Discover Network participants should refer to their agreements with Discover Network, the applicable operating regulations, and other Program Documents (as defined in operating regulations) to enable these IINs.

To receive additional details associated with the IINs listed in the table below, please use the latest IIN range table publication. Companies with an NDA on file can directly access the DGN IIN Range Table in the EASI Portal Document Library. Please email [easi@discover.com](mailto:easi@discover.com) for assistance if you would like to be setup with this access.

Global Payment Network - IIN Range Summary		
Start	End	PAN Length (Min-Max)
3000 0000	3059 9999	16-19
3088 0000 <sup>a</sup>	3094 9999 <sup>a</sup>	16-19
3095 0000	3095 9999	16-19
3096 0000 <sup>a</sup>	3102 9999 <sup>a</sup>	16-19
3600 0000	3699 9999	14-16
